Administrator User Guide

Knights of Columbus Tracking Platform

Offline print edition

Compiled 2026-10-12 from docs/ADMIN_USER_GUIDE.md

Knights of Columbus Tracking Platform — Administrator User Guide

Audience: Council Admins, Super Admins, the Grand Knight (GK), the Deputy Grand Knight (DGK), the Financial Secretary (FS), the Treasurer, Trustees and other council officers.

Covers: the management pages of the web portal, grouped by the seven sidebar pillars.

> **Every administrator is also a member.** Signing up, logging hours and taking donations are in the *Member User Guide*.
>
> The full access table is in the *Role Permissions Matrix*.

Contents

1. Roles and access
2. The seven pillars
3. Module feature flags
4. Governance
5. Faith In Action
6. Finances
7. Performance
8. Resources and the Google Drive archive vault
9. Answers
10. System Settings and the Supreme roster sync
11. Data protection rules
12. Troubleshooting reference
13. Automated messages reference
14. Member engagement and the roster lifecycle
15. Flagged hours review
16. Council Wide Settings and platform settings
17. Access requests, check payments, asset photos, impersonation and remote help
18. Annual roadmap, meeting check-in and meeting photos
19. The Active Desks dashboard
20. The Cross-Council Loaner Library and the colour-coded calendar
21. Planning workflows and bilateral council affiliations
22. The Global Operations Knowledge Vault and its archive
23. Appendix: QR code files

How to read a tutorial

Every tutorial starts with a **Prerequisite (who can do this)** line. The line states the access privilege that the task needs. Stop when your role is not on the line.

Every tutorial then has five parts: **Goal**, **Start point**, **Steps**, **Expected result** and **Common problems**. A **Warning** line comes before the steps when the task deletes data, sends messages, posts money or cannot be undone.

1. Roles and access

1.1 Member types and officer roles

A member has one member type. A member may also hold one or more officer roles.

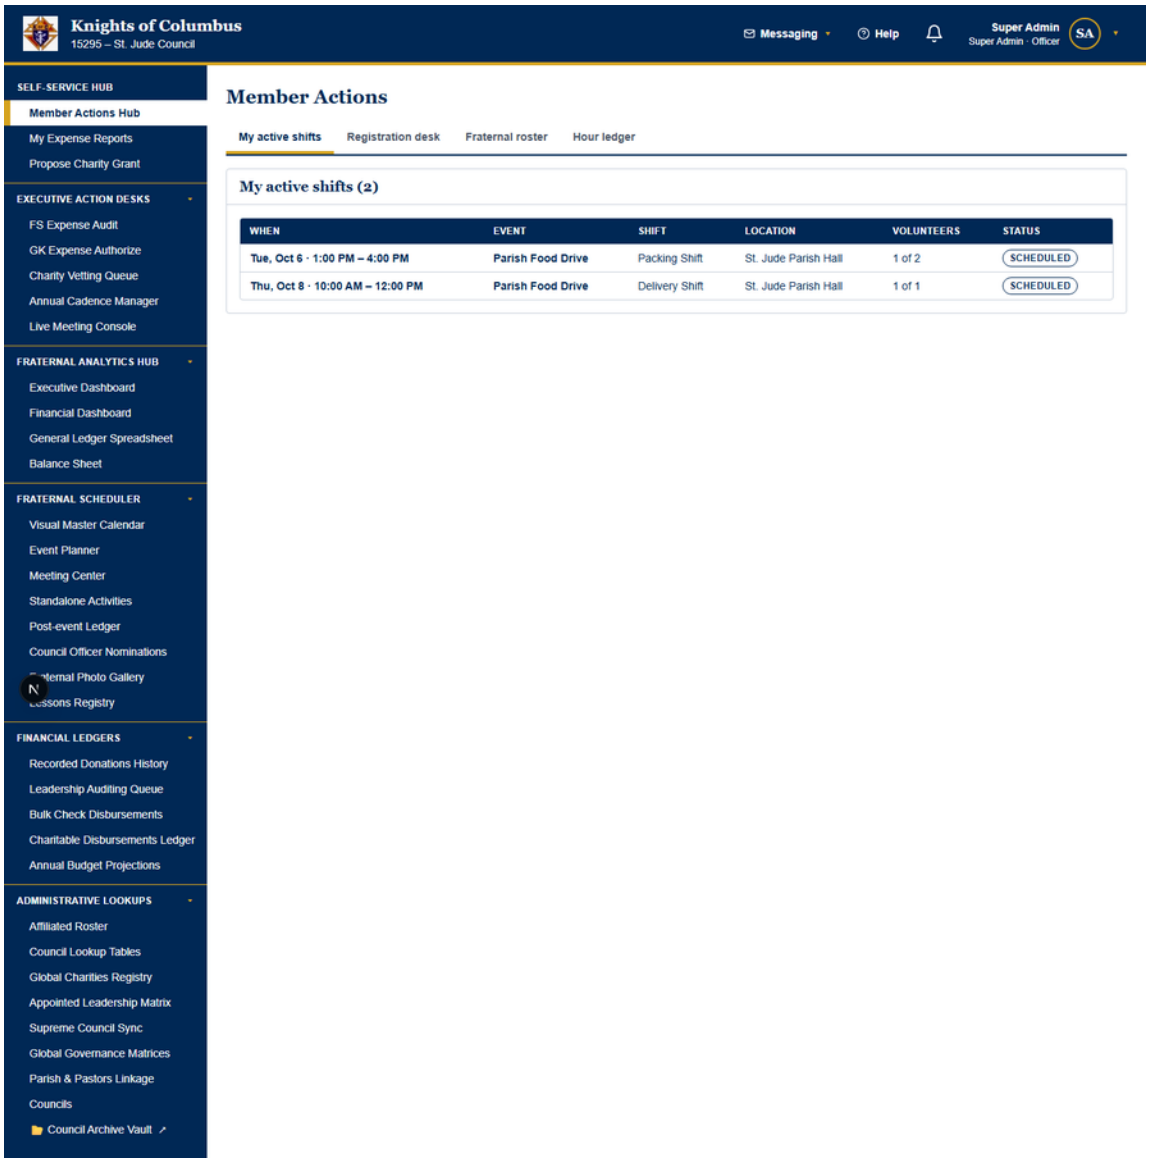

Member type	Scope
Member	The member's own records and the shared member pages.
Admin	The Admin's own council only.
Super Admin	Every council.

Officer role	Extra access
Grand Knight and **Deputy Grand Knight**	The executive dashboard and the charity vetting desk. Both counter-sign expenses, appoint officers and keep the cadence, the agenda templates, the bylaws, the meeting check-in and the base dues rate. The Deputy Grand Knight (DGK) has the same access as the Grand Knight (GK).
Financial Secretary	Issues payment requests on expenses. Posts to the general ledger. Pays checks.
Treasurer	Posts to the general ledger. Pays checks.
Trustee	Vets charity requests. Follows up on grants after 6 months.
Recorder	Edits the live agenda. Records hand tallies.
Any other seated officer	Reads the dashboards. Schedules meetings. Runs the live console.

1.2 Access rules

- An Admin acts only on the Admin's own council. A Super Admin acts on any council.
- The data service checks every rule. A refused action shows a message and changes nothing.
- Nobody signs or pays an expense report that the same person submitted. The rule includes Super Admins.
- One person never signs both lines of the same expense report.

> **Caution:** finance access follows the role names **Treasurer** and **Financial Secretary**.
>
> A renamed role removes finance access from the officers who hold the role. Keep both names exactly as written.

Member Actions Hub with the role-filtered sidebar (/member-actions)

1.3 Choose the council

Most management pages have a **Council** selector at the top.

- An Admin sees the Admin's own council.
- A Super Admin may choose any council.

The navy header shows your own council, your name, your member type and your officer status.

2. The seven pillars

2.1 Concept: pillar navigation

The sidebar has seven pillars. Every pillar is always open. A pillar shows only the links that your role may open. A pillar with no allowed links does not show.

A link that your role cannot open does not show. The sidebar never shows a locked or greyed-out link. The rule includes the five officer desks: **Live Meeting Console**, **Annual Cadence Manager**, **FS Expense Audit**, **GK Expense Authorize** and **Charity Vetting Queue**.

Pillar	Links, in sidebar order	Main audience
Governance	Live Meeting Console, Annual Cadence Manager, Meeting Center, Council Officer Nominations, Appointed Leadership Matrix, Constitutional Bylaws, Constitutional Advisor	Officers, the GK, Admins. The Constitutional Advisor shows to officers, Admins and Super Admins only.
Faith In Action	Standalone Activities, Member Actions Hub, Event Planner, Visual Master Calendar	Admins plan. Members volunteer.
Finances	General Ledger Spreadsheet, Balance Sheet, Financial Dashboard, My Expense Reports, Bulk Check Payments Made, FS Expense Audit, GK Expense Authorize, Charity Vetting Queue, Propose Charity Grant, Charity Payments Made Ledger, Donations History, Annual Budget Projections	Finance officers, the GK, Admins
Performance	Council Dashboard, Executive Dashboard, Growth & Hours Charts, Post-event Ledger, Lessons Registry	Seated officers, Admins
Resources	Fraternal Photo Gallery, Council Artifacts, Marketing Factory, 🗃 Council Archive Vault	Every member. The Marketing Factory and the vault link show to officers and Admins only.
Answers	Online Help Center, SOP Center	Every member
System Settings	Councils, Feature Flags Control Center, Global System Parameters, Council Wide Settings, Affiliated Roster, Supreme Council Sync, Council Lookup Tables, Credentials Vault, Global Charities Registry, Global Governance Matrices, Parish & Pastors Linkage	Admins, finance officers, Super Admins. The Council Wide Settings and the Credentials Vault show to officers, Admins and Super Admins only. Global System Parameters shows to Super Admins only.

Three pages open from the header, not from the sidebar.

- **Messaging** (envelope icon) → **Council Messages & Alerts** and **My Distribution Lists**.
- **Help** (question-mark icon) → **Online Help Center**.
- Your name → **My Profile**.

The **System Settings** pillar had the name **Setup** in earlier versions of the portal. The links in the pillar did not change.

2.2 Concept: the Navigation Guide

The **Navigation Guide** link is at the top of the sidebar, above the seven pillars. Every member sees the link.

The **Navigation Guide** page reads your member type and your officer roles. The page then lists only the links that your own sidebar shows. Each link has one plain-English sentence that tells what the page does.

You sign in as	The guide shows
Member	The member pages only. The guide shows no leadership, finance desk or settings page.
Council Officer	The member pages and the desks of your office, for example **GK Expense Authorize** for the Grand Knight.

You sign in as	The guide shows
Council Admin	The member pages and the leadership, finance and settings pages of your council.
Super Admin	Every page, including **Global System Parameters**.

A few pages read differently for leaders. For example, a member reads that **Annual Budget Projections** shows the budget. A leader also reads that budget keepers draft and approve the budget there. A module that your council switched off is not in the guide, because the module is not in your sidebar.

The **Your time limits** part of the guide lists the time windows and reminder days in force for you now. The guide reads the numbers from your council's settings and the platform settings each time the page opens. A member sees the limits that a member meets: the expense window, the logging window, the hours reminders, the invitation lead time and the sign-in length. A leader also sees every other time setting. The settings that no feature uses yet are listed last under **Saved for future features (not used yet)**.

2.3 Read your Navigation Guide

> **Prerequisite (who can do this):** Every signed-in member.

Goal: Learn what each link in your sidebar does.

Start point: Sidebar → **Navigation Guide** (at the top, above the pillars).

Steps:

1. Select **Navigation Guide**.
2. Read the first line. The line shows how you are signed in, for example *You are signed in as: Council Officer (Grand Knight)*.
3. Read each pillar. The pillars and links are in the same order as your sidebar.
4. Select a link name to open that page.
5. Read **Your time limits** for your council's time windows and reminder days.
6. Read **In the top bar** for the Messaging menu and your name menu.

Expected result: The page lists every link that your sidebar shows, with one sentence for each link. **Your time limits** shows your council's current numbers.

Common problems:

Problem	Cause	Fix
A page that a colleague uses is not in your guide.	Your role cannot open the page.	Ask a council Admin about your role.
A whole module is missing from the guide.	Your council switched the module off (section 3).	Ask a Super Admin to switch the module on.

3. Module feature flags

3.1 Concept: backend logic of the flags

Each council row has twelve on/off columns. Each column is a module feature flag. A new council has every flag on.

Flag column	Label in the Feature Flags Control Center	Web pages hidden when off	Phone items hidden when off
`flag_mobile_elections`	**Officer elections**	Council Officer Nominations, Appointed Leadership Matrix	None
`flag_fundraising_inflow`	**Fundraising inflow**	Donations History	**Donate**
`flag_charity_proposals`	**Charity proposals**	Propose Charity Grant, Charity Vetting Queue	None
`flag_complex_shifts`	**Event shifts**	Event Planner, the shift tabs of Member Actions Hub	**Signup**, and the shift mode of **Report**
`flag_meeting_management`	**Meeting management**	Meeting Center, Annual Cadence Manager, Live Meeting Console	**Mtgs**
`feature_expense_reporting`	**Expense reporting**	My Expense Reports, Leadership Auditing Queue, FS Expense Audit, Treasurer Ledger Audit Desk, GK Expense Authorize, Bulk Check Payments Made	The expense screen and the **Expense reports** card on **Home**
`feature_faith_center`	**Faith Center**	Faith Center	The feast-day banner, the Daily Bible Quote, the praying hands and the prayer intentions
`feature_constitutional_advisor`	**Constitutional Advisor**	Constitutional Advisor	None
`feature_council_bylaws`	**Council bylaws**	Constitutional Bylaws	None
`feature_council_history`	**Council history**	Council history (Team Legacy)	None
`feature_live_meeting_console`	**Live meeting console**	Live Meeting Console	None
`feature_volunteer_quarantine`	**Flagged hours review**	The **Flagged Hours Review Desk** on the **Oversight Desk** of the dashboard. Members' hours also stop going to review (section 15).	None

The flags follow four rules.

1. A flag that is off hides the module from every member of the council. The rule includes Admins.
2. A hidden desk is gone from the sidebar.
3. A hidden page refuses a typed web address. The phone sends a member on a hidden screen back to **Home**.
4. A flag never deletes data. A flag that is switched back on restores the module with all records.

The general ledger, the budget and the activity hour log have no flag. They stay on for every council.

3.2 Switch a module on or off

> **Prerequisite (who can do this):** You must have Super Admin privileges. Council Admins do not see the Feature Flags Control Center.

> **Warning:** a switched-off module disappears at once for every member of the council, on the web and on the phone.

Goal: Turn one optional module on or off for one council.

Start point: Sidebar → System Settings → **Feature Flags Control Center**.

Steps:

1. Find the row of the module. Each row shows the label, the flag column and the pages the flag hides.
2. Find the column of the council. Each column shows the council number and how many modules are on.
3. Clear the box to hide the module. Select the box to show the module.

Expected result: The platform saves each switch at once. Members of the council see the change the next time each page loads.

Common problems:

Problem	Cause	Fix
A member still sees a phone tab.	The phone read the flags before the change.	Ask the member to sign out and sign in again.
"… is not a feature flag"	The request named an unknown flag.	Use one of the twelve flags in 3.1.

---

4. Governance

4.1 Run a live meeting

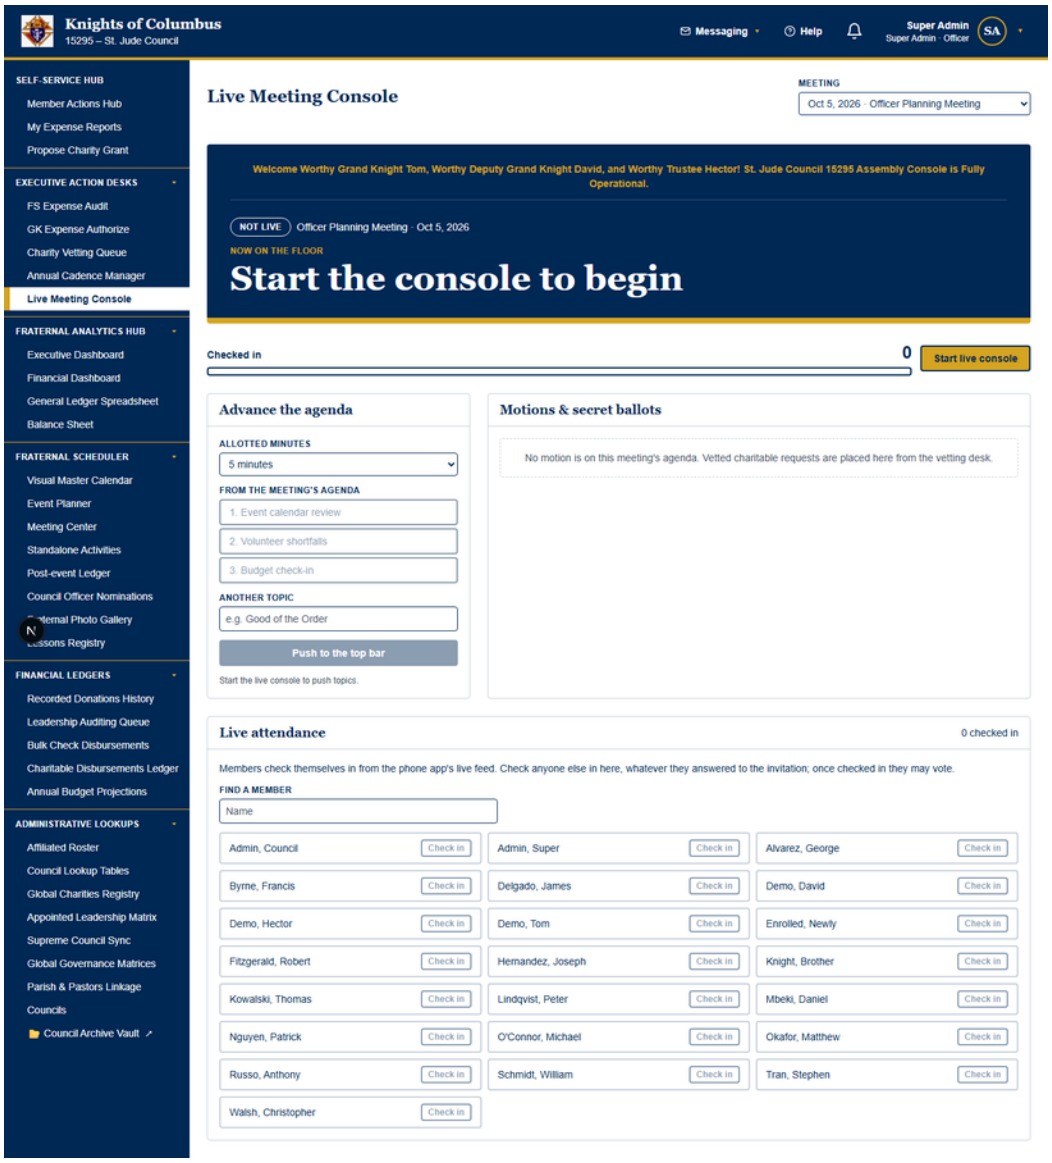

> **Prerequisite (who can do this):** You must be a seated officer of the council, a council Admin, the meeting owner or a Super Admin. Other members do not see this desk.
>
> **Warning: Passed**, **Failed** and **Tabled** record the council's decision on the motion.

Goal: Chair a council meeting from one screen.

Start point: Sidebar → Governance → **Live Meeting Console**.

Steps:

1. Choose the meeting in **Meeting**.
2. Select **Start live console**.
3. Check in members in **Live attendance**. Use **Find a member** to search.
4. Select a line in **Order of Business** to put the line on the floor.
5. Set **Allotted minutes** for the topic.
6. For a motion, select **Launch secret smartphone ballot**. Members vote **Approve**, **Deny** or **Abstain** on their phones.
7. Select **Passed**, **Failed** or **Tabled**.
8. Select **Close the console** after the last item.

Live Meeting Console (/meetings/live)

Expected result: The top bar shows **Now on the floor** and the countdown. Phones that follow the agenda show the same line.

Common problems:

Problem	Cause	Fix
"Start the console first"	The console is not live.	Select **Start live console**.
"Decide the open ballot first"	A ballot is still open.	Decide the open motion. Then continue.
Passed is greyed out.	The smartphone ballot has no more Approve votes than Deny votes.	Select **Failed** or **Tabled**.
"No meeting from the past week on is yours to run."	No meeting is in range for you.	Schedule the meeting in the **Meeting Center**.

4.2 Record a hand tally

> **Prerequisite (who can do this):** You must be the council's Grand Knight, Deputy Grand Knight or Recorder, a council Admin or a Super Admin.
>
> **Warning: Save tally & decide the motion** decides the motion. A tie fails the motion.

Goal: Record a vote by raised hands.

Start point: Sidebar → Governance → **Live Meeting Console** → the motion → **Record Hand Tally**.

Steps:

1. Count the hands for the motion. Enter the count in **Approved hands**.
2. Count the hands against the motion. Enter the count in **Denied hands**.
3. Select **Save tally & decide the motion**.
4. Optional: for a passed motion that releases money, choose the posting in **General-ledger posting**. Select **Save link**.

Expected result: The motion shows **Passed** or **Failed**. A linked motion shows **Ledger linked**.

Common problems:

Problem	Cause	Fix
"Type both counts; at least one hand."	A count is empty, or both counts are 0.	Enter both counts.
The hand tally is refused.	A smartphone ballot already opened on the motion.	Decide the motion from the ballot result.

4.3 Correct a live agenda line

> **Prerequisite (who can do this):** You must be the council's Grand Knight, Deputy Grand Knight or Recorder, a council Admin or a Super Admin.

Goal: Fix or add an agenda line during the meeting.

Start point: Sidebar → Governance → **Live Meeting Console** → **Order of Business**.

Steps:

1. Select the line. The line opens for editing.
2. Correct the text. Press Enter to save. Press Escape to cancel.
3. For a new topic, select **Blank last-minute line - click to write it**.

Expected result: The corrected line shows on the console and on members' phones.

Common problems:

Problem	Cause	Fix
A line does not open for editing.	The DGK and other officers do not edit the agenda.	Ask the GK or the Recorder.

4.4 Lay down the year's meetings with a cadence

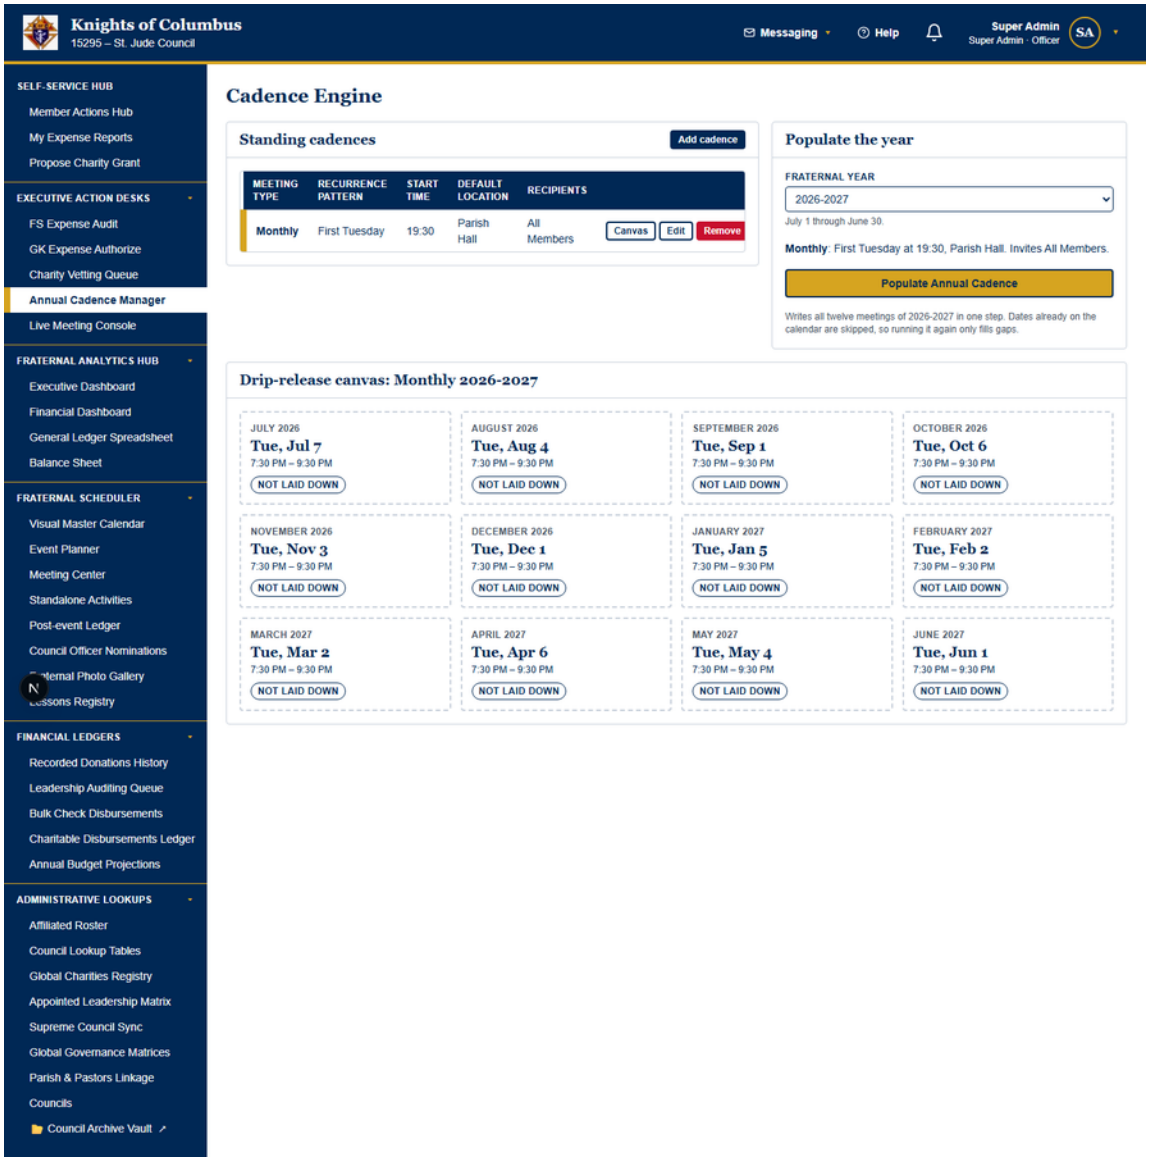

> **Prerequisite (who can do this):** You must be a council Admin, the Grand Knight, the Deputy Grand Knight or a Super Admin. Other members do not see this desk.
>
> **Warning: Populate the year** creates up to 12 meetings and their invitations.

Goal: Create the fraternal year's regular meetings in one step.

Start point: Sidebar → Governance → **Annual Cadence Manager**.

Steps:

1. Select **Add cadence**.
2. Choose the **Meeting type**.
3. Set **Recurrence pattern: week** and **Recurrence pattern: day**, for example First and Tuesday.
4. Set **Start time**, **Default location** and **Default recipient group**.
5. Select **Save cadence**.
6. Choose the **Fraternal year**. Select **Populate the year**.

Annual Cadence Manager (/meetings/cadence)

Expected result: The platform creates one meeting per month, July through June. Each meeting lasts 120 minutes. Invitations are released 5 days before each meeting by default. A Super Admin sets the number of days for every council (section 16.6).

Common problems:

Problem	Cause	Fix
A month has no new meeting.	A meeting of the same type already exists on that date.	No action. The platform skips the date.

4.5 Schedule a single meeting

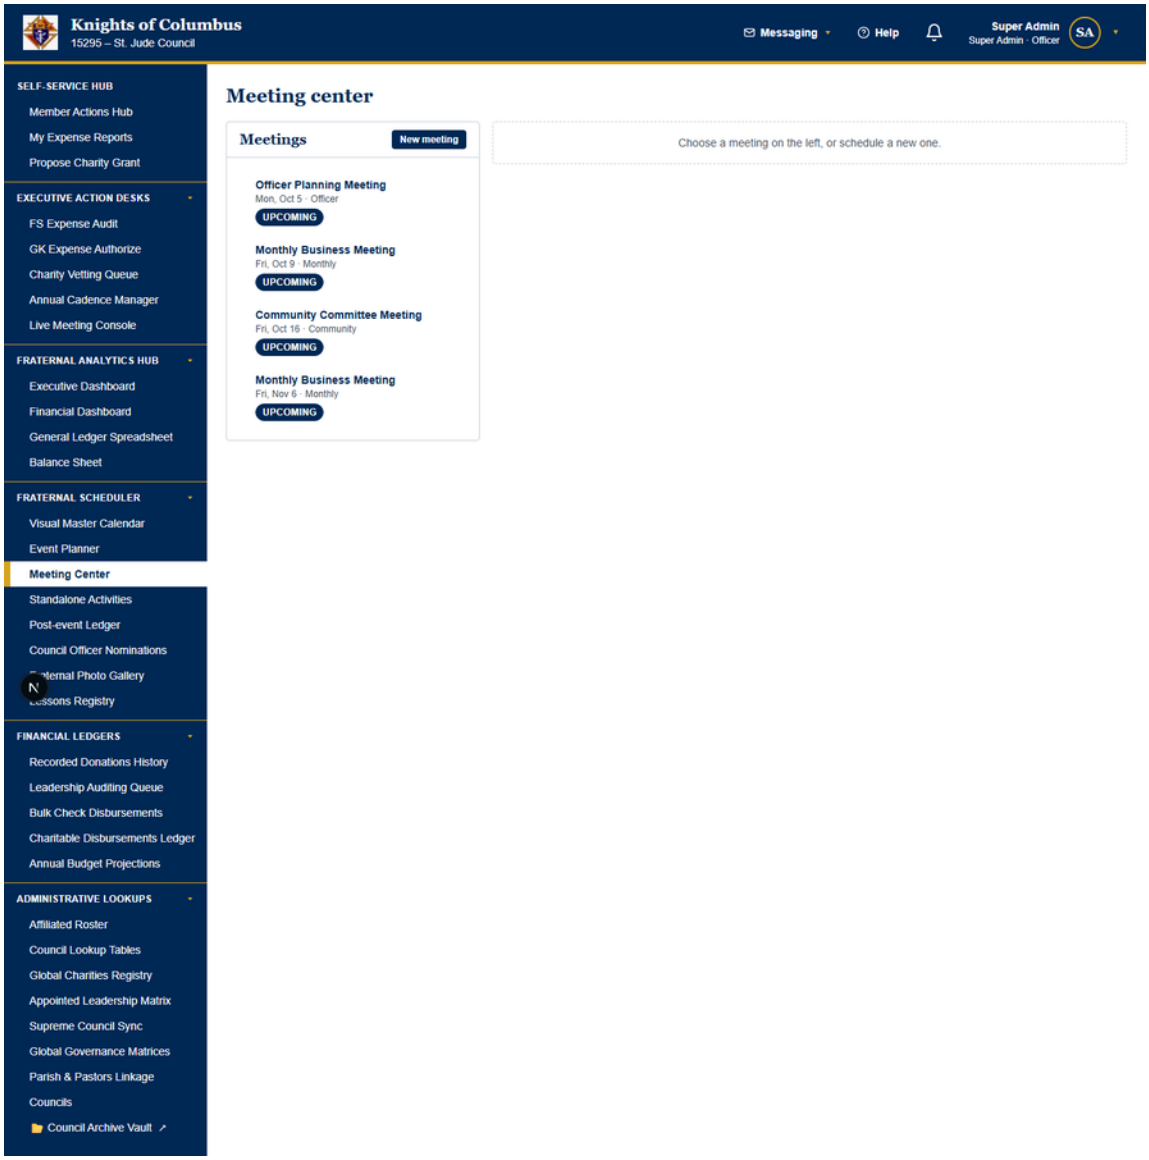

> **Prerequisite (who can do this):** You must be a seated officer of the council, a council Admin or a Super Admin.
>
> **Warning: Schedule meeting** sends invitations at once.

Goal: Create one meeting and invite members.

Start point: Sidebar → Governance → **Meeting Center**.

Steps:

1. Select **New meeting**.
2. Fill in **Meeting name**, **Type**, **Date**, **Location**, **Starts** and **Ends**.
3. Check the **Agenda**. The **Type** fills the agenda from the council's template.
4. For a meeting over several days, tick **Multi-Day Assembly / Extended Event**. Set the **End date**.
5. Choose the invitees: **All active members**, **Officers only** or **Choose members…**.
6. Select **Schedule meeting**.
7. After the meeting, select **Upload minutes**. Tick each attendee. Save.

Meeting Center (/meetings)

Expected result: A message shows *"Meeting scheduled and invitations sent."*

Common problems:

Problem	Cause	Fix
New members are not invited.	The members joined after the meeting was scheduled.	Select **Invite all active members**.
A multi-day assembly adds no hours.	Multi-day assemblies add no meeting hours by design.	No action.

4.6 Keep the meeting agenda templates

> **Prerequisite (who can do this):** You must be a council Admin, the Grand Knight, the Deputy Grand Knight or a Super Admin.

Goal: Set the default agenda for one meeting type.

Start point: Sidebar → System Settings → **Council Lookup Tables** → **Meeting Agenda Templates**.

Steps:

1. Choose the **Meeting type**.
2. Write the outline in **Default agenda outline**.
3. Select **Save template**.
4. To remove a template, clear the text. Select **Save template**.

Expected result: A new meeting of the type starts with the outline.

Common problems:

Problem	Cause	Fix
A meeting kept the old agenda.	The officer typed an agenda before choosing the type.	Select **Use the template** on the meeting form.

4.7 Manage nominations and appointments

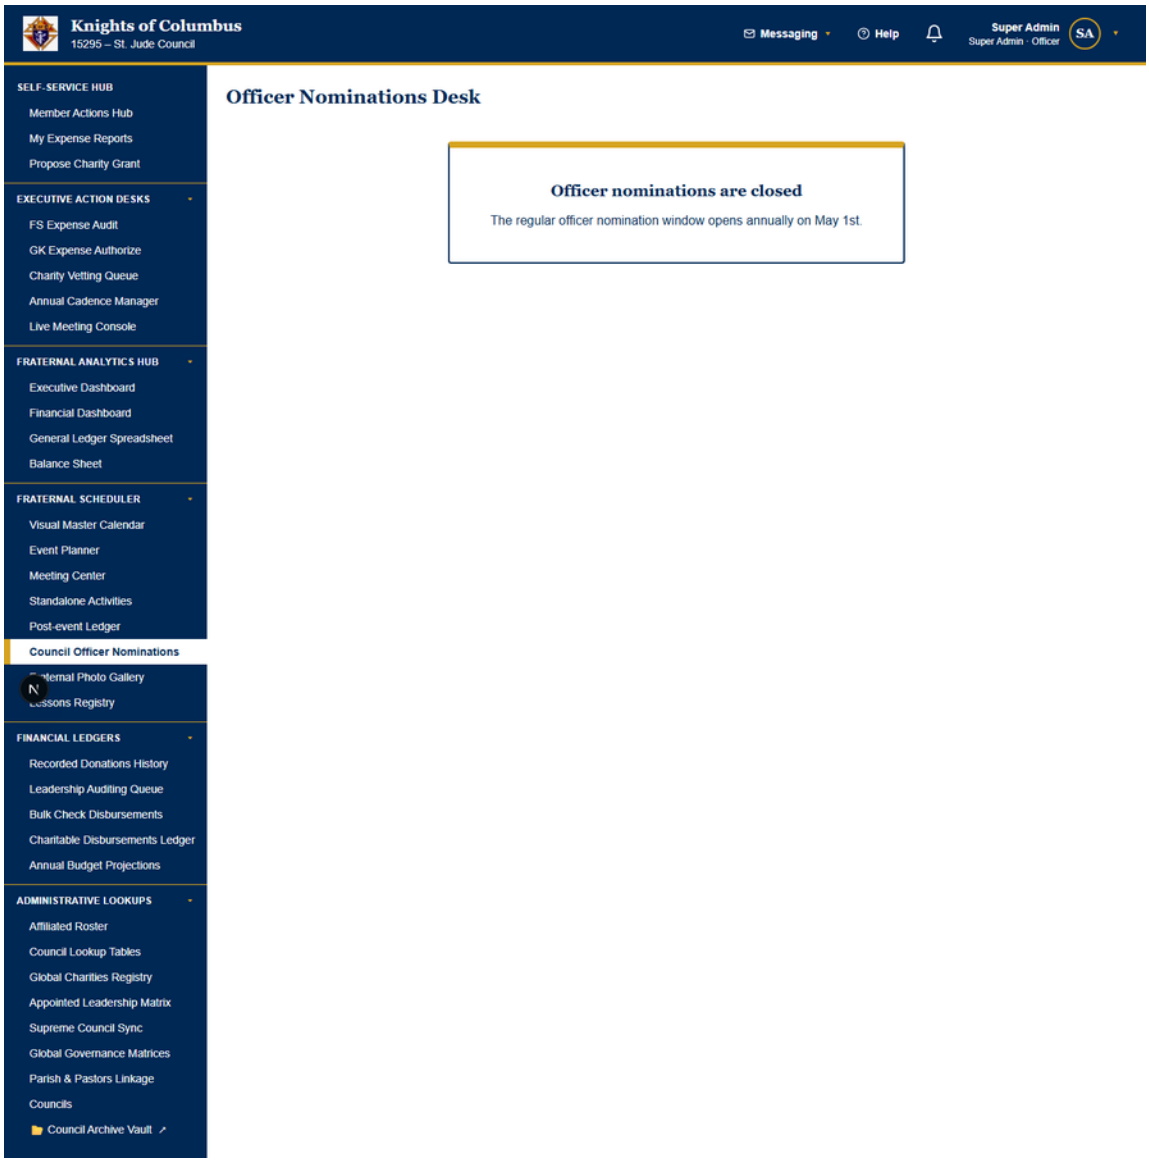

> **Prerequisite (who can do this):** You must be an active member to nominate. You must be the Grand Knight, the Deputy Grand Knight or a Super Admin to appoint officers.

Goal: Fill the council's elected and appointed seats.

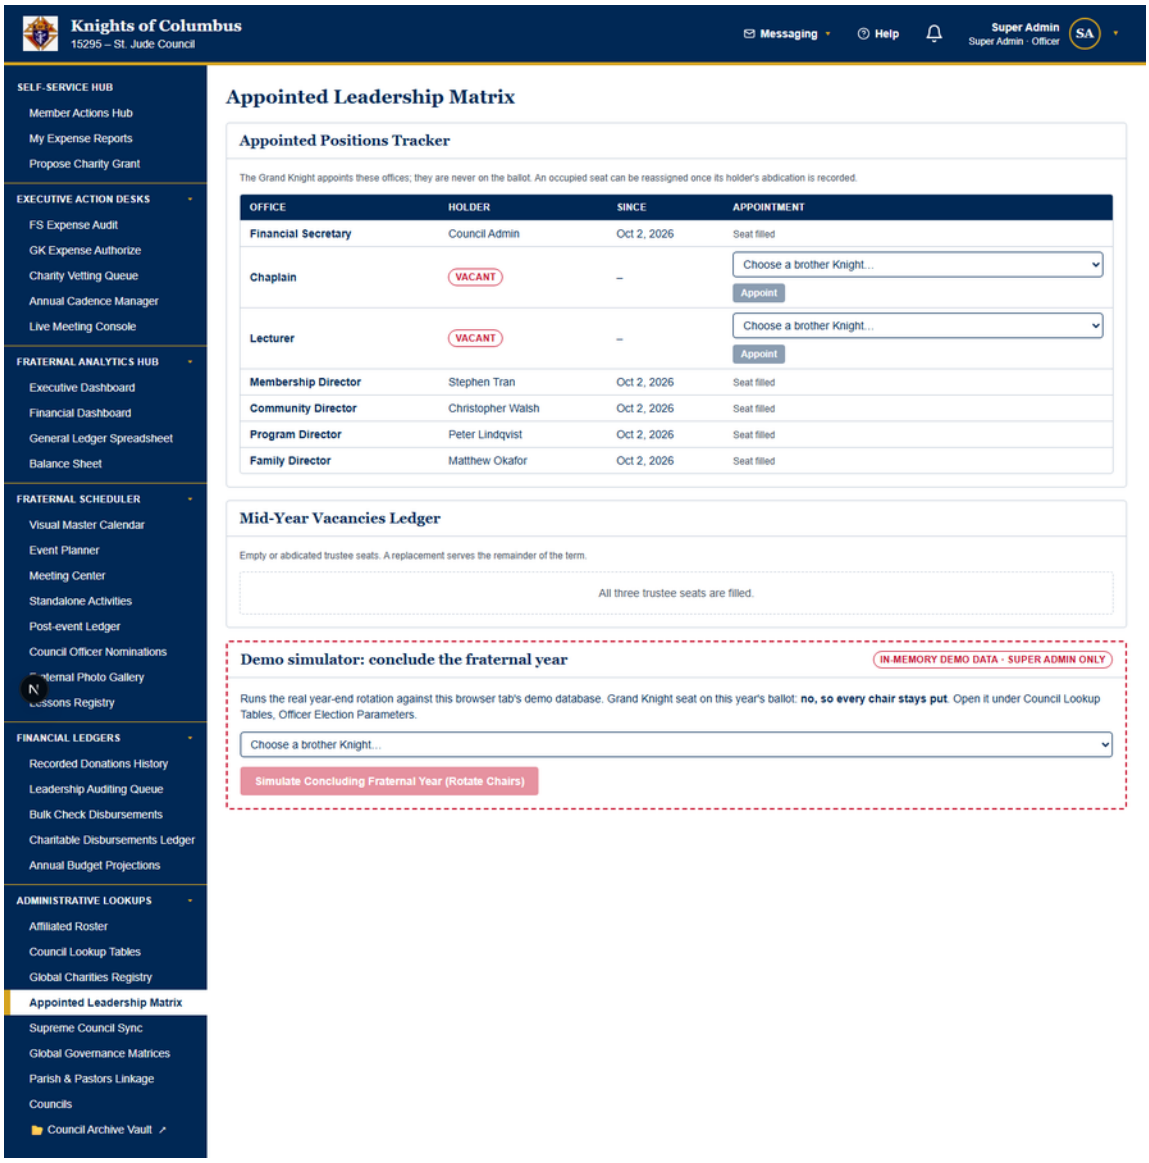

Start point: Sidebar → Governance → **Council Officer Nominations** or **Appointed Leadership Matrix**.

Steps:

1. Open **Council Officer Nominations** to nominate a Brother Knight for office.
2. Open **Appointed Leadership Matrix** to fill an appointed seat.
3. Choose the member for each vacant seat. Save.

Nominations and elections (/elections)

Appointed positions (/elections/appointments)

Expected result: The seat shows the member's name.

Common problems:

Problem	Cause	Fix
Both pages are missing.	The council switched off **Officer elections**.	Ask a Super Admin (section 3).

4.8 Concept: the Council Bylaws Data Vault

The vault holds one bylaws document per council. Every member of the council reads the bylaws.

- The vault stores the bylaws as text in the `Council.BylawsMarkdown` column. The limit is 100,000 characters.
- The vault also stores the save time in `BylawsUpdatedAt`.
- A line that starts with `#` starts an article. A line that starts with `##` starts a section.
- The vault splits the text into clauses. The clause id `A2.S3` means article 2, section 3. The id `A0` holds text before the first article.
- The **Parliamentary engine feed** panel lists every clause with its id, heading and word count.

- The parliamentary engines read the same clauses. A motion or a ruling cites a clause by the clause id.

4.9 Edit the council bylaws

> **Prerequisite (who can do this):** You must be the council's Grand Knight or Deputy Grand Knight, a council Admin or a Super Admin. Other members see no **Edit bylaws** button.
>
> **Warning: Save bylaws** replaces the stored text for every member. The vault keeps no earlier version.

Goal: Change the council bylaws.

Start point: Sidebar → Governance → **Constitutional Bylaws**.

Steps:

1. Copy the current text to a file as a backup.
2. Select **Edit bylaws**. An empty vault starts from an outline.
3. Change the text in **Bylaws text**.
4. Check the **Preview** panel.
5. Check the clause ids in **Parliamentary engine feed**.
6. Select **Save bylaws**.

Expected result: A message shows *"The bylaws are saved."*

Common problems:

Problem	Cause	Fix
A section has no clause id.	The heading has no ## at the start.	Add ## and a space at the start of the line.
The text stops at the limit.	The text has 100,000 characters.	Shorten the text.

The SOP Center holds the same procedure: **Answers** → **SOP Center** → **Edit the council bylaws**.

---

5. Faith In Action

5.1 Create an event

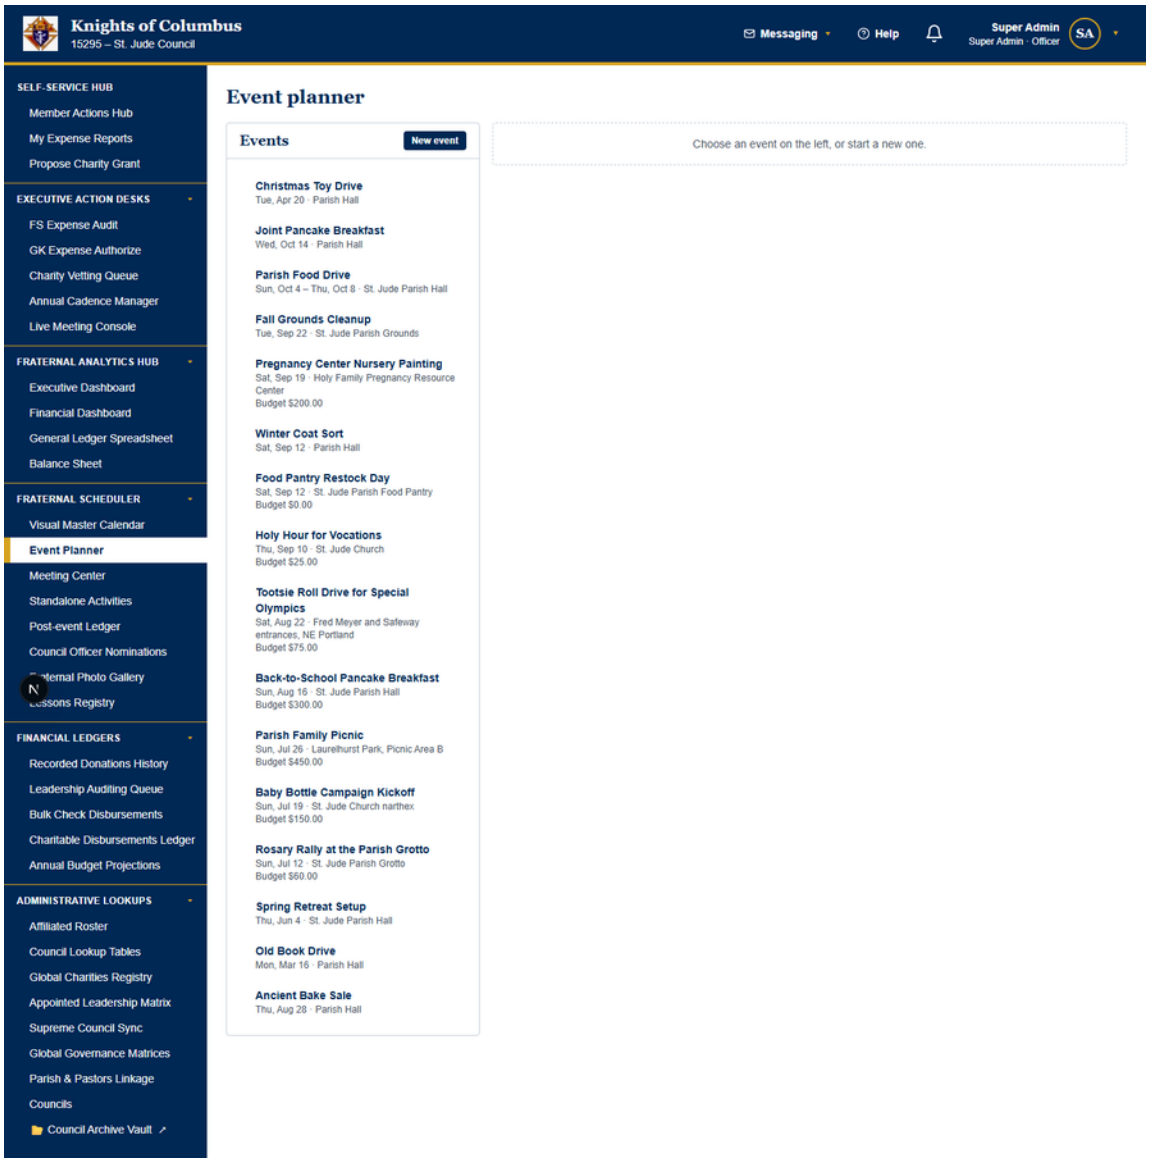

> **Prerequisite (who can do this):** You must have council Admin privileges for the council, or Super Admin privileges.

Goal: Create an event that volunteers can sign up for.

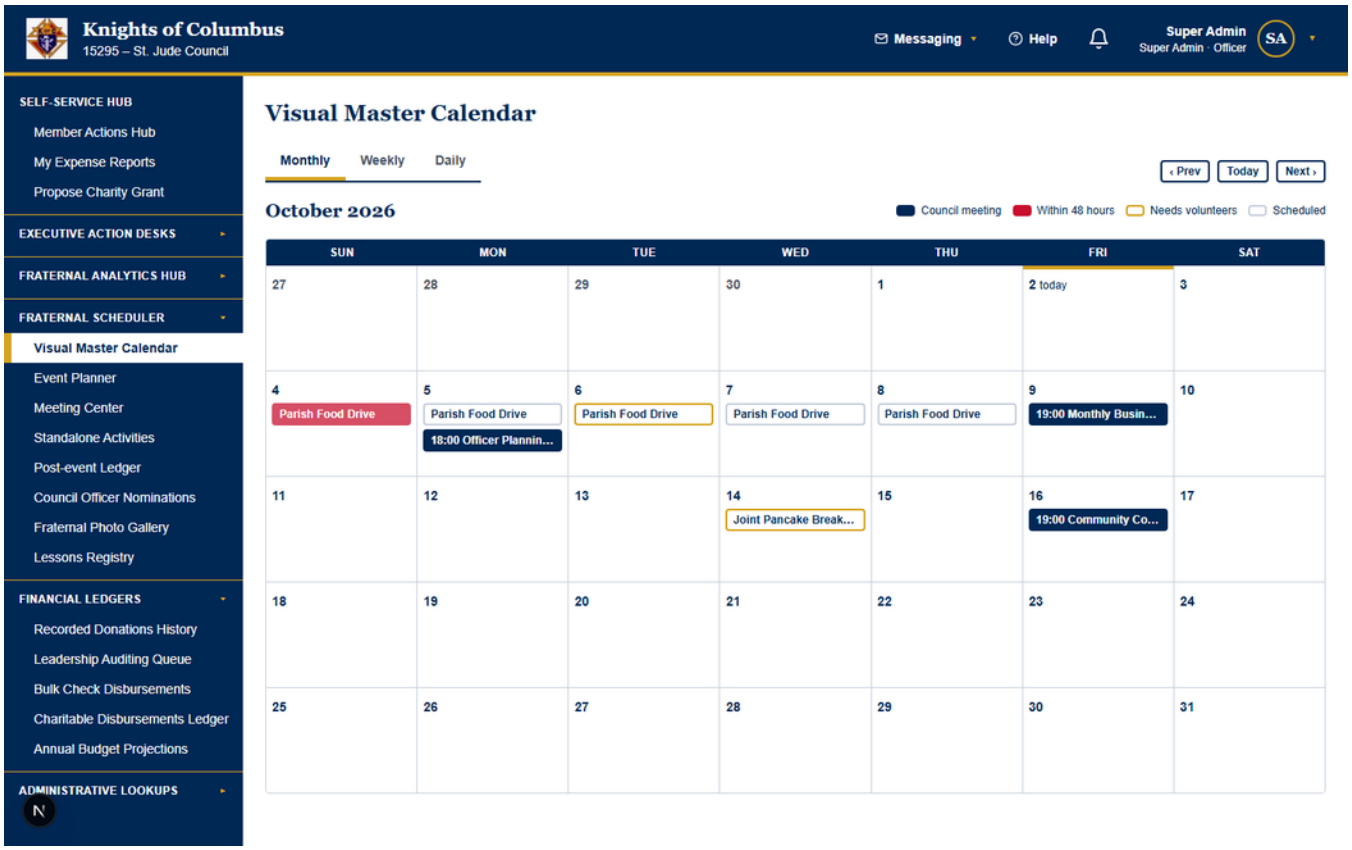

Start point: Sidebar → Faith In Action → **Event Planner**.

Steps:

1. Select **New event**.
2. Fill in **Event name**, **Description**, **Starts**, **Ends** and **Location**.
3. Choose the **Category** and the **Owner**.
4. Optional: enter **Budget ($)** and **Planned attendees**.
5. Tick each council in **Councils sharing this event**.
6. Tick **Is Annual** for an event that repeats each year (see 6.12).
7. Save.

Event Planner split screen (/events)

Council calendar (/calendar)

Expected result: A message shows *"Event created. Add its shifts below."*

Common problems:

Problem	Cause	Fix
The date is refused.	**Ends** is before **Starts**.	Correct the dates.
The save is refused.	No council is ticked.	Tick at least one council.

5.2 Add shifts to an event

> **Prerequisite (who can do this):** You must have council Admin privileges for the council, or Super Admin privileges.
>
> **Warning:** a shift with sign-ups or logged hours cannot be deleted.

Goal: Give the event the time slots that volunteers fill.

Start point: Sidebar → Faith In Action → **Event Planner** → the event → **Shifts** panel.

Steps:

1. Enter the **Shift name**.
2. Enter a **Date** inside the event dates.
3. Enter the start time and the end time.
4. Enter **Volunteers needed**.
5. Select **Add shift**.
6. Repeat steps 1 to 5 for each day and time slot.

![Image: Shift Grid]

Expected result: The shift shows in the grid with a status pill.

Pill	Meaning
Full (navy)	The shift has its volunteers. Extra members may join as honorary volunteers.
Needs *n* soon (red)	The shift starts within 48 hours and needs volunteers.
Needs *n* (gold)	Nobody has signed up, or the shift starts within 7 days.
Needs *n* (outline)	The shift has time to fill.

Common problems:

Problem	Cause	Fix
The shift date is refused.	The date is outside the event dates.	Change the shift date or the event dates.
Delete is refused.	Members signed up or logged hours.	Keep the shift.

5.3 Copy an event as a twin

> **Prerequisite (who can do this):** You must have council Admin privileges for the council, or Super Admin privileges.

Goal: Repeat a past event with the same shift pattern.

Start point: Sidebar → Faith In Action → **Event Planner** → the past event → **Copy as a twin**.

Steps:

1. Check **New event name**. Change the name if needed.
2. Set **New first day**.
3. Select **Copy event**.
4. Check every shift of the twin.

![Image: Copy As Twin]

Expected result: A message shows *"Copied. The twin is open on the right."*

Copied	Not copied
Details, councils, owner, budget, the **Is Annual** tag	Sign-ups and logged hours
Every shift, moved by the same number of days	Post-event results and lessons

Common problems:

Problem	Cause	Fix
A shift is on the wrong weekday.	The new first day is on a different weekday.	Pick a first day on the same weekday.

5.4 Keep the council activities

> **Prerequisite (who can do this):** You must have council Admin privileges for the council, or Super Admin privileges.

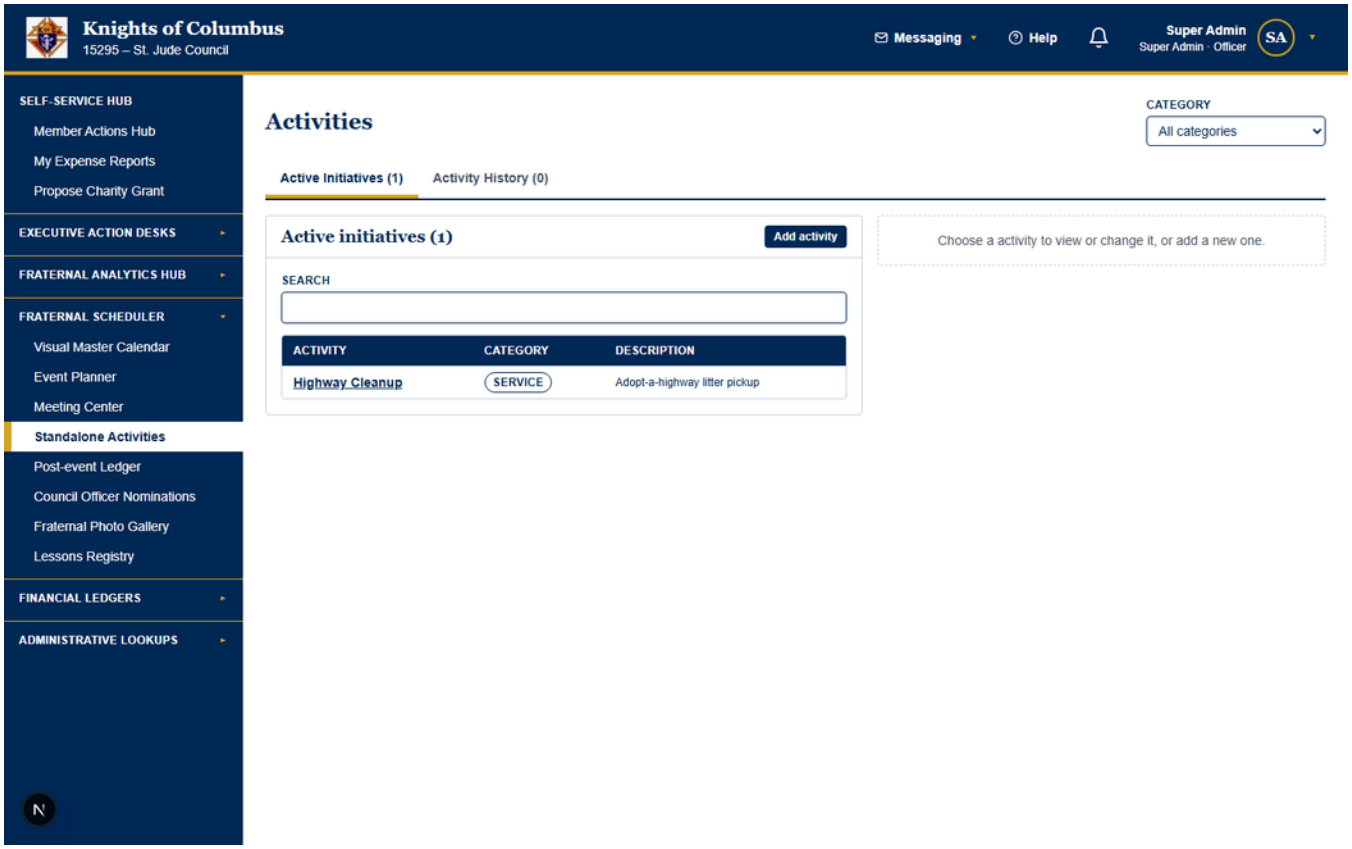

Goal: Keep the list of ongoing activities that members log time against.

Start point: Sidebar → Faith In Action → **Standalone Activities**.

Steps:

1. Add an activity with a name, a description and a category.

2. Save.

Activities catalog (/activities)

Expected result: The activity shows as a tile on the phone **Report** tab.

Common problems:

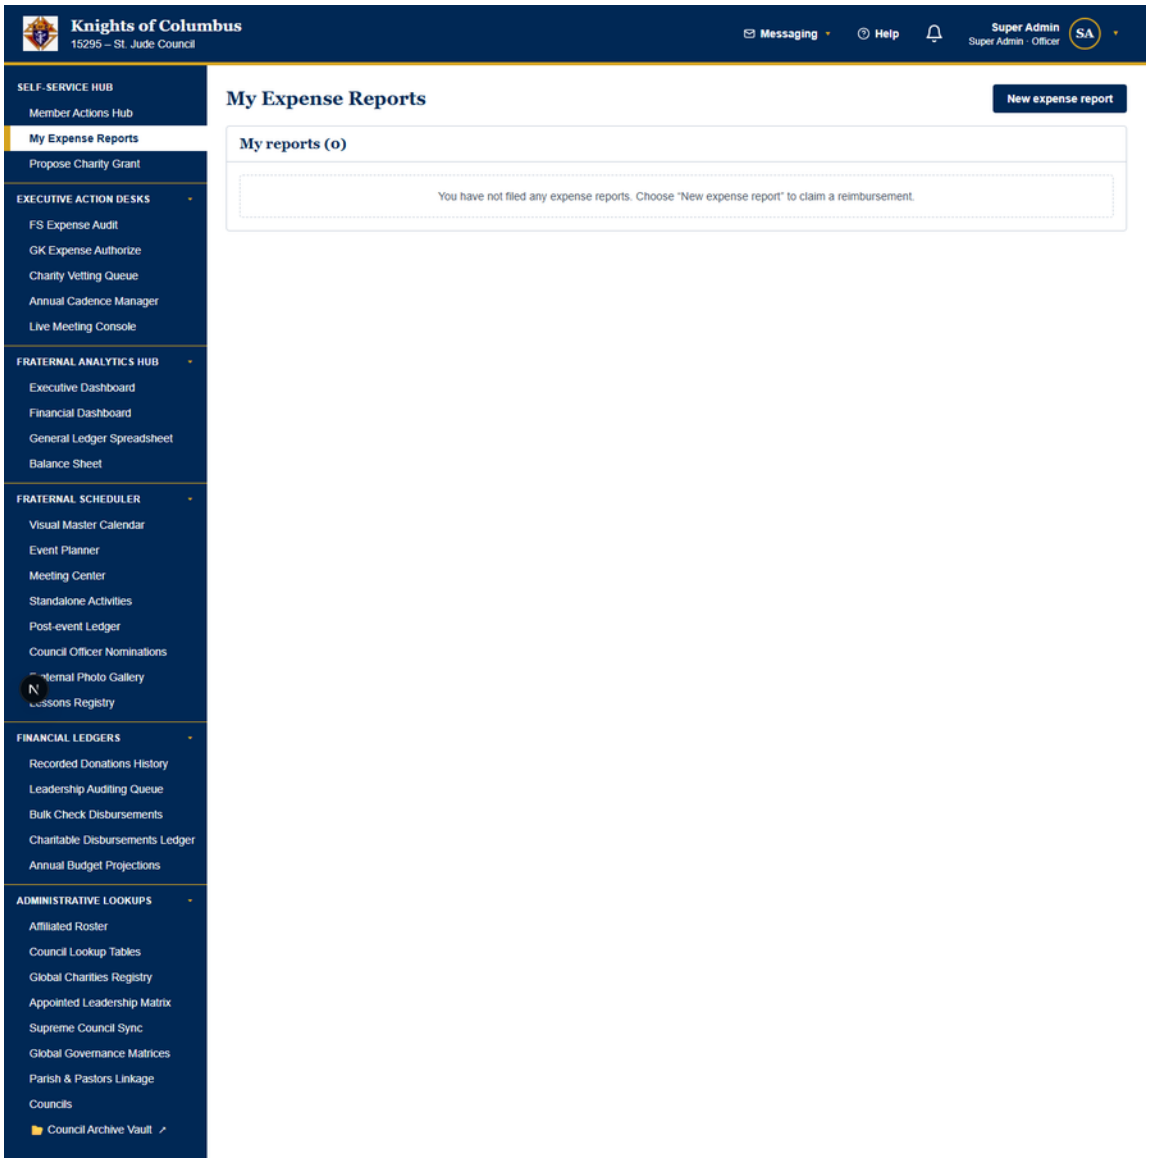

Problem	Cause	Fix
A sister council does not see the activity.	Activities belong to one council.	Add the activity in each council.

6. Finances

6.1 Concept: the two-signature expense path

Step	Who acts	Where	Status tag
1. File	The member	**My Expense Reports**	**Submitted**
2. Payment request	The Financial Secretary	**FS Expense Audit** → **Verify & Sign Expense**	**Order Issued**
3. Categorize	The Treasurer	**Treasurer Ledger Audit Desk** → **Categorize & Lock Expense**	**Order Issued**
4. Final release	The Grand Knight	**GK Expense Authorize** → **Final Release for Payment**	**Approved**
5. Pay	The FS or the Treasurer	**Bulk Check Payments Made**	**Reimbursed**
Return	Council leadership	**Leadership Auditing Queue** → **Reject & Return**	**Returned**

- A Super Admin may sign either line, but never both lines of the same report.
- Each signer chooses the budget line in **Assign Ledger Budget Line Item**. The report saves the line.
- The budget counts the report only against the saved line.
- The Treasurer chooses the budget line and the ledger account before the Grand Knight signs. **Categorize & Lock Expense** locks both choices.
- The officer who issued the order sees a **Collusion Guard** tag. That officer sees no **Final Release for Payment** button.
- Council Admins open both desks to follow the work. Only the seat holders or a Super Admin sign.
- A signer sees no button on a report the signer cannot sign. A tag tells who signs the report.
- A return clears both signatures and the saved budget line.

My Expense Reports (/expenses)

6.2 Issue a payment request

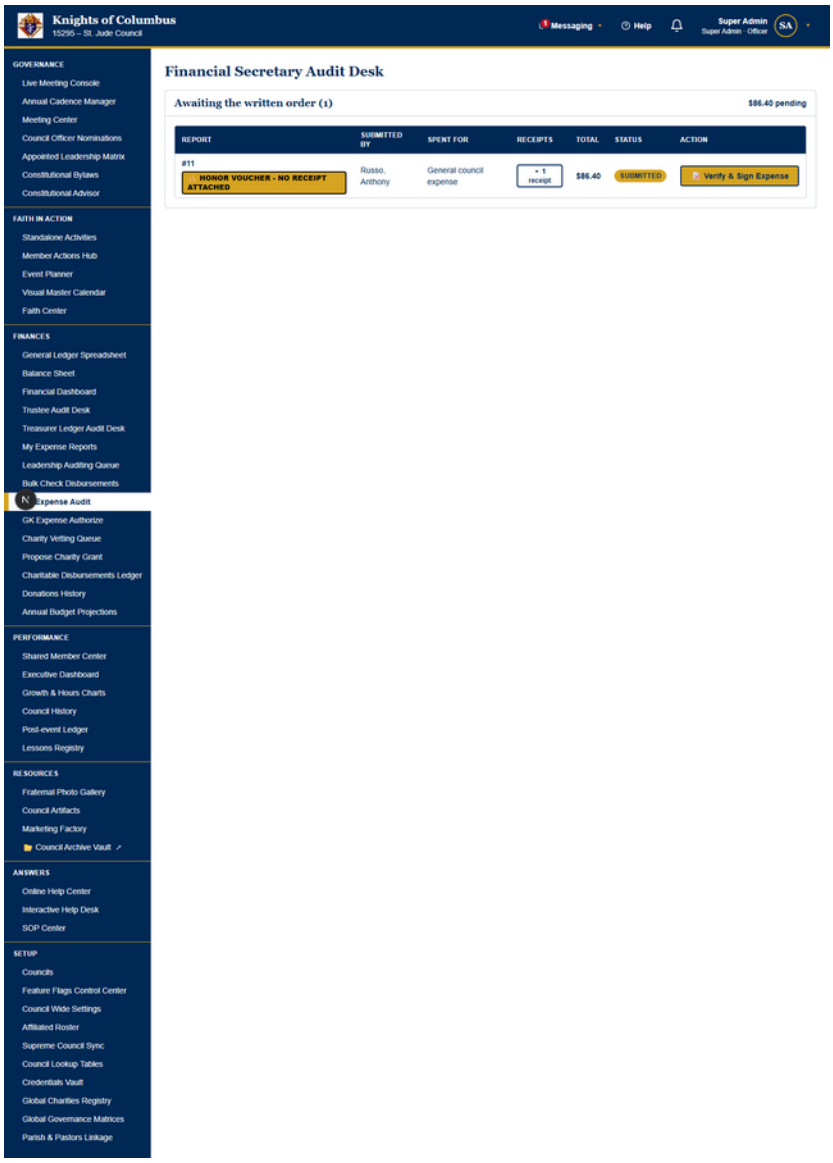

> **Prerequisite (who can do this):** You must be the council's Financial Secretary or a Super Admin. Council Admins read the desk only.
>
> **Warning:** the order is a signature. The report moves to the Grand Knight.

Goal: Approve a report's receipts as the first signature.

Start point: Sidebar → Finances → **FS Expense Audit**.

Steps:

1. Open the submitted report.
2. Check each receipt against its line.
3. Check the line in **Assign Ledger Budget Line Item**. A meeting report starts on the fraternal activities meetings line, for example **Monthly Council Meetings**.
4. Select **Verify & Sign Expense**.

FS Audit Desk (/expenses/audit)

Expected result: The report leaves the desk. The member sees **Order Issued**.

Common problems:

Problem	Cause	Fix
No **Verify & Sign Expense** button shows.	You submitted the report, or you do not hold the seat.	Another signer must act.
Verify & Sign Expense is not available.	No budget line is chosen.	Choose a line in **Assign Ledger Budget Line Item**.

6.3 Give the final release for payment

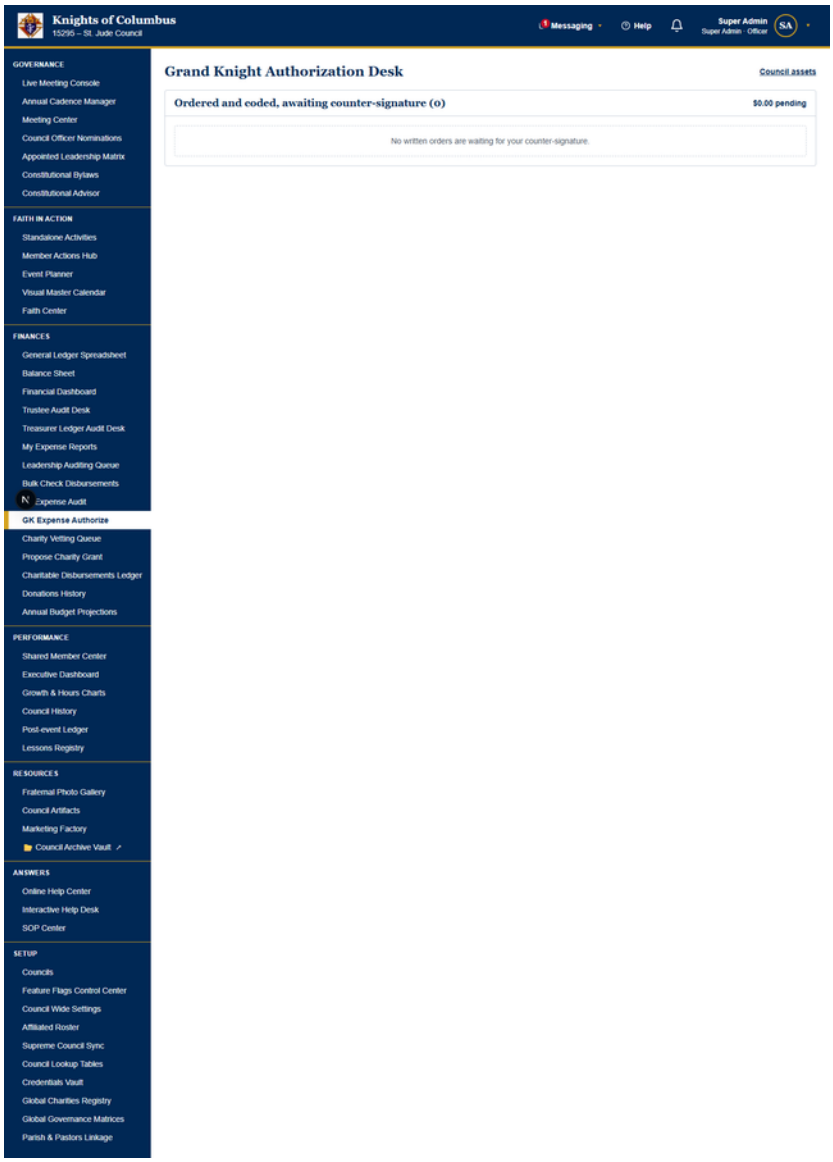

> **Prerequisite (who can do this):** You must be the council's Grand Knight or Deputy Grand Knight, or a Super Admin. Council Admins read the desk only.
>
> **Warning:** the final release approves the report for payment.

Goal: Give the second signature, which releases the report for payment.

Start point: Sidebar → Finances → **GK Expense Authorize**.

Steps:

1. Open the ordered report.
2. Check the order and the receipts.
3. Check the line in **Assign Ledger Budget Line Item**. The line starts on the Treasurer's choice.
4. Select ✍ **Final Release for Payment**.

GK Authorization Desk (/expenses/authorize)

Expected result: The member sees **Approved**. The report shows in **Bulk Check Payments Made**.

Common problems:

Problem	Cause	Fix
🔒 **Collusion Guard** shows.	You issued the payment request.	Another signer must give the final release.

6.4 Return a report to the member

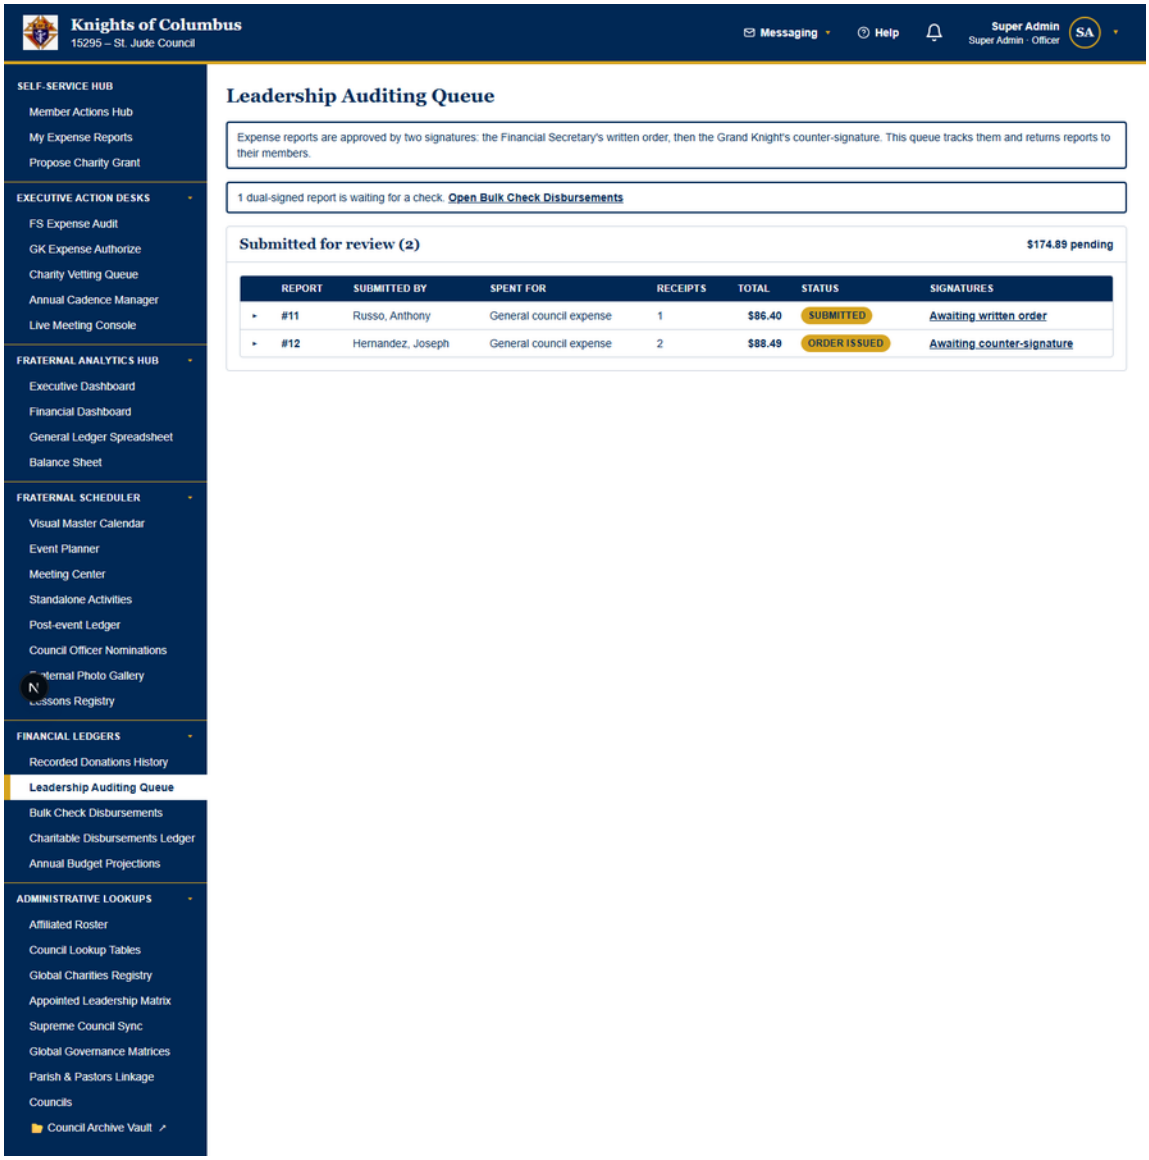

> **Prerequisite (who can do this):** You must be a council Admin, the Financial Secretary, the Treasurer or a Super Admin.
>
> **Warning:** a return clears both signatures.

Goal: Send a report back for correction.

Start point: Active Desks row → **Financial Secretary Desk** → **Open the auditing queue**. The queue is not in the sidebar.

Steps:

1. Find the report.
2. Select **Reject & Return**.
3. Write the reason. The member reads the reason.
4. Confirm.

Leadership Auditing Queue (/expenses/queue)

Expected result: The member sees a red **Returned** tag with the reason.

Common problems:

Problem	Cause	Fix
The reason is too vague.	The member cannot fix the report.	Name the receipt and the change.

6.5 Pay approved reports by check

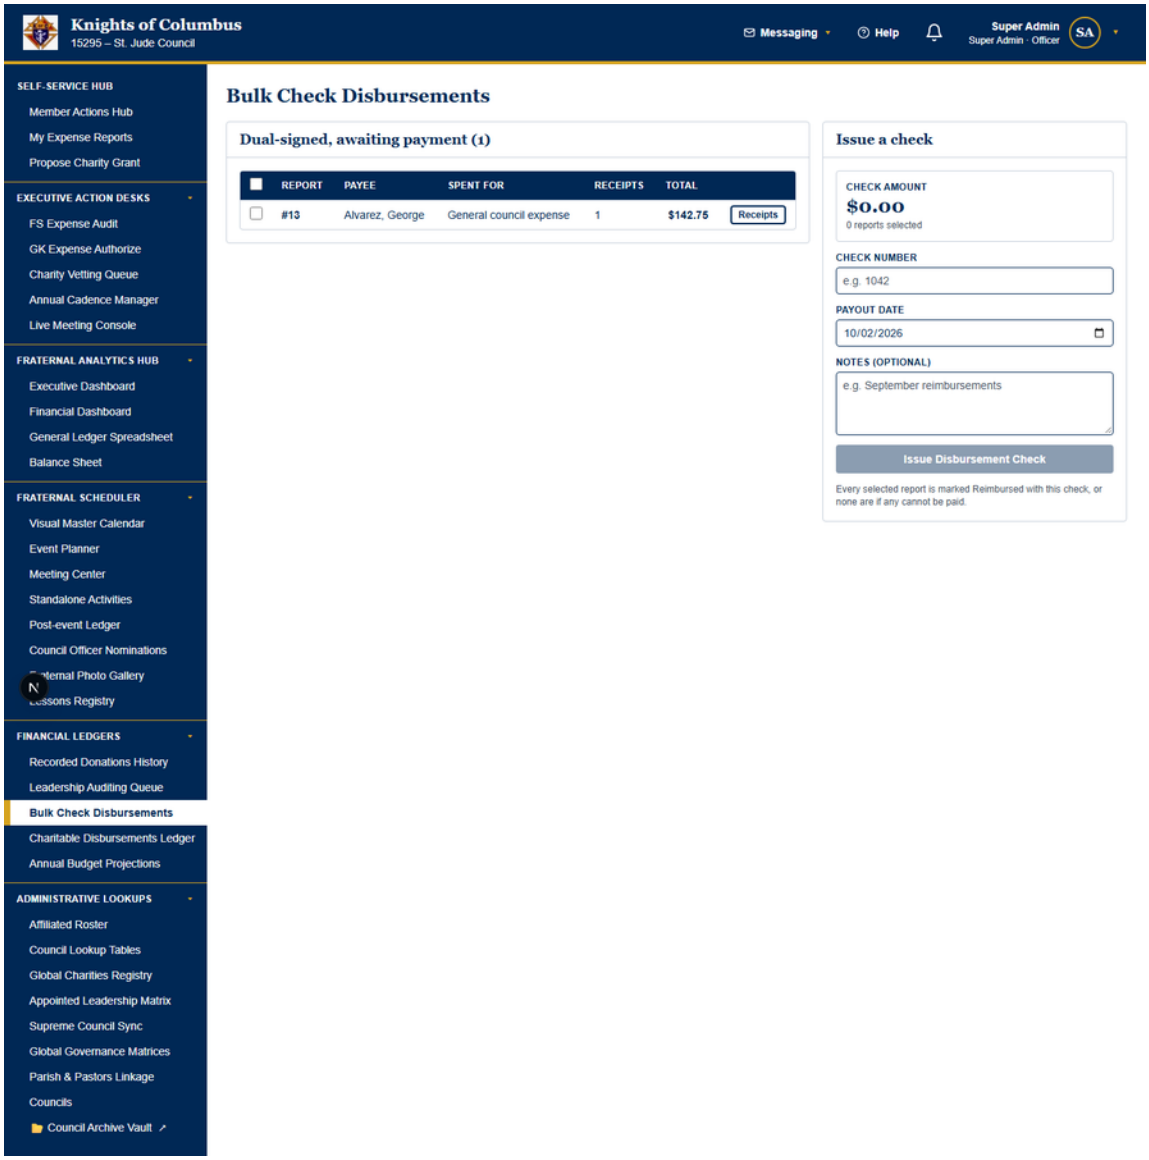

> **Prerequisite (who can do this):** You must be the council's Financial Secretary or Treasurer, or a Super Admin. An Admin without a finance role does not see the page.
>
> **Warning:** a recorded check is permanent money out of the council's books.

Goal: Record the checks for dual-signed reports.

Start point: Sidebar → Finances → **Bulk Check Payments Made**.

Steps:

1. Tick the reports to pay. The page lists only reports with both signatures.
2. Enter the check number and the payout date for each report.
3. Save.

Bulk Check Payments Made (/expenses/disbursements)

Expected result: The member sees **Reimbursed** with the check number.

Common problems:

Problem	Cause	Fix
A report is missing.	The report lacks a signature.	Follow the report in the auditing queue (section 6.4).

6.6 Concept: the general ledger

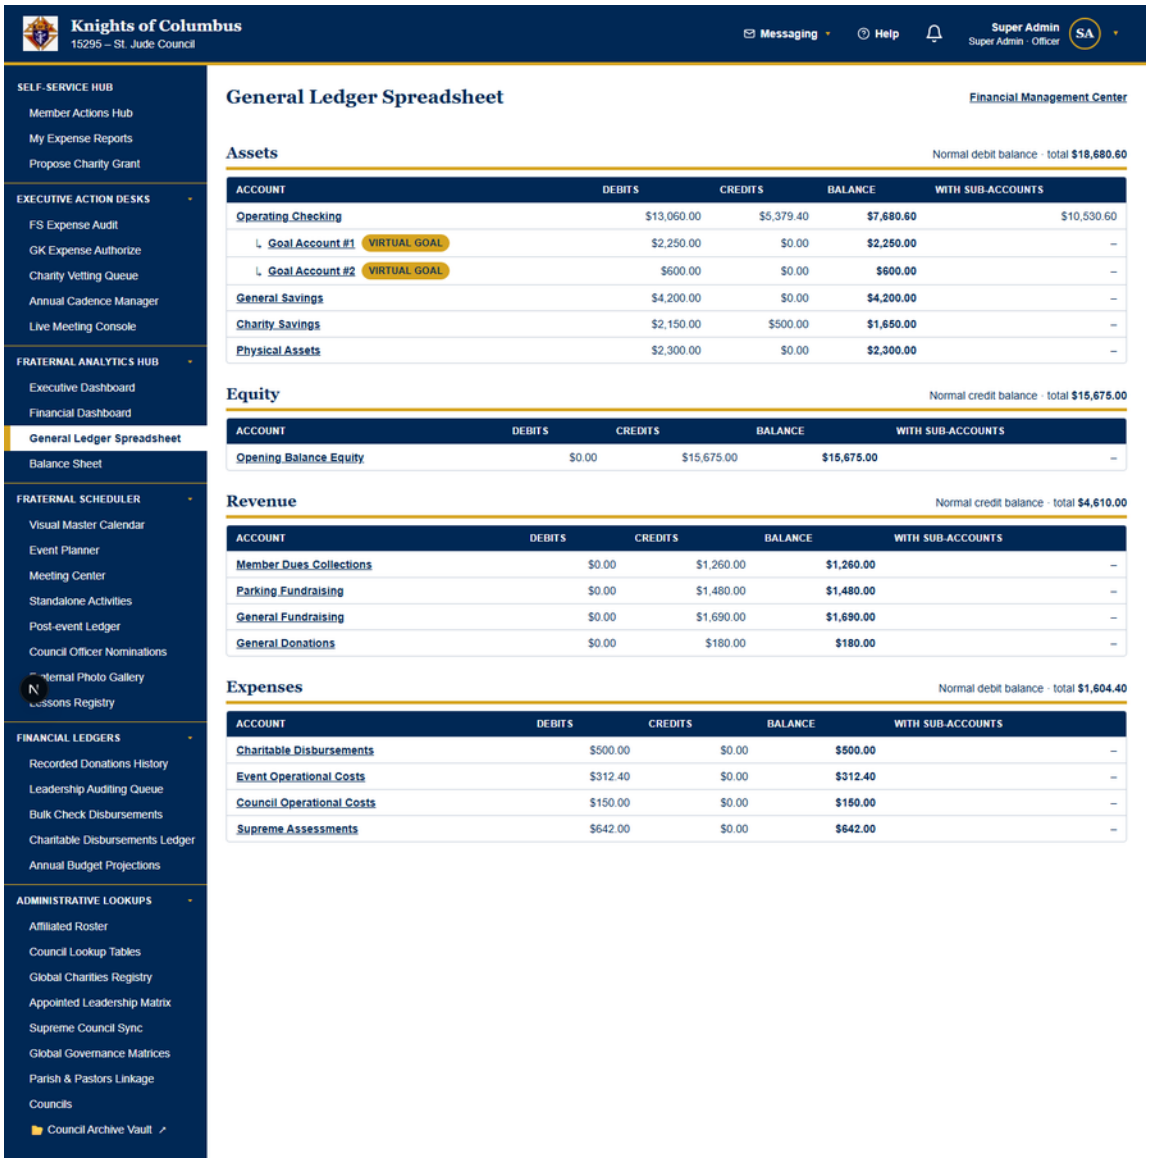

The general ledger is a double-entry ledger. Every transaction has debit lines and credit lines that balance. A shared transaction id groups the lines.

Page	Shows
General Ledger Spreadsheet	The chart of accounts with every posting
Balance Sheet	Assets against liabilities and equity
Financial Dashboard	Cash flow liquidity, the balance sheet summary, **Quick actions** and the **Electronic bank statement audit**

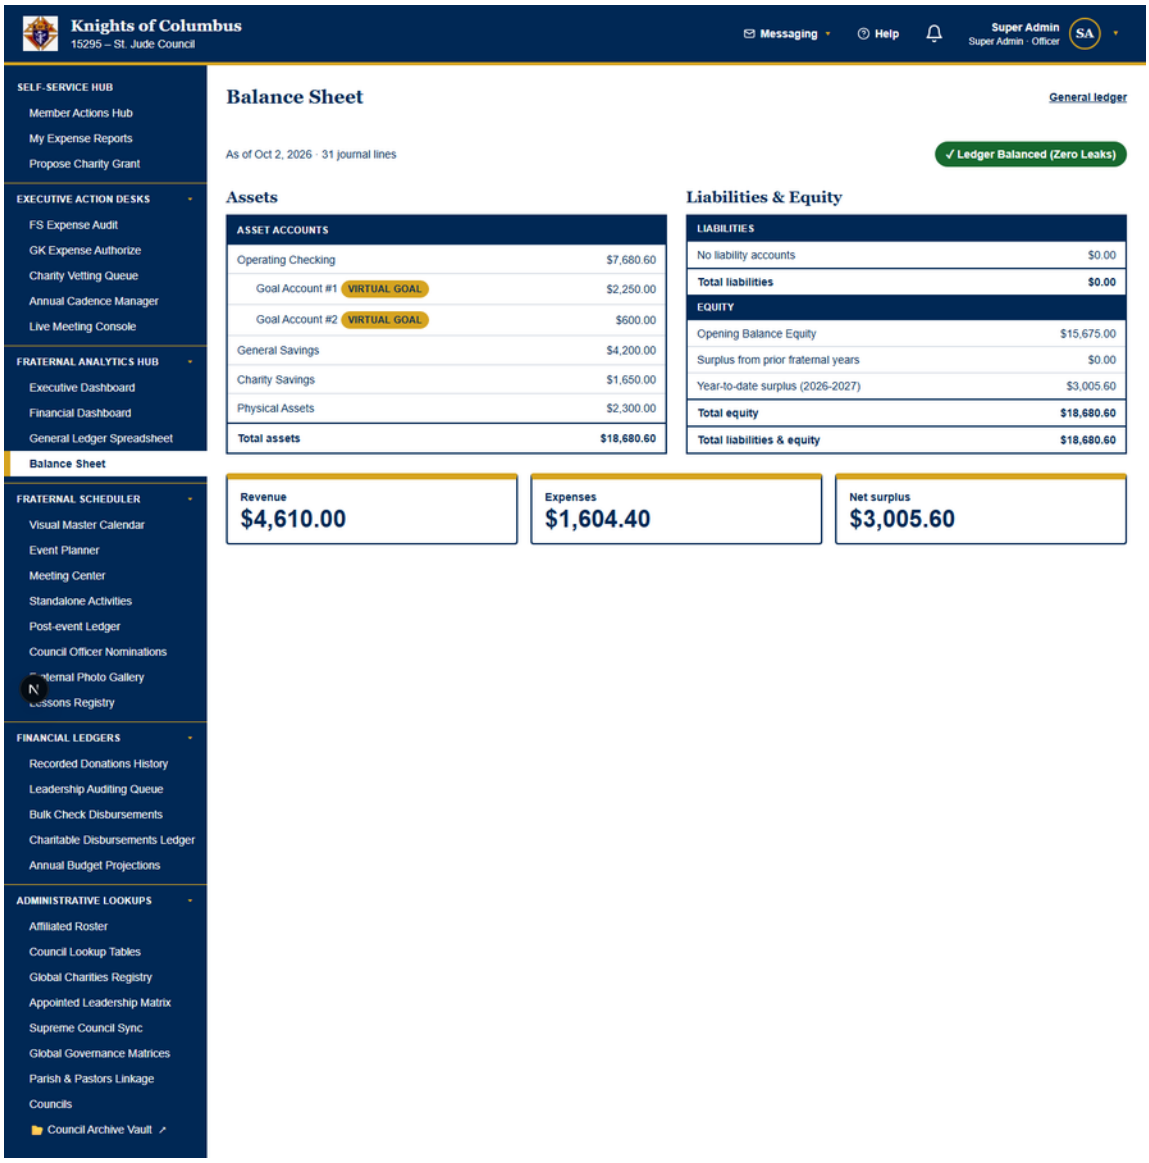

Seated officers and Admins read the three pages. Only the FS, the Treasurer and Super Admins post, transfer or upload bank statements.

Financial Dashboard (/finance/dashboard)

General Ledger Spreadsheet (/finance/ledger)

Balance Sheet (/finance/balance-sheet)

6.7 Post to the ledger or reconcile a bank statement

> **Prerequisite (who can do this):** You must be the council's Financial Secretary or Treasurer, or a Super Admin.
>
> **Warning:** a posting changes the council's books for every reader.

Goal: Record a transaction, move funds or match a bank statement.

Start point: Sidebar → Finances → **Financial Dashboard** → **Quick actions**.

Steps:

1. To post: choose the debit account and the credit account. Enter the amount and the description. Save.
2. To transfer: choose two asset accounts. Enter the amount. Save.
3. To reconcile: open **Electronic bank statement audit**. Upload the bank CSV file.
4. Read the matched rows and the unmatched rows.

Expected result: The dashboard shows ✓ **Ledger Balanced (Zero Leaks)** when debits equal credits.

Common problems:

Problem	Cause	Fix
The transfer is refused.	The amount exceeds the source account balance.	Lower the amount.
The CSV file is refused.	The file has no Date column, or no Amount or Withdrawal/Deposit columns.	Export the statement again with a header row.
A bank row stays unmatched.	No posting has the same check number, or the same amount within 5 days.	Post the missing transaction. Upload again.

6.8 Vet a charity request

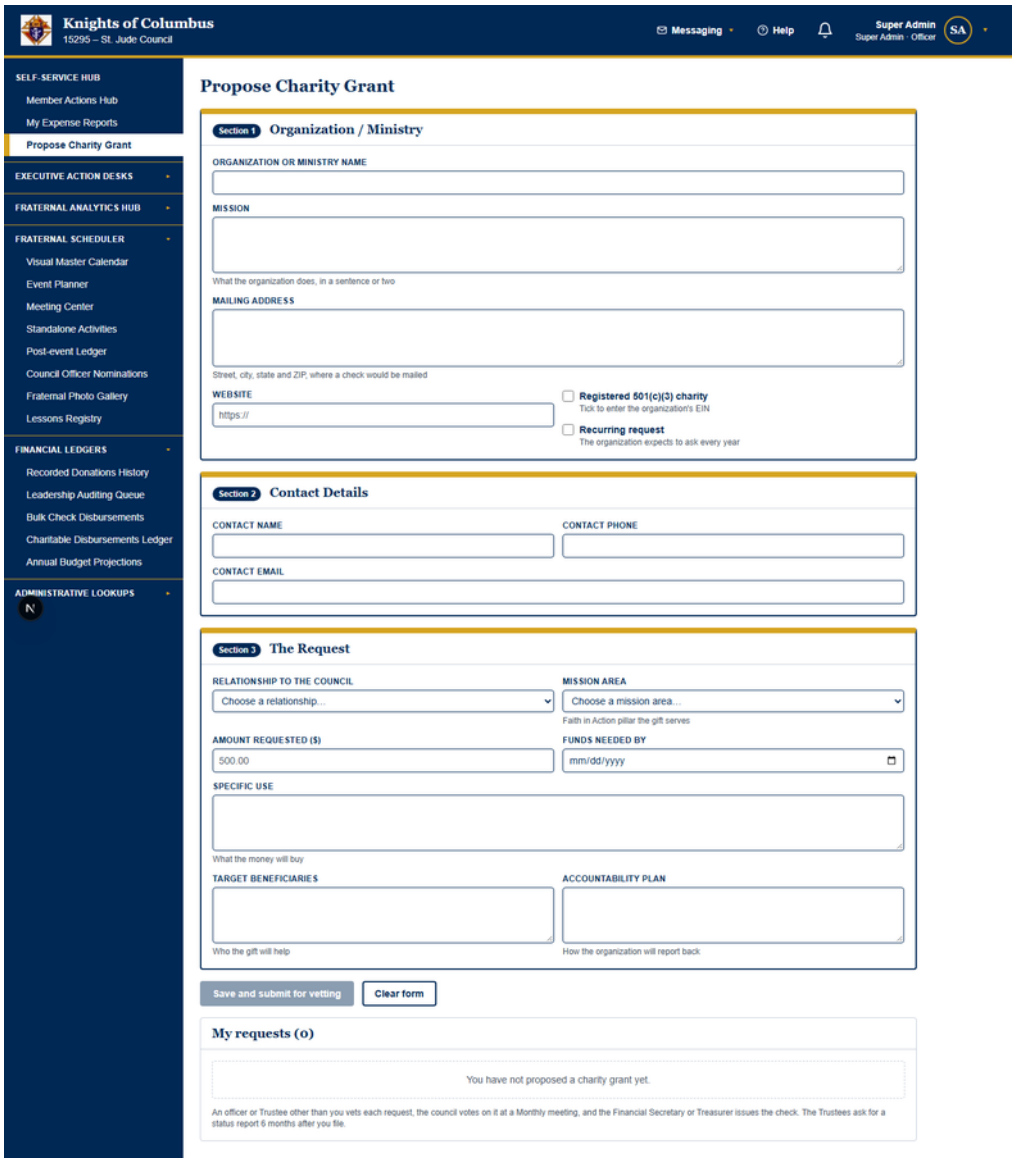

> **Prerequisite (who can do this):** You must be a seated officer, a Trustee or an Admin of the council, or a Super Admin. The Knight Shepherd never vets the Shepherd's own request.
>
> **Warning:** a decline stops the request.

Goal: Review a member's charity request and move the request forward.

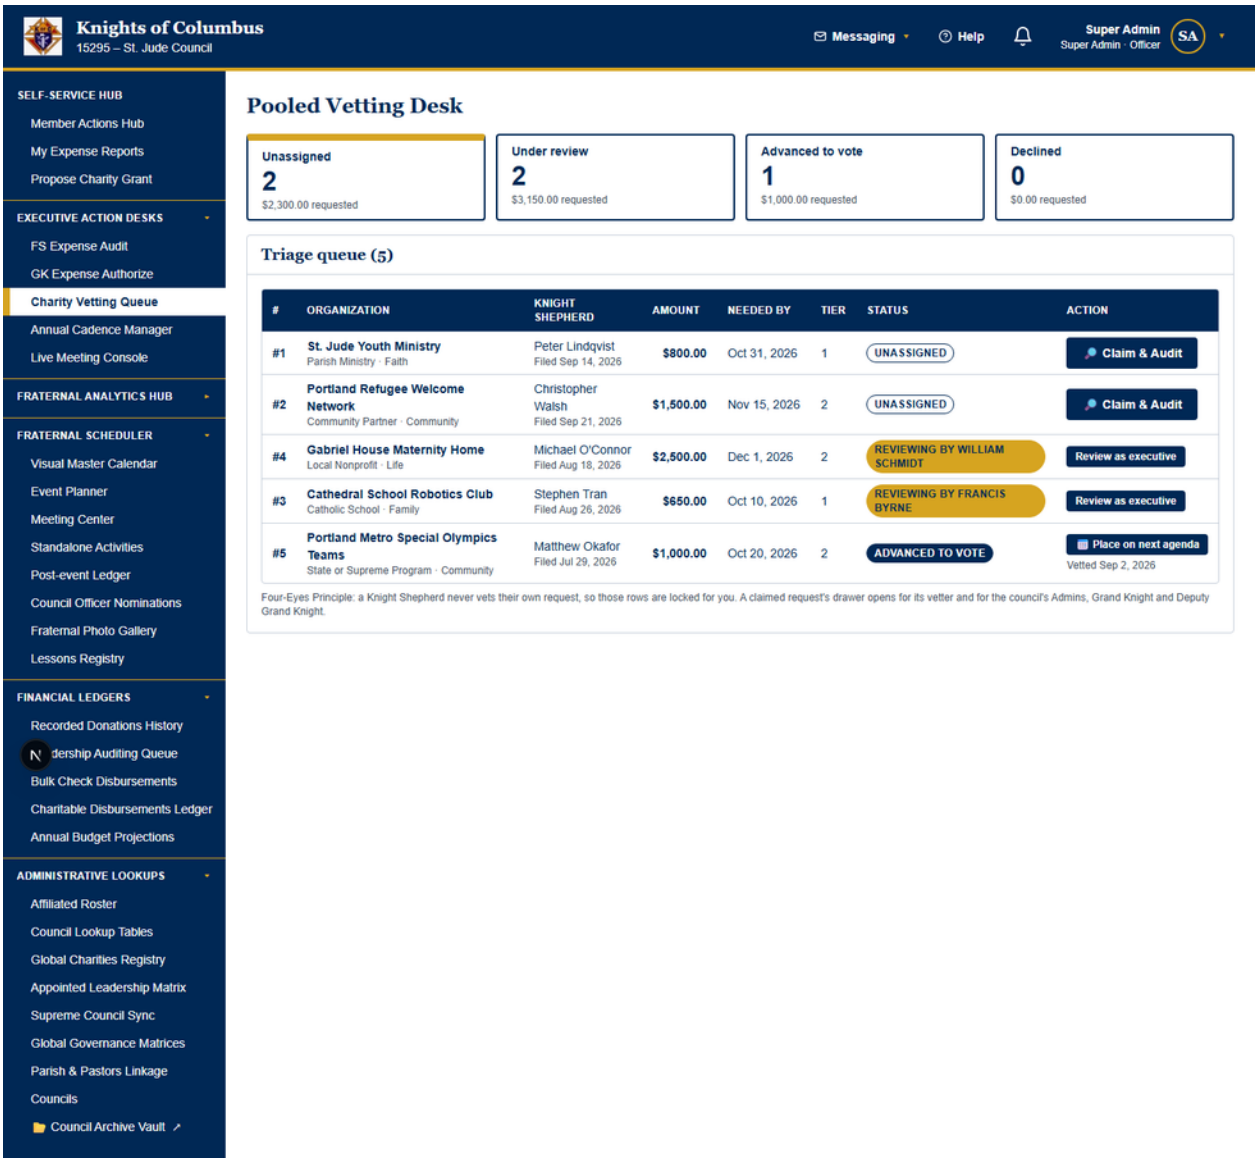

Start point: Sidebar → Finances → **Charity Vetting Queue**.

Steps:

1. Claim the request.
2. Check the organization, the 501(c)(3) status and the amount.
3. Advance the request, or decline the request.
4. For an advanced request, select **Place on next agenda**.

Propose Charity Grant (/charities/propose)

Charity Vetting Queue (/charities/vetting)

Expected result: The request goes on a Monthly meeting at least 10 days away. The council votes in the **Live Meeting Console**.

Common problems:

Problem	Cause	Fix
Place on next agenda is refused.	No Monthly meeting is at least 10 days away.	Schedule the meeting.
The desk is missing.	The council switched off **Charity proposals**.	Ask a Super Admin.

6.9 Pay an approved charity grant

> **Prerequisite (who can do this):** You must be the council's Financial Secretary or Treasurer, or a Super Admin.
>
> **Warning:** the check is permanent money out of the council's books.

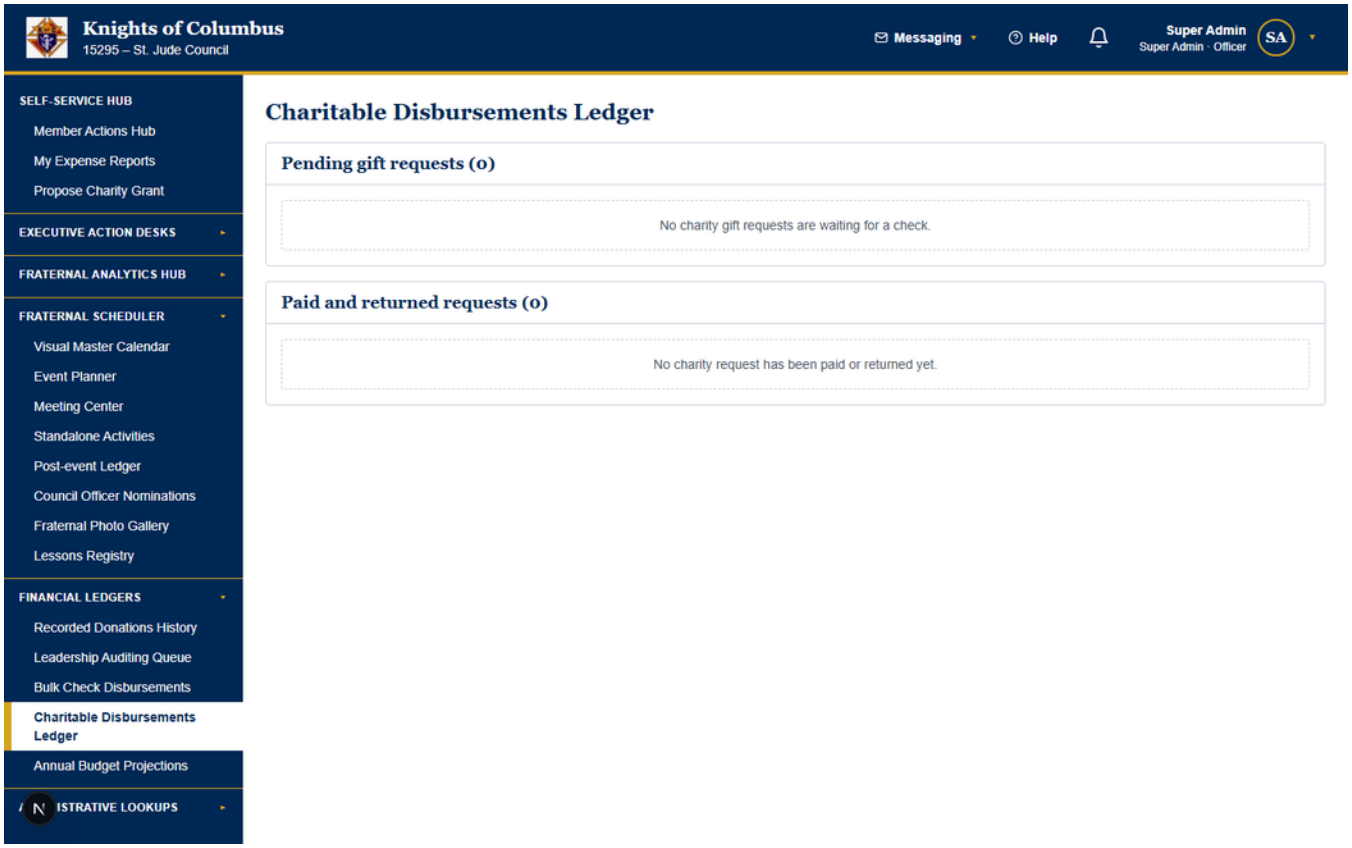

Goal: Pay a grant that the council approved.

Start point: Sidebar → Finances → **Charity Payments Made Ledger**.

Steps:

1. Find the request in **Approved requests awaiting payment**.
2. Click **Pay approved request**.
3. Type the **Check number**. Check the **Payout date**.
4. Choose the **Charity type (if not registered yet)**. The portal uses it only when the organization is not in the Global Charities Registry.
5. Optional: type **Notes (optional)**.
6. Click **Issue check for** the approved amount.

The check is always for the amount the council approved. The Knight Shepherd of the request cannot pay it.

Charity funding queue (/charities/queue)

Expected result: The request leaves **Approved requests awaiting payment**. The check is listed against the charity, the charity is added to the registry if it was not there, the request's target budget line is charged, and the Shepherd's **My requests** shows the request as paid.

Common problems:

Problem	Cause	Fix
The request is missing.	The council has not passed the motion.	Check the motion in the meeting.
The check is refused with "already recorded check".	The council used that check number before.	Type the next unused check number.
The check is refused with "choose its charity type".	The organization is not in the registry yet.	Choose the **Charity type (if not registered yet)**.

6.10 Record or correct a donation

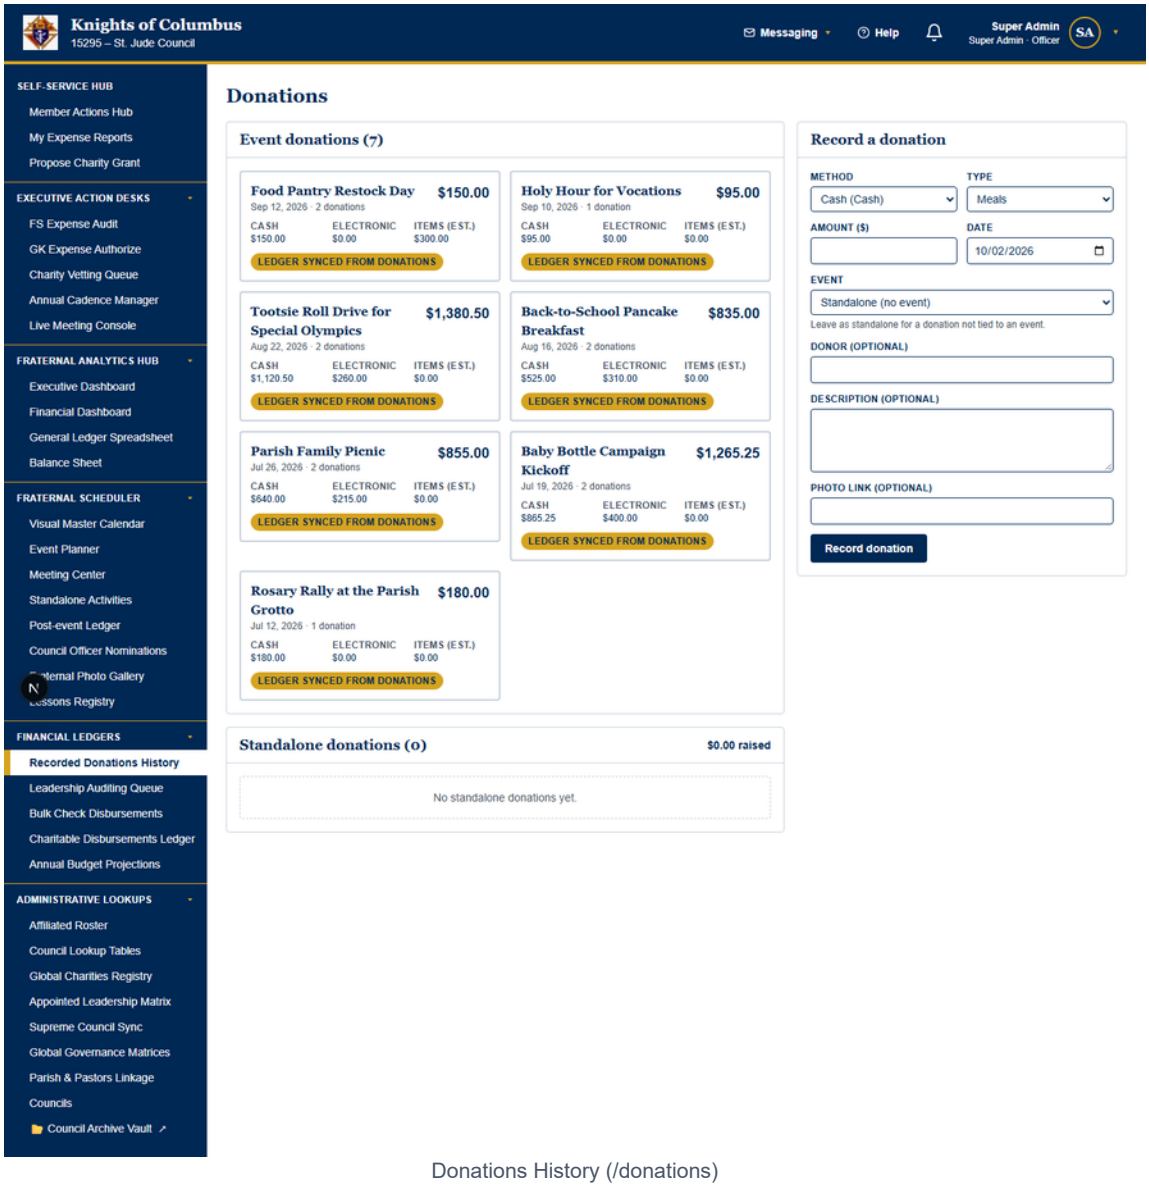

> **Prerequisite (who can do this):** You must be a council Admin, the Treasurer, the Financial Secretary or a Super Admin. The recorder and the event owner may also correct a donation.

Goal: Keep the council's donation records complete.

Start point: Sidebar → Finances → **Donations History**.

Steps:

1. Choose the **Method**, the **Type** and the **Amount**. For items, enter **Estimated value ($)**.
2. Choose the **Date** and the **Event**, or *Standalone (no event)*.
3. Optional: add the **Donor**, a **Description** and a **Photo link**. Items need a description.
4. Save.

Donations History (/donations)

Expected result: The donation shows under **Event donations** or **Standalone donations**. An event card with cash or electronic donations shows ✓ **Automatically Logged to Treasury Ledger**.

To see the donations of one event, select its card. The card gets a thick gold border. The page scrolls down to the list of donations for that event.

Common problems:

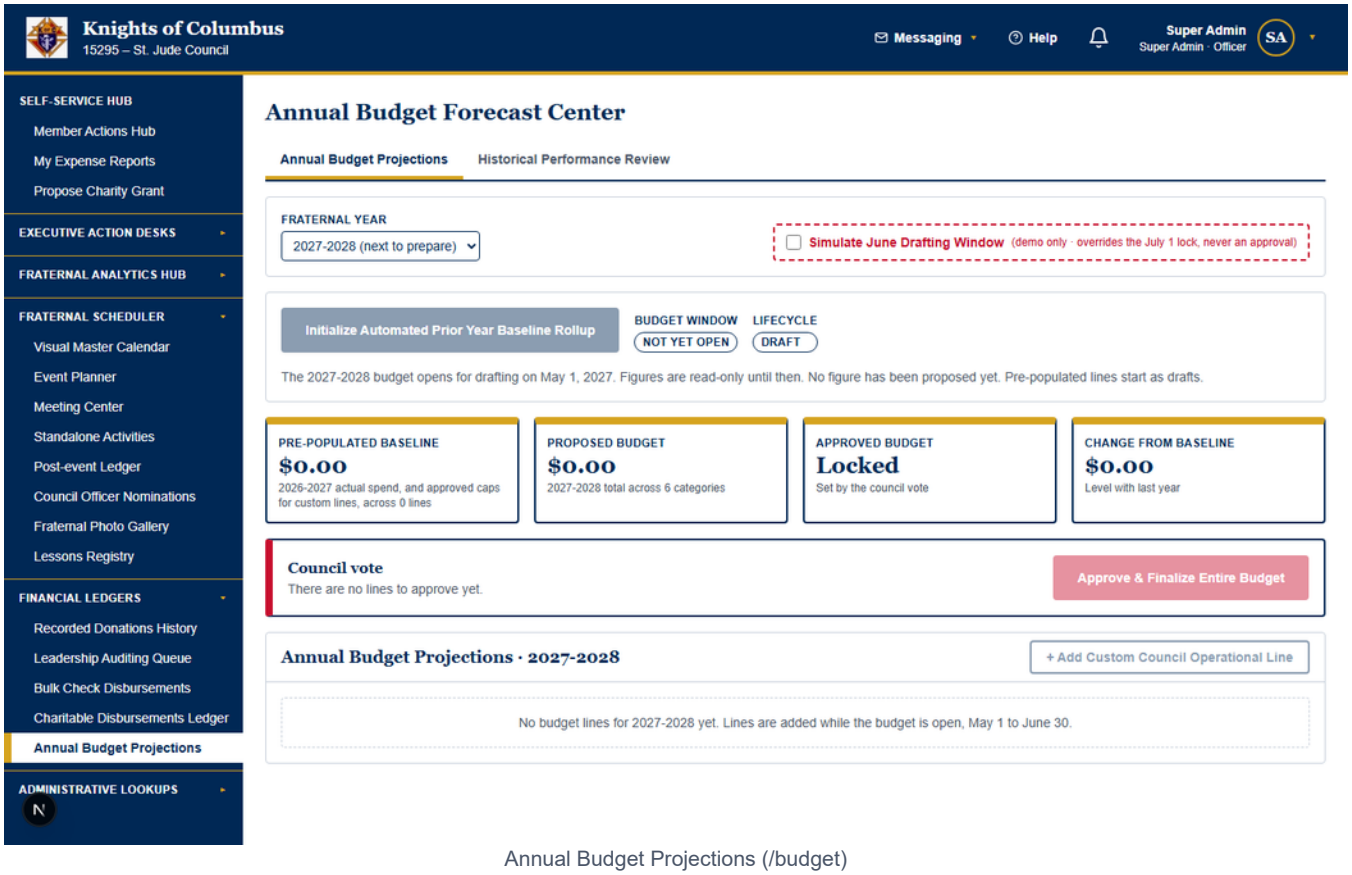

Problem	Cause	Fix
The date is refused.	An event donation is dated before the event start.	Use a date on or after the event start.
The council or the recorder cannot change.	The platform fixes both fields.	Delete the donation. Record the donation again.

6.11 Concept: the annual budget

The budget covers one fraternal year, July 1 to June 30.

Badge	When	What editors can do
Not Yet Open	Before May 1	Read only
Draft	May 1 (00:00) to June 30 (midnight)	Run the rollup, add lines, edit proposed amounts
Finalized	From July 1	Read only
Approved	After the council vote	Frozen for everyone

- Every member reads the budget. Non-editors see a **Transparency view** marked **Read only**.
- Editors are the council Admins, the Treasurer, the FS, the **Designated Budget Director** and Super Admins.
- Only a Super Admin override changes a budget outside the window. No override reopens an approved budget.

Annual Budget Projections (/budget)

6.12 Prepare the budget with the rollup

> **Prerequisite (who can do this):** You must be a council Admin, the Treasurer, the Financial Secretary, the Designated Budget Director or a Super Admin. The year must be in **Draft**.

Goal: Fill the next year's budget from last year's actual spend.

Start point: Sidebar → Finances → **Annual Budget Projections**.

Steps:

1. Choose the **Fraternal year**.
2. Select **Initialize Automated Prior Year Baseline Rollup**.
3. Type the proposed amount and **Notes** on each line. Each change saves when you leave the box.
4. Pick the **Category** of each line.
5. For a running cost, select **+ Add Custom Council Operational Line**. Enter the **Line item name** and the **Proposed budget amount**.

Expected result: Each line shows a **Pre-Populated Baseline**. The rollup reads three sources.

Source	Baseline
Each event tagged **Is Annual**	Last year's approved expenses linked to the event
Each charity tagged **Is Annual**	Last year's charity checks
Last year's custom lines	Last year's approved amount

A new rollup refreshes the baselines only. The rollup never changes proposed amounts, approved amounts or notes.

Common problems:

Problem	Cause	Fix
"The … budget opens for drafting on May 1"	The window has not opened.	Wait for May 1.
An annual event is missing.	The event has no **Is Annual** tag, or the event started outside last year.	Tick **Is Annual**. Run the rollup again.
"…already has a line named…"	The custom line exists.	Edit the existing line.

6.13 Approve and finalize the budget

> **Prerequisite (who can do this):** You must be a council Admin, the Treasurer, the Financial Secretary or a Super Admin. The Designated Budget Director cannot approve.
>
> **Warning:** approval freezes the whole year for everyone. Nothing reopens an approved budget.

Goal: Record the council's vote on the budget.

Start point: Sidebar → Finances → **Annual Budget Projections**.

Steps:

1. Check every proposed amount.
2. Select **Approve & Finalize Entire Budget**.
3. Select **Yes, approve and finalize**. You cannot undo this step.

Expected result: Each proposed amount becomes the approved amount. The year shows **Approved**. The dashboard gauges use the approved amounts as caps.

Common problems:

Problem	Cause	Fix
The button is greyed out.	The year has no lines, or the year opens after May 1.	Run the rollup first.

6.14 Concept: receipts, split tickets and Honor Vouchers

A report holds one or more receipts. Each receipt has a merchant, a gross total and a receipt file. Each line item names the receipt it comes from.

Item	What it means	What the signers see
Receipt	One ticket from one merchant, with its full total and its file.	A **Receipts** table with **R1**, **R2** and so on.
Split ticket	One receipt with council items and personal items. The member lists all items and ticks **Personal** on the member's own items.	Personal lines are struck through. The total reads **Council reimburses**.
Honor Voucher	The member has no receipt. The member ticks ⚠ **I have no receipt (Honor Voucher)** and writes the reason.	⚠ **HONOR VOUCHER - NO RECEIPT ATTACHED** with the member's reason.

- The council pays only the lines without **Personal**. Checks, budgets, asset costs and the balance sheet leave personal lines out.
- On a submitted report, the lines of each receipt must add up to the receipt's gross total.
- On a submitted report, each receipt needs its file. An Honor Voucher lifts this rule. The reason is mandatory.
- The ⚠ **HONOR VOUCHER - NO RECEIPT ATTACHED** badge also shows on a report that has no receipt file at all.
- When receipt reading is connected (10.8), 🔍 **Read receipt** fills in the merchant, the total and the lines from the attached photo. The member checks every figure before saving.

> **Warning:** check the reason on every Honor Voucher before you sign. The badge shows on the FS, Treasurer and GK desks and in the **Leadership Auditing Queue**.

7. Performance

7.1 Read the executive dashboard

> **Prerequisite (who can do this):** You must be a seated officer or an Admin of the council, or a Super Admin. Only Admins and Super Admins see the audits.

Goal: Review one month of council activity.

Start point: Sidebar → Performance → **Executive Dashboard**. The **Executive Summary** page opens.

Steps:

1. Choose the **Month** and the **Year**.
2. Read the four scorecard tiles.
3. Read the **Budget tracking** gauges.
4. Admins: read **Executive audits** for no-shows and shifts that need hours.

Executive Dashboard Summaries (/executive-dashboard)

![Image: Executive Audits]

Expected result: The tiles show four measures.

Tile	Measures
Total labor hours	Shift hours plus activity hours in the month
Unique Knights participating	Members who logged any time in the month
Net balance	Funds raised minus the month's approved expenses and charity checks
Community outreach	Actual attendees at the month's events

A budget gauge turns gold at 85% of the cap. The gauge turns red past 100%.

Common problems:

Problem	Cause	Fix
The hours look low.	Members log hours up to 90 days later, by default (section 16.3).	Check the month again later.
The gauges show no caps.	The budget is not approved.	Approve the budget (6.13).

7.2 Read the growth and hours charts

> **Prerequisite (who can do this):** You must be a seated officer or an Admin of the council, or a Super Admin.

Goal: See membership growth and labor hours over 12 months.

Start point: Sidebar → Performance → **Growth & Hours Charts**.

Steps:

1. Read the new-members chart. The chart counts active members by join month.
2. Read the labor-hours chart.

Expected result: Each chart shows one bar per month.

Common problems:

Problem	Cause	Fix
A new member is missing.	The member has no join date.	Run the Supreme roster sync (10.3).

7.3 Record an event's results

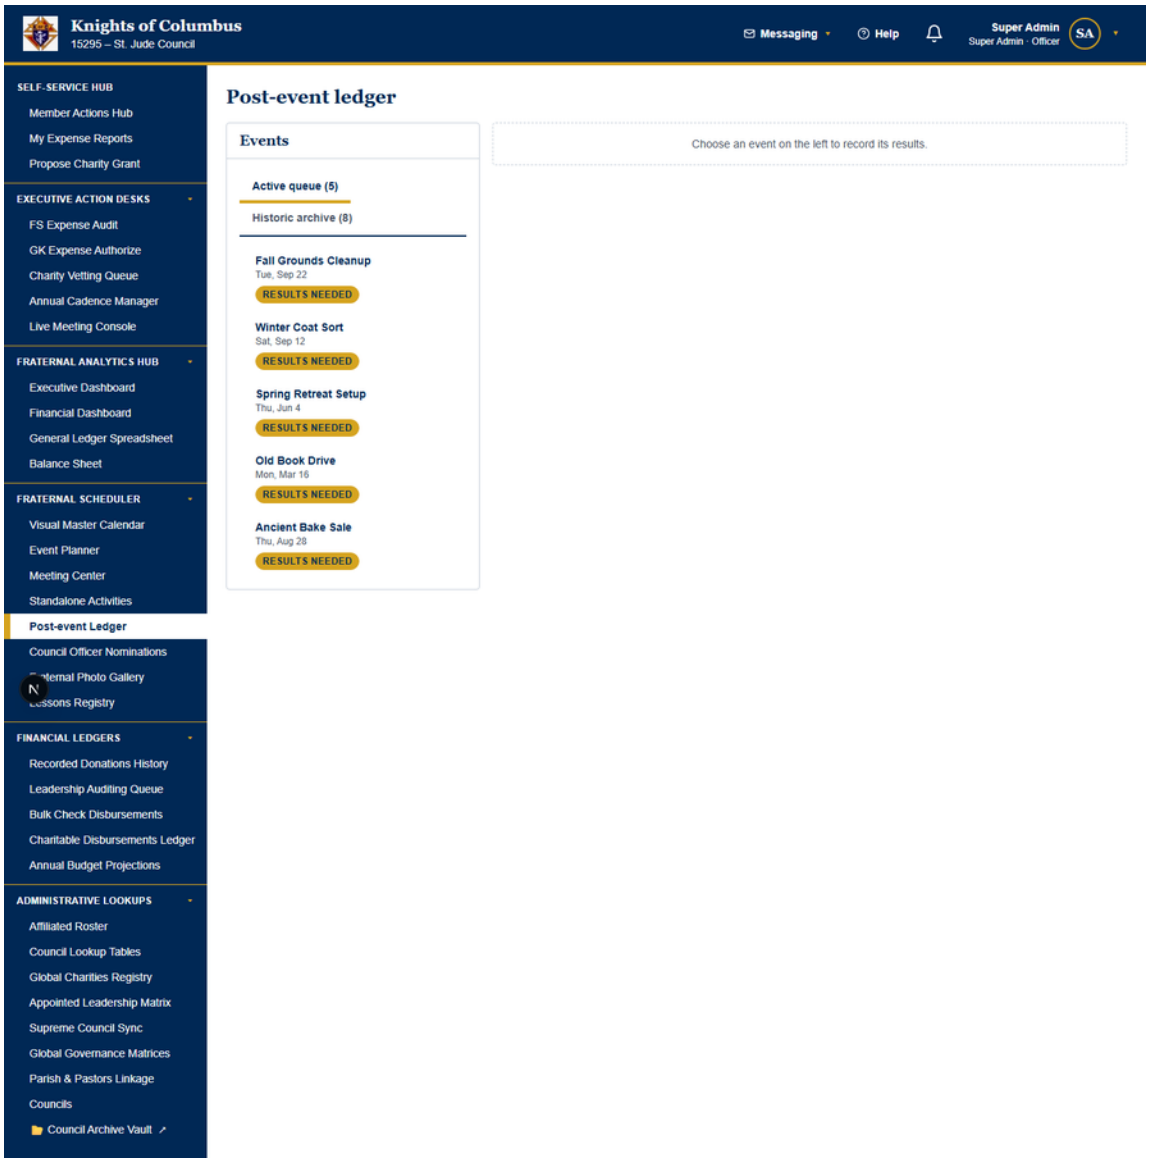

> **Prerequisite (who can do this):** You must be the event owner, an elected officer or Admin of a council linked to the event, or a Super Admin. Other members do not see the event on the ledger.

Goal: Close out an event with attendance, funds and lessons.

Start point: Sidebar → Performance → **Post-event Ledger** → **Active queue**.

Steps:

1. Choose the event with **Results needed**.
2. Enter **Actual attendees**. The event's costs come from the expense reports linked to it, not from this page.
3. Enter **Cash raised ($)** and **Electronic raised ($)** if the fields are open.
4. Write **Highlights** for the monthly summary.
5. Select **Save results**.
6. Add lessons: choose a **Category**. Write **What did we learn?**. Select **Add lesson**.

Post-event Ledger (/ledger)

Expected result: A message shows *"Results saved."* The event moves to **Historic archive**.

Common problems:

Problem	Cause	Fix
The cash fields show **Synced from donations**.	Donations drive the totals.	Correct the donations (6.10).

7.4 Mark or clear a no-show

> **Prerequisite (who can do this):** You must be an Admin of a council linked to the event, or a Super Admin.
>
> **Warning:** a no-show shows in the member's history and in the executive audits.

Goal: Record that a volunteer missed a shift.

Start point: Sidebar → Performance → **Post-event Ledger** → the event → **Fraternal Volunteer Turnout Summary**.

Steps:

1. Select **Mark no-show** on the volunteer's row.
2. Choose the reason.
3. Select **Confirm**.
4. To remove a mistake, select **Clear** on the row.

Expected result: The row shows a red edge and a **No-show** pill.

Common problems:

Problem	Cause	Fix
Mark no-show is missing.	The volunteer logged hours, or the event is not linked to your council.	Correct the hours first.

7.5 Search the lessons registry

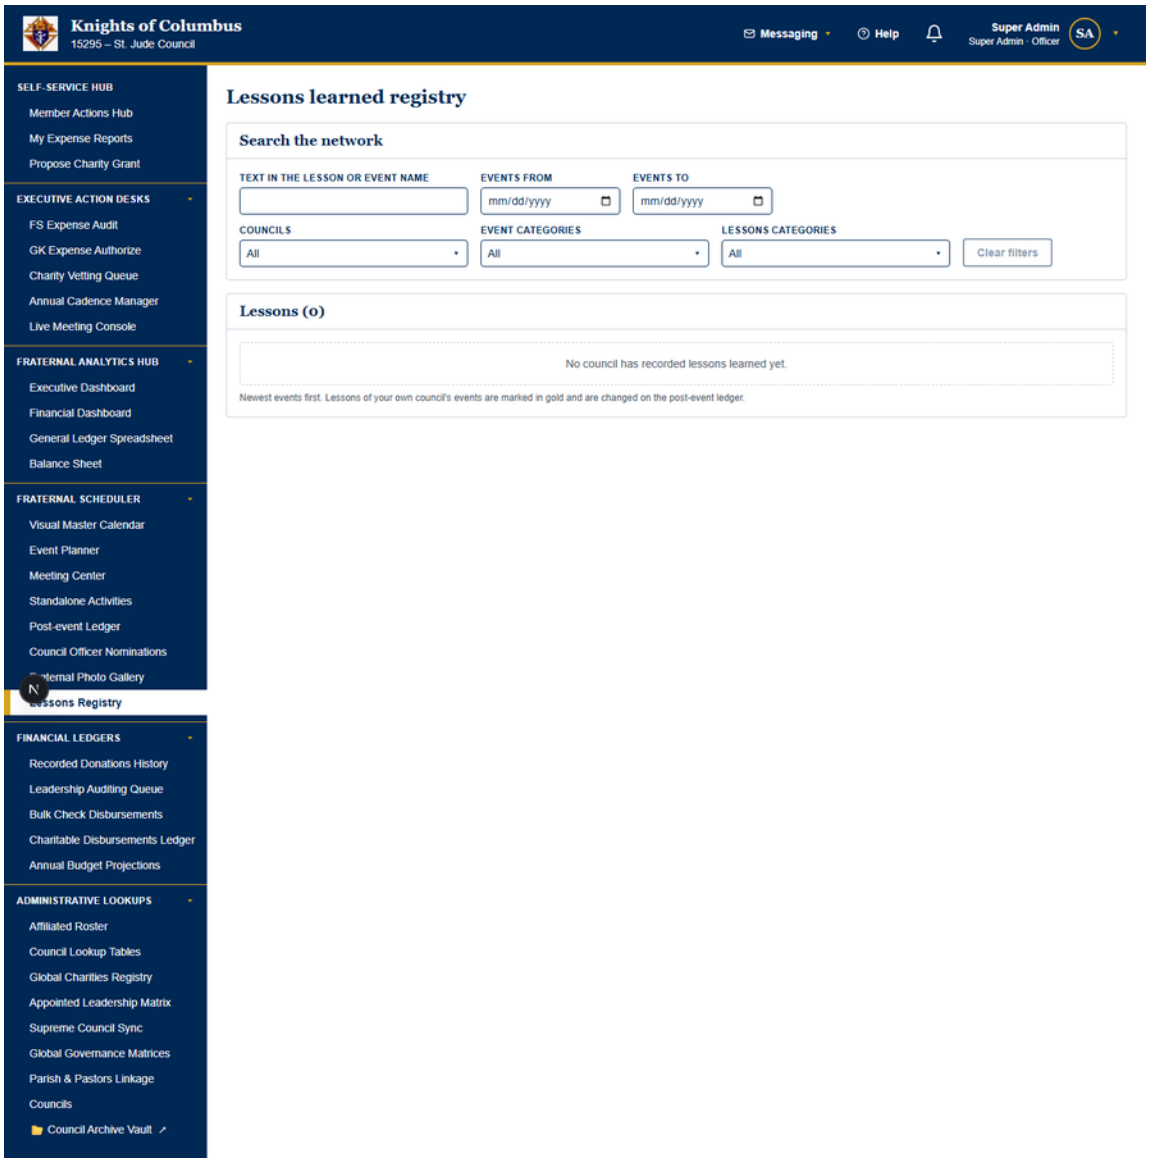

> **Prerequisite (who can do this):** You must have council Admin privileges for the council, or Super Admin privileges.

Goal: Learn from other councils' events.

Start point: Sidebar → Performance → **Lessons Registry**.

Steps:

1. Filter by text, dates, councils or categories.
2. Read the lessons. Your council's lessons show in gold.

Lessons Registry (/lessons-registry)

Expected result: The newest events show first.

Common problems:

Problem	Cause	Fix
You cannot edit a lesson here.	The registry is read only.	Edit the lesson on the **Post-event Ledger**.

8. Resources and the Google Drive archive vault

8.1 Concept: backend logic of the Drive archive vault

The vault files council documents in the council's shared Google Drive. The vault has one root folder and three sub-folders.

Folder path	Holds	Filled from	Accepted files
`Fraternal Enterprise Suite / Minutes`	Meeting minutes	**Meeting Center → Upload minutes**	PDF, text, Word
`Fraternal Enterprise Suite / Vouchers`	Expense receipts	**My Expense Reports**	PDF, images
`Fraternal Enterprise Suite / Media`	Event photos and video	**Fraternal Photo Gallery**	Images, video, PDF

The vault follows five rules.

1. Only Admin and Super Admin uploads go to the vault.
2. The largest accepted file is 25 MB.
3. The record stores only the Drive file id. The id goes in the record's existing link column.
4. The web server holds the Drive credentials. The browser never sees the credentials.
5. Live uploads are off by default. The server needs four settings to turn uploads on.

Server setting	Value
`GOOGLE_DRIVE_CLIENT_EMAIL`	The service account email
`GOOGLE_DRIVE_PRIVATE_KEY`	The service account private key
`GOOGLE_DRIVE_SHARED_DRIVE_ID`	The shared drive id. The service account must be a Content manager.
`DRIVE_VAULT_LIVE`	`1`

> **Security warning:** the portal has no server-side sessions yet. The upload route cannot confirm that the caller is an Admin.
>
> Set `DRIVE_VAULT_LIVE=1` only behind an authenticating proxy. Without the four settings, the screen keeps a browser link for the file.

8.2 Turn on live Drive uploads

> **Prerequisite (who can do this):** You must be the platform's server operator. A Super Admin approves the change.
>
> **Warning:** an open upload route lets anyone who reaches the server write files to the shared drive.

Goal: Send Admin uploads to the shared Google Drive.

Start point: The web server's environment settings.

Steps:

1. Create a Google service account.
2. Add the service account to the shared drive as a Content manager.
3. Set `GOOGLE_DRIVE_CLIENT_EMAIL`, `GOOGLE_DRIVE_PRIVATE_KEY` and `GOOGLE_DRIVE_SHARED_DRIVE_ID`.
4. Put the portal behind an authenticating proxy.
5. Set `DRIVE_VAULT_LIVE` to `1`.
6. Restart the web server.

Expected result: A new Admin upload creates a file under `Fraternal Enterprise Suite`.

A council can use its own Drive private key instead of the server key. A council Admin saves the key on the **Credentials Vault** page (10.8).

Common problems:

Problem	Cause	Fix
Files stay as browser links.	A setting is missing, or `DRIVE_VAULT_LIVE` is not `1`.	Check all four settings.
"… is larger than 25 MB."	The file is too large.	Compress or split the file.

8.3 Open the Council Archive Vault folder

> **Prerequisite (who can do this):** You must be a seated officer, a council Admin or a Super Admin. Members do not see the link.

Goal: Open the council's shared Google Drive folder.

Start point: Sidebar → Resources → **Council Archive Vault**.

Steps:

1. Select **Council Archive Vault**.

Expected result: The Drive folder opens in a new browser tab.

Common problems:

Problem	Cause	Fix
Google Drive refuses access.	Drive sharing settings decide who opens the folder.	Ask the folder owner to share the folder with you.

8.4 Share photos and council artifacts

> **Prerequisite (who can do this):** You must be a signed-in member to read both pages. You must be an Admin or a Super Admin to upload to the gallery vault.

Goal: Publish event photos, flyers and minutes for the council.

Start point: Sidebar → Resources → **Fraternal Photo Gallery** or **Council Artifacts**.

Steps:

1. In the gallery, choose the **Event**.
2. Drag photos onto **Drag and drop photos here**.
3. In **Council Artifacts**, filter the cards with **Show**.

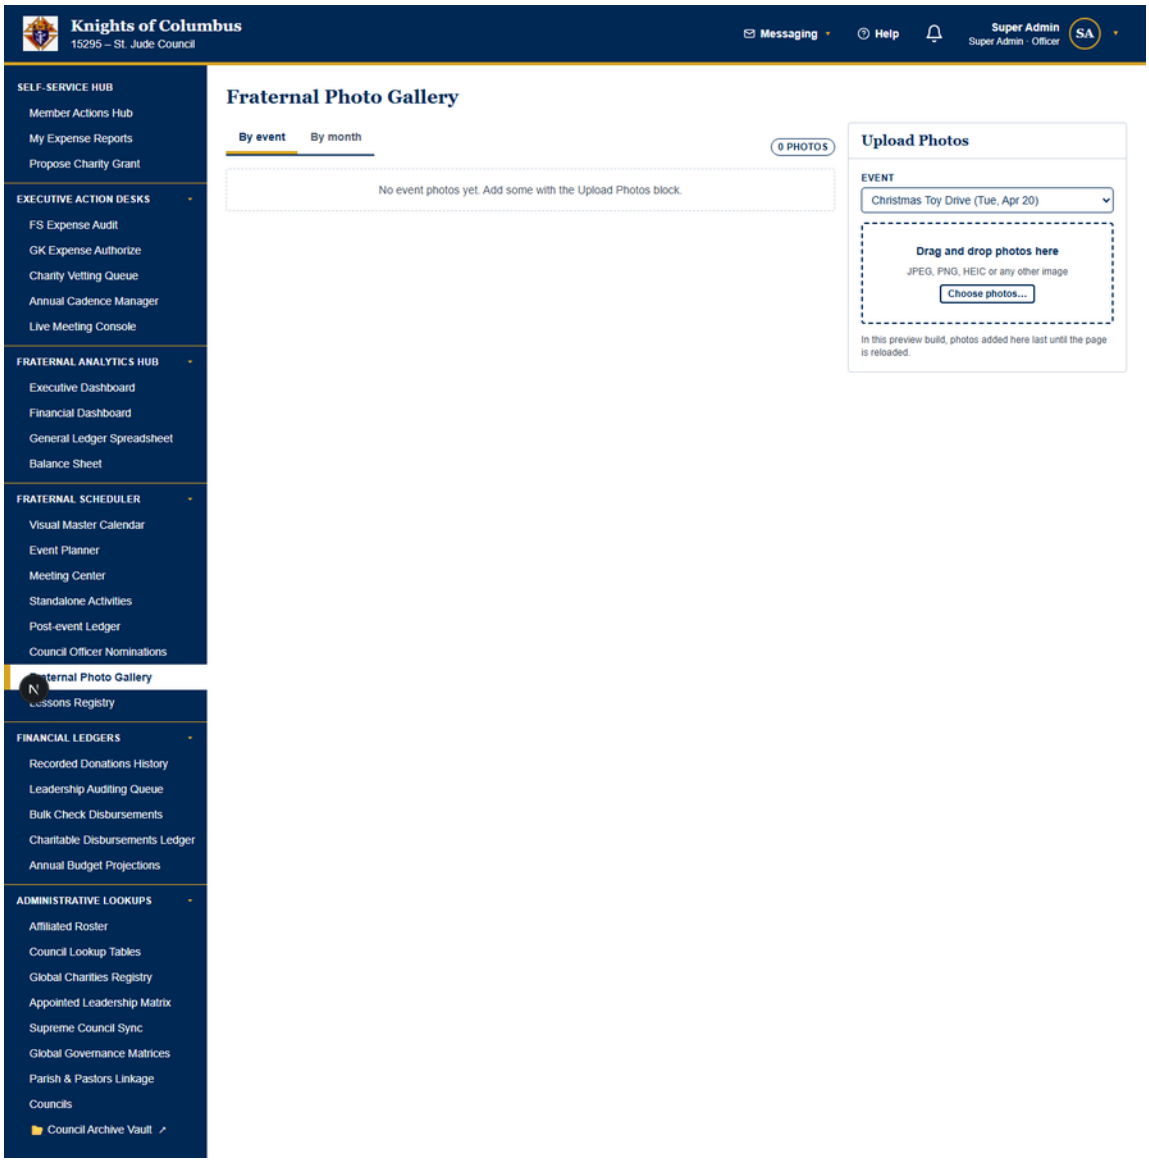

Photo gallery (/gallery)

Expected result: The photos show in the slideshow. **Council Artifacts** shows a card for each meeting flyer, set of minutes, event flyer and event photo album.

Common problems:

Problem	Cause	Fix
A council artifact card is missing.	The meeting or the event has no Drive link.	Add the link on the meeting or the event.

8.5 Ask the Microsoft Co-Pilot for collateral

> **Prerequisite (who can do this):** You must be a seated officer, a council Admin or a Super Admin. Other members do not see the **Marketing Factory**.
>
> **Warning:** the Microsoft Co-Pilot is an AI service from Microsoft (Copilot Studio). The portal sends your request and the facts of the chosen event to Microsoft.

Goal: Get a draft of a notice, a post or other collateral for a council event.

Start point: Sidebar → Resources → **Marketing Factory**.

Steps:

1. Choose the **Event**.
2. In **Ask Microsoft Co-Pilot to Design Advanced Collateral**, type what you need. The limit is 2,000 characters.
3. Select **Design Advanced Collateral**. The answer can take up to 30 seconds.
4. Read **The co-pilot's draft**. Check every fact, date and name.
5. Select **Copy the draft**.

Expected result: The draft shows under the prompt box.

Common problems:

Problem	Cause	Fix
Design Advanced Collateral is grey. Its tooltip says *"The Microsoft Co-Pilot is not connected yet"*.	The council has no Co-Pilot key in the Credentials Vault.	Select the tooltip's link to the Credentials Vault. A council Admin saves the key there (10.8).
"Microsoft refused the saved Co-Pilot key."	The key was changed or removed in Copilot Studio.	Ask a council Admin to save the new key (10.8).
"The Microsoft Co-Pilot did not answer in time."	The agent took more than 30 seconds.	Type a shorter request. Try again.
Rewrite in plain, warm words shows.	The draft uses business jargon.	Edit the words before you use the draft.

9. Answers

9.1 Read the feedback inbox

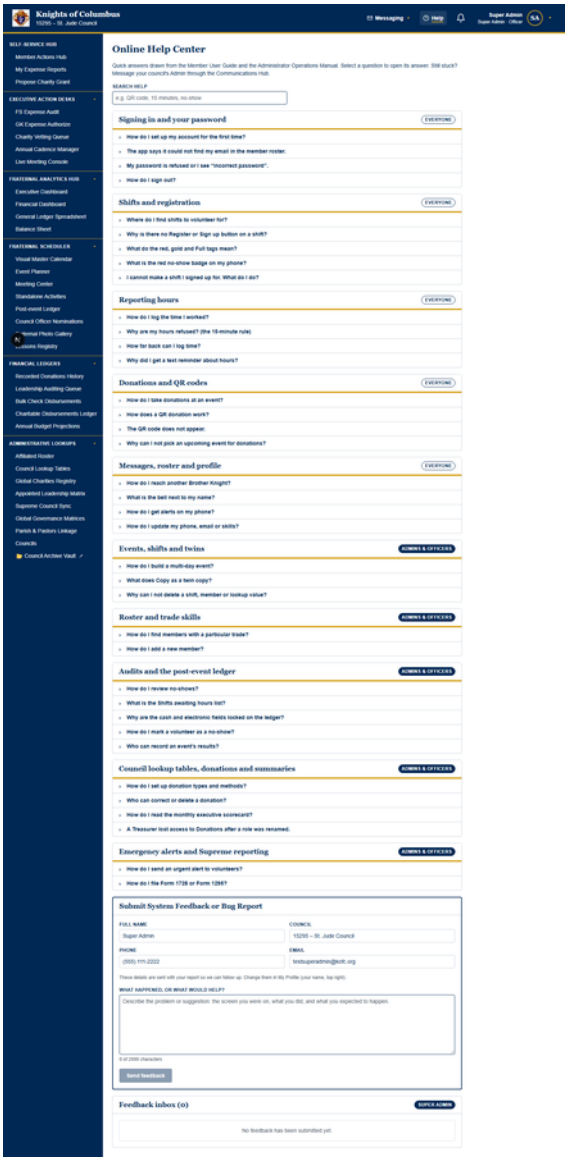

> **Prerequisite (who can do this):** You must have Super Admin privileges.

Goal: Read members' feedback and bug reports.

Start point: Sidebar → Answers → **Online Help Center** → **Feedback inbox**.

Steps:

1. Scroll below **Submit System Feedback or Bug Report**.
2. Read each report. The newest report shows first.

Online Help Center with the Feedback inbox (/help)

Expected result: Each report shows the sender's name, council, phone, email and time (UTC).

Common problems:

Problem	Cause	Fix
The inbox is missing.	Only Super Admins see the inbox.	Ask a Super Admin.

9.2 Publish a standard operating procedure

> **Prerequisite (who can do this):** You must be a platform maintainer with write access to the code repository.
>
> **Warning:** the SOP Center reads the files when the portal is built. A new SOP shows only after a rebuild.

Goal: Add a procedure to the **SOP Center**.

Start point: The repository folder `docs/sop/`.

Steps:

1. Create a Markdown file in `docs/sop/`.
2. Start the file with a `#` title.
3. Write each task with **Goal**, **Start point**, **Steps**, **Expected result** and **Common problems**.
4. Rebuild the web portal.

Expected result: The SOP shows in Sidebar → Answers → **SOP Center**.

Common problems:

Problem	Cause	Fix
The SOP is missing.	The portal was not rebuilt.	Run the web build again.
A test fails.	The SOP lacks a title or one of the five headings.	Add the missing heading.

The SOP Center holds the full procedure: **Publish a standard operating procedure**.

---

10. System Settings and the Supreme roster sync

10.1 Add a member

> **Prerequisite (who can do this):** You must have council Admin privileges for the council, or Super Admin privileges.
>
> **Warning: Add member** sends a welcome email with a setup code at once.

Goal: Put a new Brother Knight on the roster.

Start point: Sidebar → System Settings → **Affiliated Roster**.

Steps:

1. Select **Add member**.
2. Fill in the form. **Email (also the login)** is the member's sign-in name.
3. Choose the **Member type**. Admins grant Admin or Member. Only a Super Admin grants Super Admin.
4. Optional: tick **Designated Budget Director**.
5. Select **Add member**.

Affiliated Roster (/members)

Expected result: A message confirms that a welcome email was queued. The member shows a NEW **New Member** badge for 180 days.

Common problems:

Problem	Cause	Fix
The new member cannot create a password.	The setup code expired after 14 days, or the email is wrong.	Check the email. Select **Send new setup code**.
You cannot move a member to another council.	Admins act on their own council only.	Ask a Super Admin.

10.2 Send a new setup code

> **Prerequisite (who can do this):** You must have council Admin privileges for the council, or Super Admin privileges.
>
> **Warning:** a new code replaces the old code.

Goal: Help a member who lost or used up the setup code.

Start point: Sidebar → System Settings → **Affiliated Roster** → the member.

Steps:

1. Open the member's record.
2. Select **Send new setup code**.

Expected result: The member gets a new welcome email. The new code is valid for 14 days.

Common problems:

Problem	Cause	Fix
The member already has a password.	A registered member does not need a code.	Tell the member to use **Forgot Password?**.

10.3 Concept: backend logic of the Supreme roster sync

The sync reads the roster export from Supreme Headquarters. The sync adds new members and updates join dates.

- The input is a CSV file with a header row. Save the Supreme Excel export as CSV first.
- The columns are Member Number, First Name, Last Name, Email, Phone, Street, Street 2, City, State, Zip, Birth Date, Degree, Date Joined and Charter Member.
- Admins can download a ready Excel roster template with drop-down lists (14.8).
- Header case and spacing do not matter.
- The file must have the member number, the names, the email and the join date columns.

Row type	What the sync does
A new member number	Adds the member with the join date. Sends the welcome email with the Expo Go steps and a setup code.
A member number already on the roster	Updates the join date only. Other fields stay unchanged.
A row that fails a check	Skips the row. The result names the reason.

A setup code has 20 characters, expires after 14 days and works one time. The platform stores only a hash of the code. The platform has no background scheduler. An Admin runs the sync by hand.

10.4 Run the Supreme roster sync

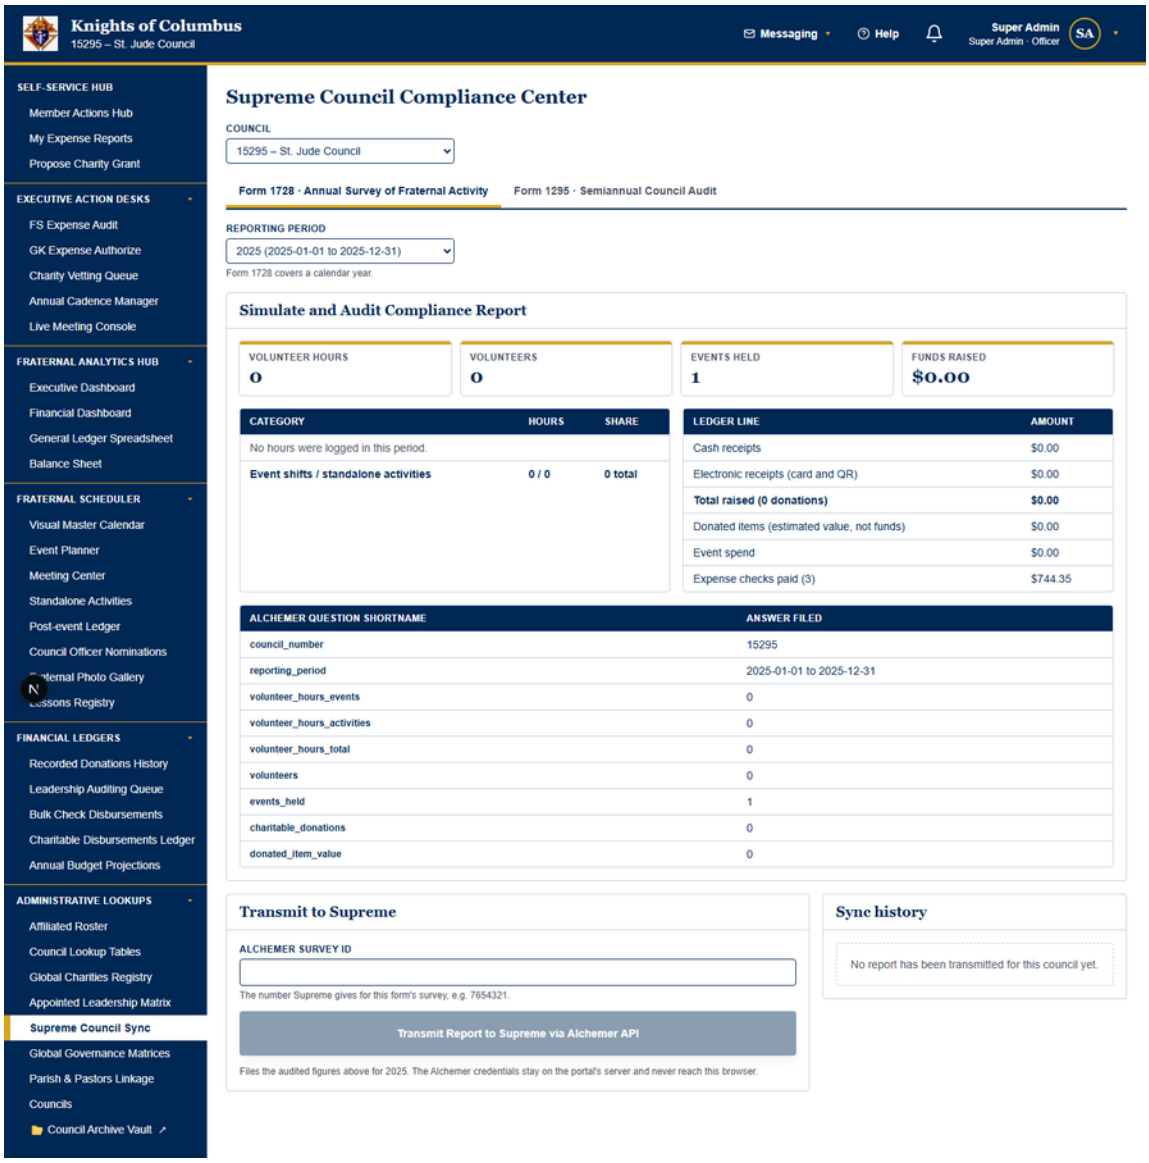

> **Prerequisite (who can do this):** You must have council Admin privileges for the council, or Super Admin privileges. The Treasurer and the FS see the page but not the roster panel.
>
> **Warning:** each new row sends a welcome email at once.

Goal: Bring the Supreme roster into the platform.

Start point: Sidebar → System Settings → **Supreme Council Sync** → **Supreme roster sync - new member onboarding**.

Steps:

1. Save the Supreme Excel export as a CSV file.
2. Choose the file in **Roster file**. You can also paste the rows in **…or paste the export**.
3. Check the row count on the button.
4. Select **Sync *n* roster rows from Supreme**.
5. Read the skipped rows and the reasons.

Supreme sync (/supreme-sync)

Expected result: A message counts the new members, the updated join dates and the skipped rows. Each new member shows a NEW **New Member** badge.

Common problems:

Problem	Cause	Fix
The file is refused.	A required column is missing.	Add the missing column header.
A row is skipped.	The row has a bad email or a missing value.	Correct the row. Sync again.

10.5 File Form 1728 or Form 1295 with Supreme

> **Prerequisite (who can do this):** You must be a council Admin, the Financial Secretary, the Treasurer or a Super Admin.
>
> **Warning: Transmit Report to Supreme via Alchemer API** sends the report to Supreme.

Goal: File a Supreme report from the council's records.

Start point: Sidebar → System Settings → **Supreme Council Sync**.

Steps:

1. Choose the **Supreme form**.
2. Choose a completed **Reporting period**. Form 1728 covers a calendar year. Form 1295 covers a half-year.
3. Check the figures in **Simulate and Audit Compliance Report**.
4. Enter the **Alchemer survey id**.
5. Select **Transmit Report to Supreme via Alchemer API**.

Expected result: The attempt shows in **Sync history**. A gold dot marks success. A red dot marks a failure with the reason.

Common problems:

Problem	Cause	Fix
The period is not offered.	The period has not ended.	Wait for the period end.
"The transmission failed and was logged"	Supreme refused the post.	Read the reason. Correct the figures. Transmit again.

10.6 Find members with a trade skill

> **Prerequisite (who can do this):** You must have council Admin privileges for the council, or Super Admin privileges.
>
> **Warning: Send to *n* members** sends a message at once.

Goal: Find and message members with a skill.

Start point: Sidebar → System Settings → **Affiliated Roster** → **Skills**.

Steps:

1. Choose a skill in the **Council skills** drawer.
2. Read **Members with *skill***.
3. Optional: write a note. Select **Send to *n* members**.

![Image: Skills Filter Drawer]

Expected result: Active members with the skill get the message. Replies arrive in **Council Messages & Alerts**.

Common problems:

Problem	Cause	Fix
"No member of this council has recorded a skill yet."	Members have no skills on file.	Ask members to add skills in **My Profile**.

10.7 Keep the council lookup tables

> **Prerequisite (who can do this):** You must be a council Admin or a Super Admin for every tab. The Treasurer and the FS may edit the donation tabs and **Budget categories** only.
>
> **Warning: Save changes** saves every row together. One refused row saves nothing.

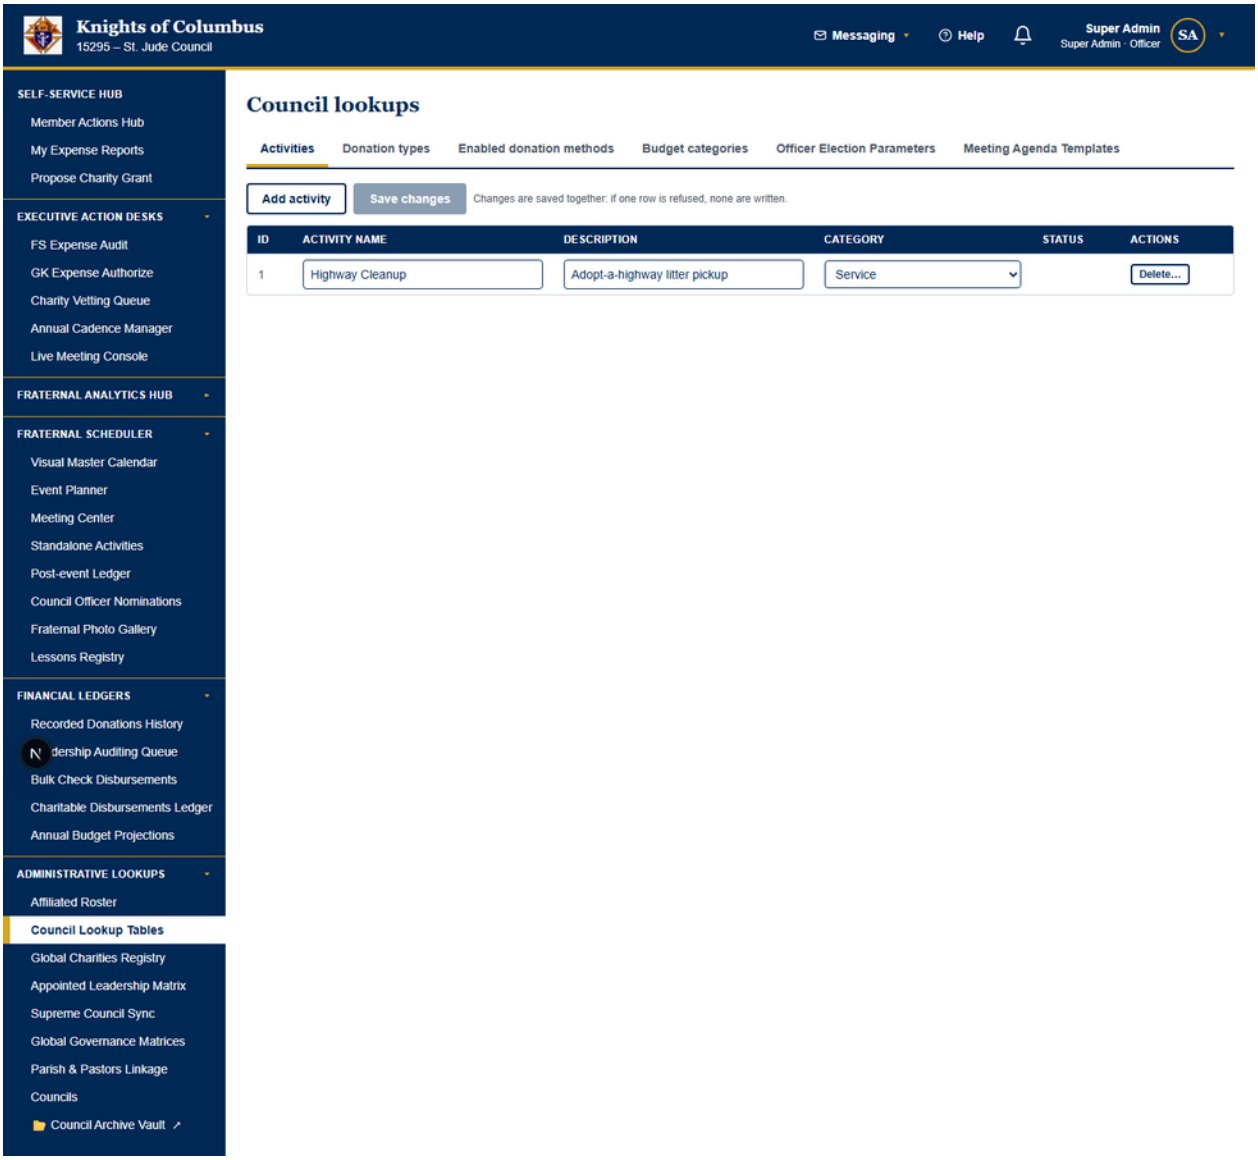

Goal: Keep the council's own lists.

Start point: Sidebar → System Settings → **Council Lookup Tables**.

Steps:

1. Open the tab: **Activities**, **Donation types**, **Enabled donation methods**, **Budget categories** or **Meeting Agenda Templates**.
2. Edit the rows. Each changed row shows **Edited**.

3. For a QR method, paste the image link in **QR code image URL**.
4. Select **Save changes**.

Council Lookup Tables (/council-lookups)

Expected result: The changes save. Phones show the new values on the next load.

The outbound email settings are not on this page. Set them on the **Credentials Vault** page (10.8). The base dues rate is not on this page either. A Super Admin sets the rate on **Global System Parameters** (16.8).

Common problems:

Problem	Cause	Fix
"Your role cannot maintain this council's lookups."	You are on another council, or you have no finance role.	Ask a council Admin.
A budget category will not delete.	Budget lines use the category.	Move the lines to another category.

10.8 Connect the council email, Google Drive, Microsoft Co-Pilot and receipt reading

> **Prerequisite (who can do this):** You must be a council Admin or a Super Admin to save or remove a connection. Seated officers see the status lines only. Other members do not see the **Credentials Vault**.
>
> **Warning: Remove** deletes the saved password or key at once. The council goes back to the portal default.

Goal: Connect the council's own mail account, Google Drive, Copilot Studio agent and Azure receipt reader.

Start point: Sidebar → System Settings → **Credentials Vault**.

Steps:

1. Read the status lines at the top. A line with ✓ is a connection that is on.
2. For email, go to the **Outbound email** panel.
3. Choose the **Email service**. Google Workspace and Microsoft 365 fill in the **Mail server**.
4. Enter the **Sign-in email** and the **Password**. Use an app password if the service asks for one.
5. Select **Save**.
6. For Google Drive, paste the key in **Drive key** in the **Google Drive** panel. Select **Save**.
7. For the Microsoft Co-Pilot, paste the Direct Line secret in **Co-Pilot key**. Select **Save**. Copilot Studio shows the secret under Settings → Security → Web channel security.
8. For receipt reading, open the council's Azure Document Intelligence resource in the Azure portal. Go to **Keys and Endpoint**.
9. Paste the endpoint in **Azure endpoint**. Select **Save**. The endpoint looks like `https://name.cognitiveservices.azure.com/`.
10. Paste **KEY 1** in **Azure key**. Select **Save**.

Expected result: The status line of each saved connection shows ✓. **Receipt reading** shows ✓ only when both Azure values are saved. The page never shows a saved password or key again.

Common problems:

Problem	Cause	Fix
The panels are missing.	You are an officer but not an Admin.	Ask a council Admin.
A message about the mail server or the sign-in email shows.	The mail server name or the email is not valid.	Copy both values from your mail service.
Saved keys stop working after a server restart.	The server has no fixed vault secret.	Ask the server operator to set `CREDENTIALS_VAULT_SECRET`. Save the keys again.
A message says the endpoint must be a cognitiveservices.azure.com address.	The value is not the Azure endpoint.	Copy **Endpoint** from **Keys and Endpoint**.

10.9 Keep the global lists, councils, parishes and charities

> **Prerequisite (who can do this):** You must be a Super Admin for **Global Governance Matrices** and **Councils**. You must be a council Admin or a Super Admin for **Parish & Pastors Linkage**. You must be a charity registry keeper for **Global Charities Registry**.
>
> **Warning:** a value marked **Built in** cannot be renamed or deleted.

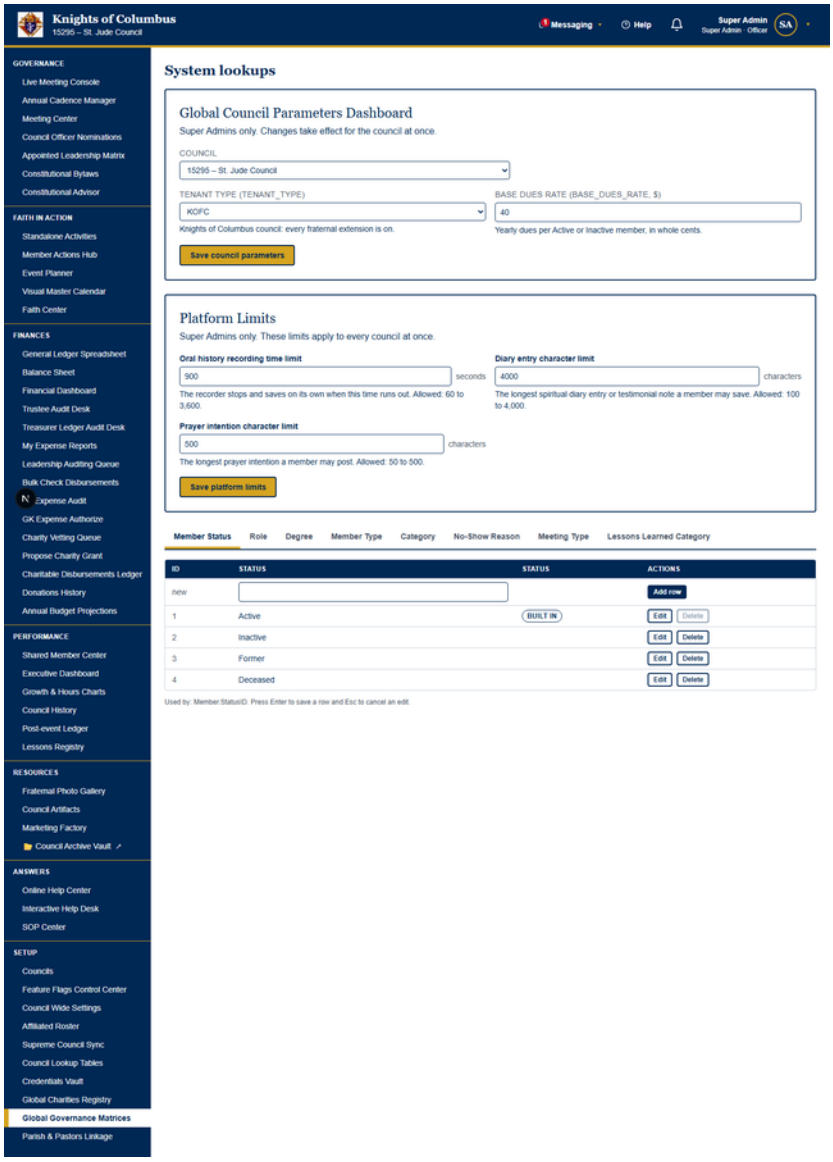

Goal: Keep the lists that every council shares.

Start point: Sidebar → System Settings.

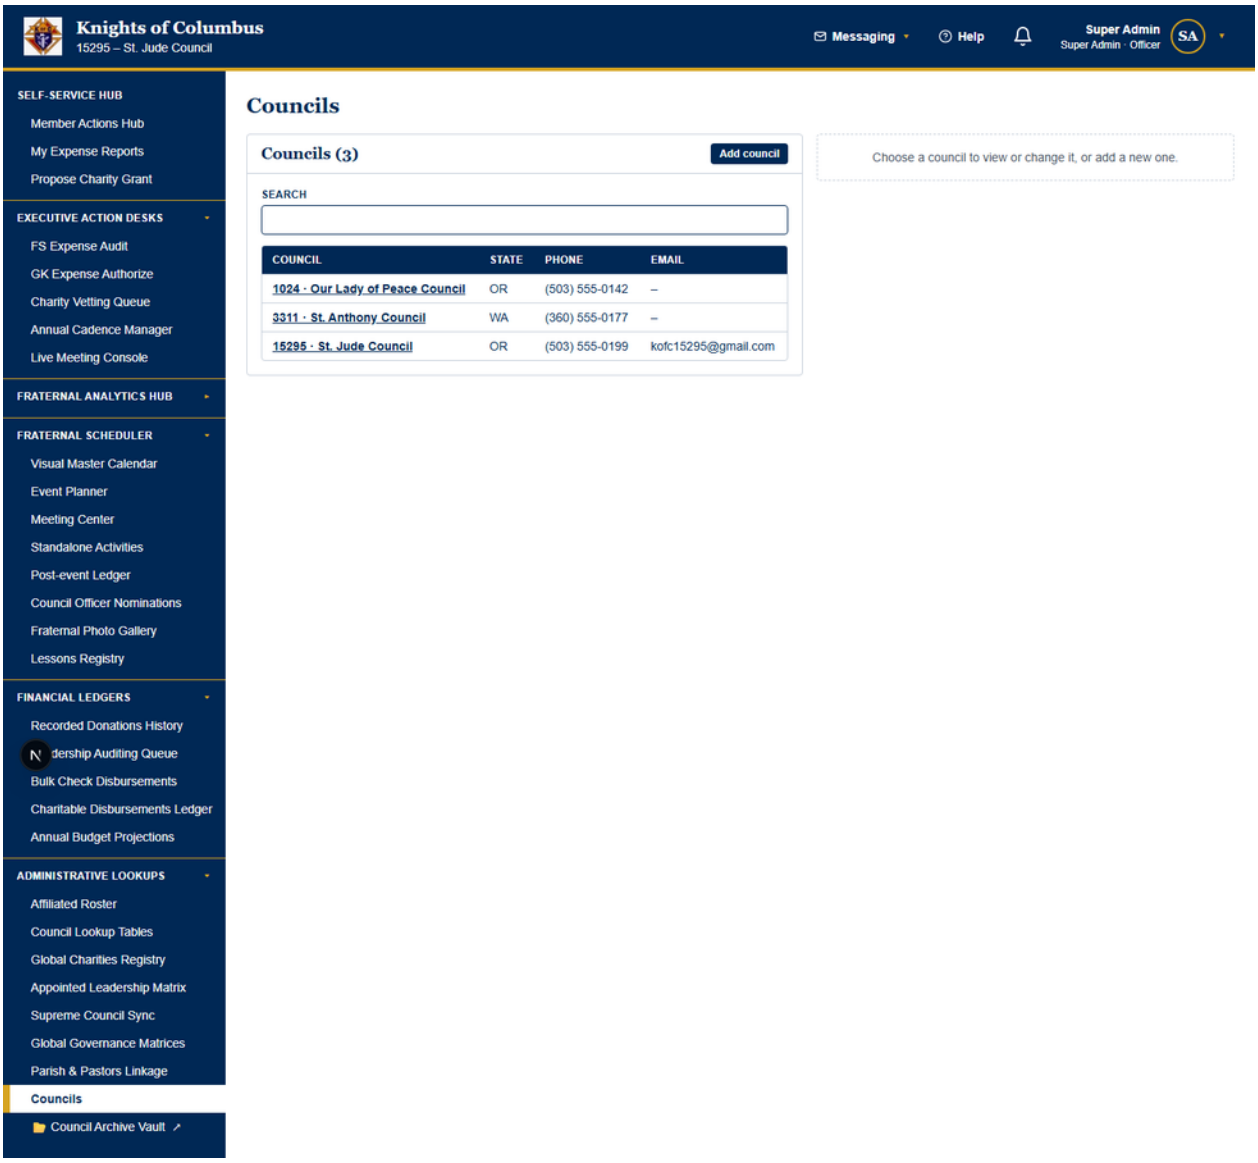

Steps:

1. Open the page.
2. Edit the row.

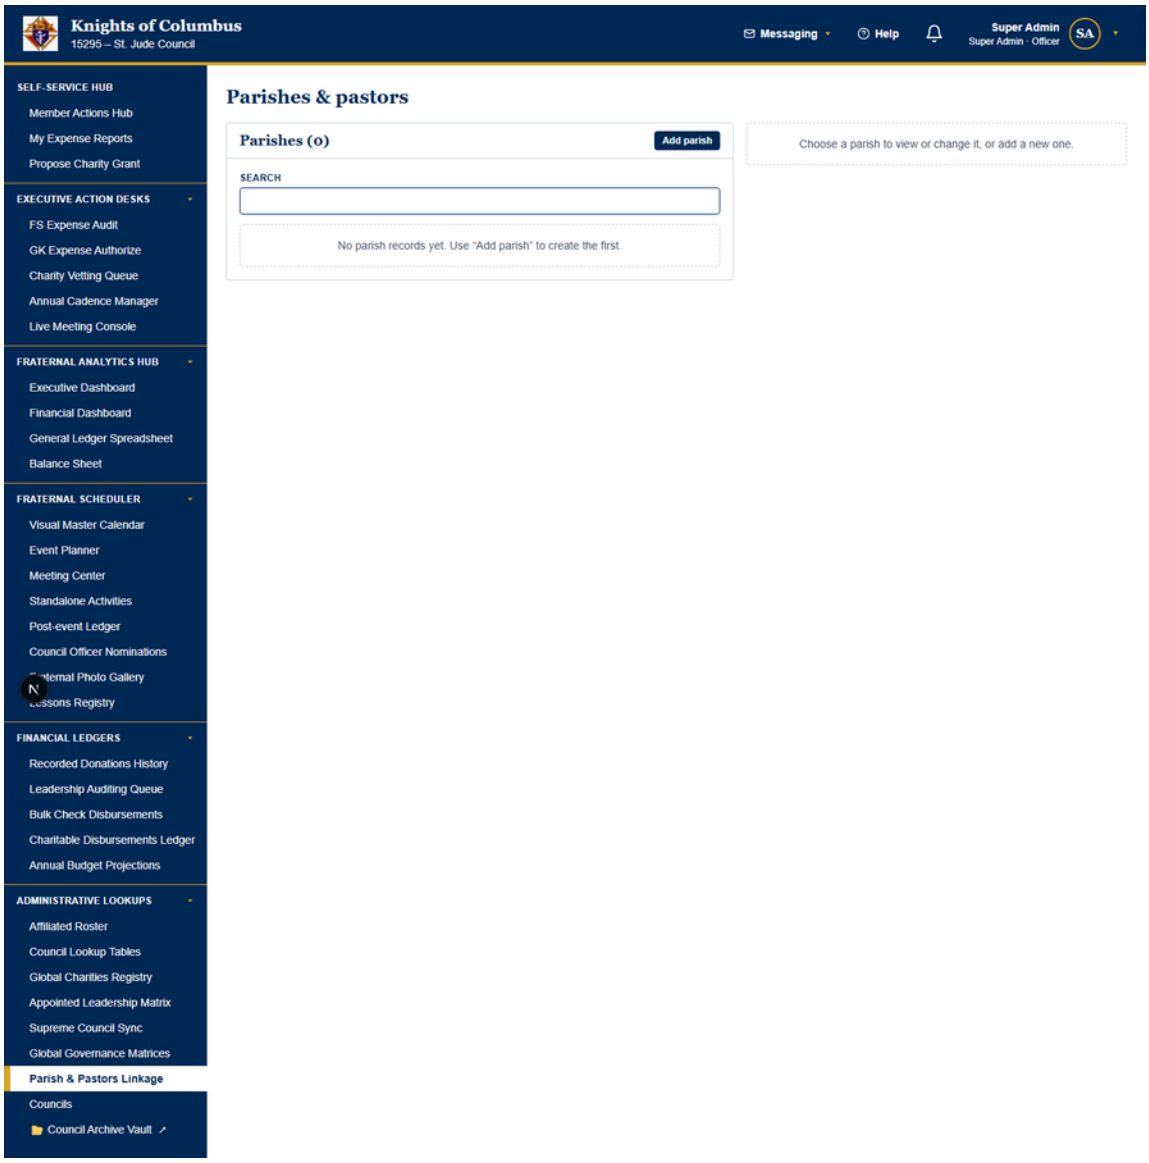

3. Save.

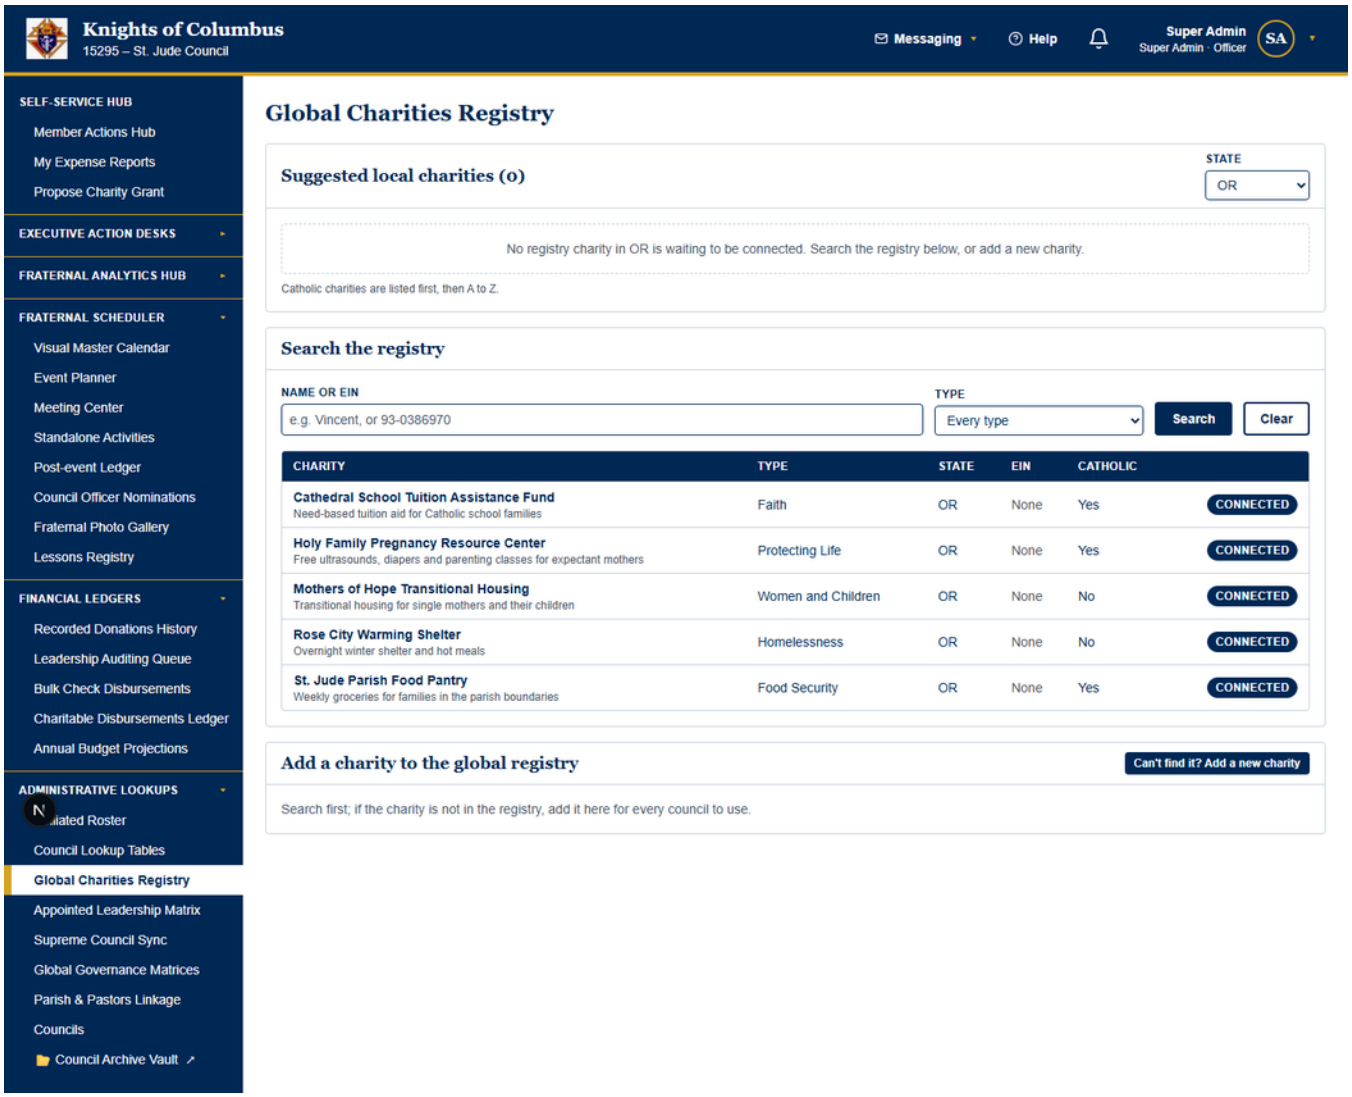

Global Governance Matrices (/lookups)

Councils (/councils)

Parishes and pastors (/parishes)

Global Charities Registry (/charities/registry)

The base dues rate, the tenant type and the **Platform Settings** are not on **Global Governance Matrices**. A Super Admin sets them on **Global System Parameters** (sections 16.5 to 16.8).

Expected result: Every council sees the new value.

Common problems:

Problem	Cause	Fix
Finance officers lost access.	A role named Treasurer or Financial Secretary was renamed.	Restore the exact role name.

11. Data protection rules

- **Nothing cascades.** The platform refuses to delete a record that other records use. The message names the record in use.
- Examples: a shift with sign-ups, a member with logged hours, a lookup value in use.
- One exception: a deleted distribution list also deletes the list's member entries.
- **Time windows** protect records. Shift hours and activity hours close after the council's logging window. The default is 90 days (section 16.3).
- **Approved budgets** are frozen for everyone.

12. Troubleshooting reference

Symptom or message	Cause	Fix
A page is missing from the sidebar	Your role has no access, or a feature flag is off.	Check section 1 and section 3.
An officer desk is missing from the sidebar	Your role cannot open the desk.	Ask the seat holder.
"…cannot …" refusal on save	You act outside your council or role.	Switch the **Council** selector, or ask a Super Admin.
Delete refused (record in use)	Other records depend on the record.	Clear the dependants first, or keep the record.
Shift date refused	The date is outside the event dates.	Adjust the shift date or the event dates.
Cash fields locked on the ledger	Donations drive the totals.	Correct the donations.
Budget inputs greyed out	The year is **Not Yet Open**, **Finalized** or **Approved**.	Edit only from May 1 to June 30.
Transparency view on the budget	You are not a budget editor.	Ask a council Admin to tick **Designated Budget Director**. Sign in again.
New member cannot create a password	The setup code expired or the email is wrong.	Select **Send new setup code**.
Roster sync file refused	A required column is missing.	Check the CSV header (10.3).
Drive uploads stay as browser links	Live uploads are off.	See 8.2.
Edit bylaws missing	You are not the GK or an Admin.	Ask the Grand Knight.
"Decide the open ballot first"	A ballot is still open.	Decide the open motion.

Quick answers are also in **Answers → Online Help Center**.

13. Automated messages reference

> **Delivery in this version:** the platform prepares emails and texts. The email and text services are not connected yet.
>
> High-priority alerts always reach each recipient's bell. Use the screens in the **Where to follow** column.

> **Hybrid messaging rule:** an email or a text is only a short nudge. The nudge sends the member back to the platform.
>
> Conversations stay in **Council Messages & Alerts**. Audit notes stay in the **General Ledger** and on the desks.
>
> Decisions stay on the status tags and desks. No dollar amount, audit finding or private reason goes by email or text.

Charity grant requests

Step	Message	Recipient	Where to follow
Request filed	A tracking message with the three steps and the follow-up date	The Knight Shepherd	**Charity Vetting Queue**
1. Vetting	None	—	**Charity Vetting Queue**
2. Presentation	None	—	The meeting agenda and the **Live Meeting Console**
3. Payment Made	None	—	**Charity Payments Made Ledger**
6 months after filing	The Trustees ask the Shepherd for a status report. The app sends no reminder.	The Trustees	The date in the Shepherd's tracking message

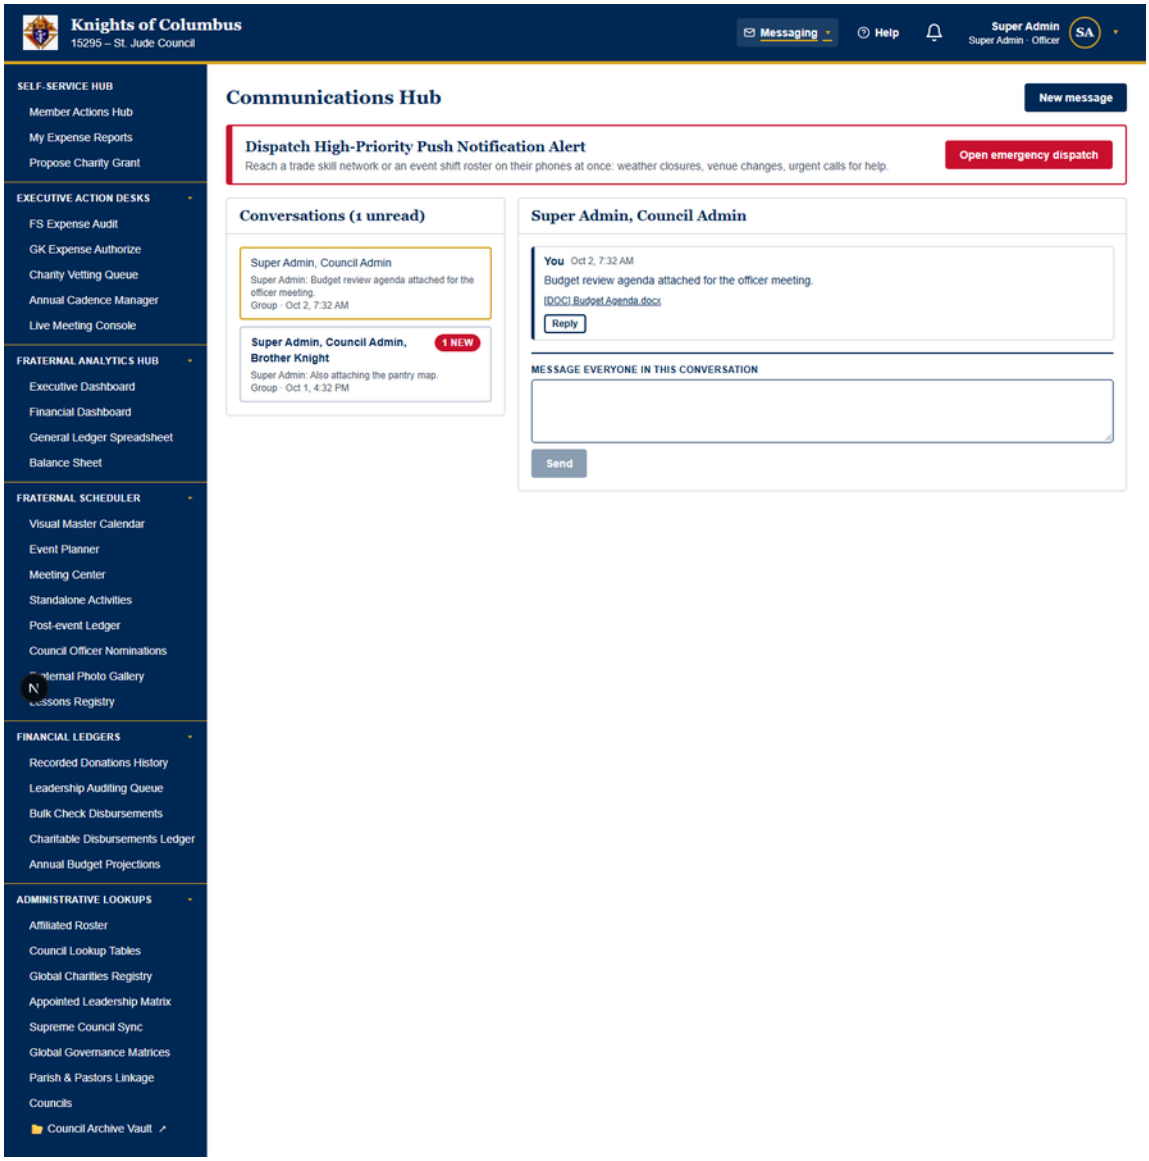

Expense reports

The platform sends no message when an expense report changes status. The member reads the status tag. Officers follow the desks (6.1).

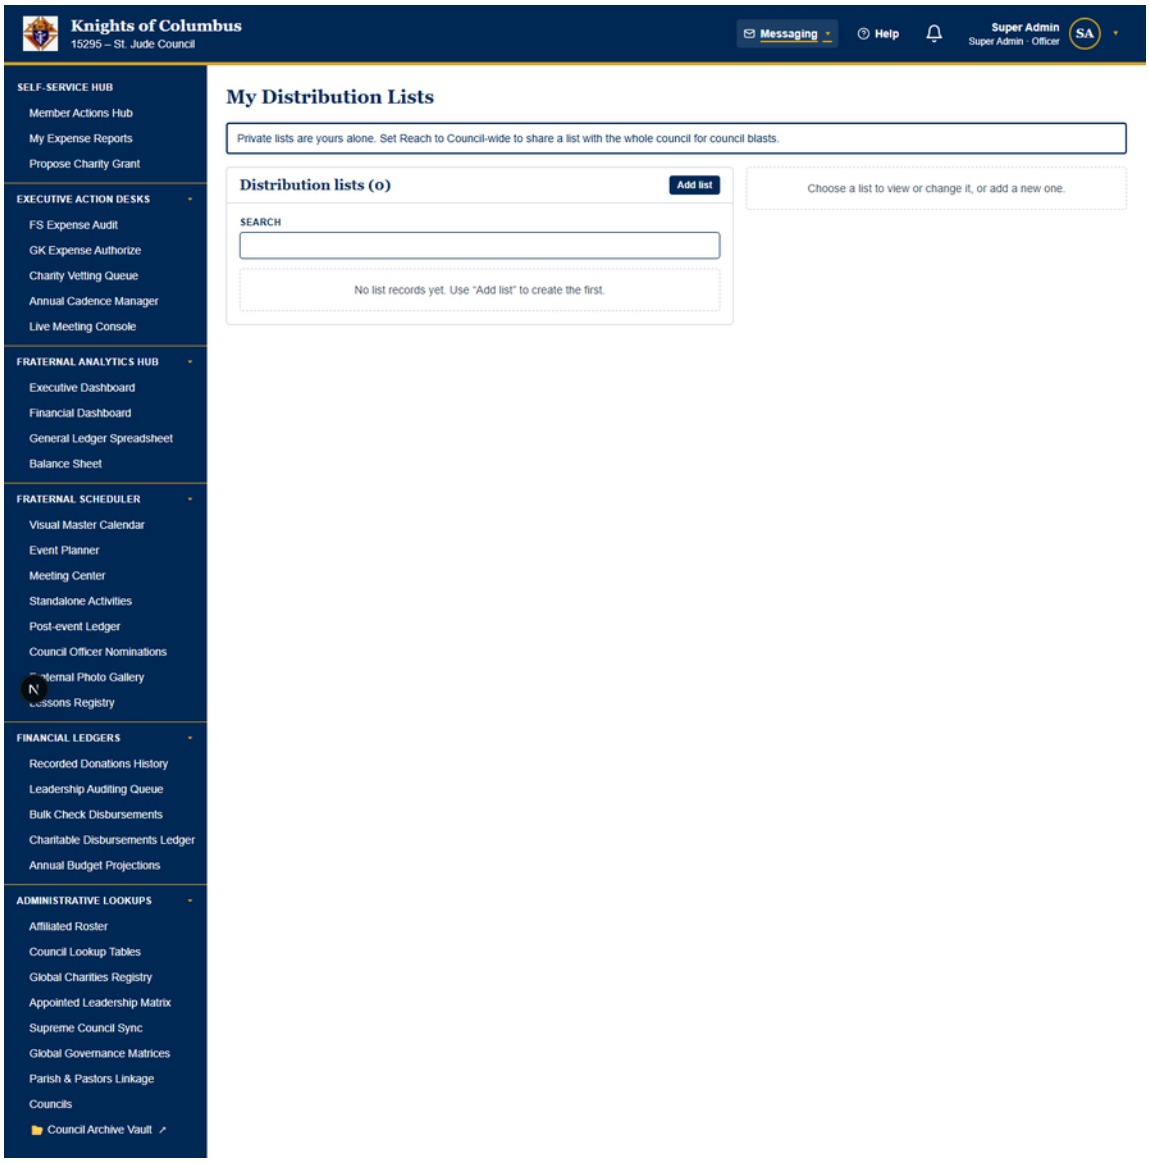

Volunteer service and onboarding

Trigger	Message	Recipient	Where to follow
A shift starts in 24 hours	A reminder email with a calendar file	Every volunteer on the shift	The event's shift roster
A meeting starts in 24 hours	A reminder email with a calendar file and the agenda	Every invitee	**Meeting Center**
Day 5 after a shift with no hours (the council can change the day, section 16.3)	A text reminder	The volunteer	**Active Desks** row → **Oversight Desk** → **Shifts awaiting hours**
Every 7 days after that (the council can change the days, section 16.3)	A follow-up text, until the shift is older than the logging window (90 days by default)	The volunteer	Same panel. The row shows **Closed** when the window ends.
An officer sends an urgent alert	A phone push alert and a bell entry, kept 6 months	Members with the chosen skills or shifts	**Council Messages & Alerts** → **Dispatch High-Priority Push Notification Alert**
A member is added or synced	A welcome email with the app steps and a setup code	The new member	The confirmation on **Affiliated Roster** or **Supreme Council Sync**
A member requests a password reset	An email with a 6-digit code, valid 15 minutes	The member	None. The member resets the password alone.

Only the Financial Secretary, the Treasurer, council Admins and Super Admins see the urgent alert tile.

Council Messages & Alerts (/messages)

My Distribution Lists (/distribution-lists)

14. Member engagement and the roster lifecycle

14.1 Concept: the Council Dashboard

The **Council Dashboard** shows every member how the council is doing. The page has no money on it. Cash, budgets and the general ledger stay on the **Executive Dashboard** and the Finances pages. Plain members cannot open those pages.

Card	What the card shows
Council volunteers	The month's volunteer count, the hours served and the name of each member who served
Our combined devotions	The rosaries, hours of adoration and confessions of all members, added together
Top 5 Volunteers Leaderboard	The 5 active members with the most hours ever logged at council events and activities
My impact	The reader's own events attended, personal hours, canonization shield and council history

- The combined devotions show only totals. No card shows the devotions of one member.
- Members with equal hours share a place on the leaderboard.
- The **Top 5 Fraternal Volunteers** card on the dashboard **Home** desk is a different list. That card counts only the hours of the current month (section 19.2).
- A white-label organization does not see the devotions card or the shield.

14.2 Open the Council Dashboard

> **Prerequisite (who can do this):** Every active member of the council. A Super Admin opens the page for the Super Admin's own council.

Goal: See the council's month and your own impact.

Start point: Sidebar → Performance → **Council Dashboard**. On the phone: Home → **Open the Council Dashboard**.

Steps:

1. Choose the **Month** and the **Year**. The phone always shows the current month.
2. Read the **Council volunteers** card.
3. Read **Our combined devotions** and the **Top 5 Volunteers Leaderboard**.
4. Read the **My impact** card.

Expected result: The cards show the month's volunteers and your own figures.

Common problems:

Problem	Cause	Fix
A volunteer is missing from the month.	The volunteer did not log hours yet.	Ask the volunteer to log the hours. Hours close after the logging window, 90 days by default.
The devotions card shows 0.	No member logged devotions on the phone.	Tell members about **My devotions** on the phone Home screen.

14.3 Concept: personal impact and the canonization shield

The **My impact** card shows three personal measures.

Measure	How the platform counts the measure
Events attended	The events where the member logged shift hours, each event counted one time
Personal hours	All shift hours and activity hours the member logged
Canonization shield	The member's level, from the logged hours and events against the council's thresholds

The shield has four levels. A member reaches a level when both the hours and the events meet the level's share.

Level	Share of both thresholds
Servant of God	The starting level
Venerable	One third
Blessed	Two thirds
Saint	The full thresholds

- The default thresholds are 100 hours and 10 events.
- Devotions do not change the shield. The shield counts logged service only.
- The member logs devotions on the phone: Home → **My devotions** → **Log devotions**. Only the member sees the member's own tally.

14.4 Set the canonization shield thresholds

> **Prerequisite (who can do this):** You must have council Admin privileges for the council, or Super Admin privileges.

Goal: Set the hours and events that make a Saint in your council.

The thresholds are the Canonization Rank benchmarks. You change the benchmarks on **Council Wide Settings** only. Every other page shows the benchmarks as read-only text.

Start point: Sidebar → System Settings → **Council Wide Settings** → **Canonization Rank Benchmarks** card.

Steps:

1. Find the **Canonization Rank Benchmarks** card under the **Roster Inactivity Sweep** card.
2. Enter the **Hours**. Use a whole number from 1 to 10,000.
3. Enter the **Events**. Use a whole number from 1 to 1,000.
4. Select **Save**.

Expected result: The message **Shield thresholds saved.** shows. Every member's shield uses the new thresholds at once.

Common problems:

Problem	Cause	Fix
The thresholds are refused.	A value is 0, a decimal or too large.	Enter a whole number in the allowed range.
The card shows the benchmarks as text only.	Only Admins and Super Admins set the thresholds.	Ask a council Admin.

14.5 Read the monthly activity overview

> **Prerequisite (who can do this):** You must be a seated officer or an Admin of the council, or a Super Admin.

Goal: See the month's volunteers next to the cash collected.

Start point: Sidebar → Performance → **Executive Dashboard**. Scroll down to the navy overview card.

Steps:

1. Choose the **Month** and the **Year**.
2. Read the navy **Monthly activity overview** card.
3. Read the **Top 5 Volunteers Leaderboard** beside the overview.

Expected result: The overview shows the volunteer count, the cash collected, the hours served and each volunteer's name.

Common problems:

Problem	Cause	Fix
The cash collected differs from the deposits.	The overview counts the cash raised at the month's events.	Check the **Financial ledger** panel on the same page.

14.6 Concept: the council membership history

The platform keeps a history of every council that a member belongs to. The history does not change when a member moves.

Event	What the history records
A member is added or synced	A new membership in the council, from the join date when known
A Super Admin moves a member to another council	The old membership closes as **Former**. A new **Active** membership opens in the new council.
A status changes in the same council	The open membership shows the new status. **Deceased** or **Former** also closes the membership.

- A transferred member is always **Active** in the new council.
- A transfer takes the member off the old council's distribution lists.
- A transfer puts the member on the new council's council-wide distribution lists.
- A member marked **Deceased** or **Former** leaves every distribution list.
- A new member joins the council-wide distribution lists of the member's council.
- A member added before the history began shows the current council only, from the join date.

14.7 Read a member's council membership history

> **Prerequisite (who can do this):** You must have council Admin privileges for the member's council, or Super Admin privileges. A member reads the member's own history on the **Council Dashboard**.

Goal: See every council a member belonged to.

Start point: Sidebar → System Settings → **Affiliated Roster** → the member.

Steps:

1. Select the member's name in the roster.
2. Read the **Council membership history** card under the member form.

Expected result: The card lists each council, oldest first, with the status, the date joined and the date left. The current membership shows **current**.

Common problems:

Problem	Cause	Fix
You cannot move a member to another council.	Only a Super Admin moves members between councils.	Ask a Super Admin.
The join date shows **Not recorded**.	The member has no join date.	Enter the **Date joined council** on the member form.

14.8 Download the Excel roster template

> **Prerequisite (who can do this):** You must have council Admin privileges for the council, or Super Admin privileges.
>
> **Warning:** each new row sends a welcome email at once when you sync the roster.

Goal: Build a roster file by hand in Excel and load the file.

Start point: Sidebar → System Settings → **Supreme Council Sync** → **Supreme roster sync - new member onboarding**.

Steps:

1. Select **Download the Excel roster template**.
2. Open the file in Excel. Row 2 is a sample. Replace the sample with a real member.
3. Fill one row for each member. Use the drop-down lists for **Role**, **Degree** and **Charter Member**.
4. Read the **Instructions** sheet for the rules of each column.
5. Save the **Roster** sheet as CSV (File → Save As → CSV UTF-8).
6. Load the CSV file in **Roster file**.
7. Select **Sync *n* roster rows from Supreme**. Each new member gets a welcome email at once.

Expected result: A message counts the new members, the updated join dates and the skipped rows.

Common problems:

Problem	Cause	Fix
A member's office is not set.	The sync does not assign offices from the **Role** column.	Fill offices through the elections and the Grand Knight's appointments.
Excel refuses a value.	The value is not on the drop-down list or is not a date.	Choose a value from the list. Enter dates as YYYY-MM-DD.
A **Charter Member** mark is missing.	The cell was not **Yes**.	Tick **Charter member** on the member form.

14.9 Check for inactive members (the inactivity sweep)

> **Prerequisite (who can do this):** You must have council Admin privileges for the council, or Super Admin privileges.
>
> **Warning:** the check changes the status of many members at once. The check has no undo button.

Goal: Mark members **Inactive** after more days without logged service than the council allows.

Start point: Sidebar → System Settings → **Council Wide Settings** → **Roster Inactivity Sweep** card.

The **Roster Inactivity Sweep** card is the only place to run the check. The roster page and the **Financial Secretary Desk** do not show the button.

Steps:

1. Check the number of days in **Days without service before a member counts as inactive** (section 16.3). The default is 365 days.
2. Scroll to the **Roster Inactivity Sweep** card.
3. Select 🔍 **Check for Inactive Members**. The check starts at once. You cannot undo the check.
4. Read the message. The message names each member marked **Inactive**.

Expected result: Each named member shows **Inactive** in the roster.

The sweep follows these rules:

- The sweep checks active members of the type **Member** only. The sweep never changes an Admin or a Super Admin.
- The sweep counts shift hours and activity hours. A member with no hours is measured from the join date.
- The sweep skips a member with no hours and no join date.
- The platform has no background scheduler. An Admin runs the check by hand.
- The council sets the number of days in **Days without service before a member counts as inactive**.

Common problems:

Problem	Cause	Fix
A member was marked **Inactive** by mistake.	The member served but did not log hours.	Set the member's **Status** to **Active** on the member form. Ask the member to log hours.
A quiet member stays **Active**.	The member has no join date, or is an Admin.	Enter the **Date joined council**. Change an Admin's status by hand.
The card says *"Only the council's Admins and Super Admins run the sweep."*	Officers may open **Council Wide Settings**, but only Admins run the check.	Ask a council Admin to run the check.

15. Flagged hours review

15.1 Concept: the flagged hours review

The flagged hours review protects the council's hour totals from over-reporting. The platform holds some hour entries for leadership review. A held entry is flagged for review. A held entry does not count anywhere until a leader clears it. The rule covers these totals:

- The council's monthly summary and the **Executive Dashboard** hours.
- The member's canonization shield and personal hours.
- The **Top 5 Volunteers Leaderboard** and the **Council Dashboard**.

The member sees this message when the platform holds an entry: "... hours sent to leadership review before they count toward your totals." The message also gives the reason.

15.2 Concept: the 5/5 over-reporting rules

The platform holds a regular member's entry when either 5/5 rule applies. The numbers 5 and 5.0 are the defaults. Each council can change them in **Council Wide Settings** (section 16.3).

Rule	The platform holds the entry when	Example
5 activities	The entry is the member's sixth different activity on the same day.	A member logs 5 activities on Saturday. The sixth activity on Saturday goes to review.
5.0 hours	The entry puts more than 5.0 hours against one activity on one day.	A member logs 3 hours of **Food drive**. A second entry of 2.25 hours on the same day goes to review.

The two rules count in this way:

- A shift counts on the shift date. A council activity counts on the activity date.
- Held entries count toward both rules. A member cannot split hours to get past a rule.
- A second entry on an activity that the member already logged that day is not a new activity.
- On the phone **Report** tab, taps past a rule go to one held entry. The hours logged before the limit still count.

15.3 Concept: the +1 hour shift padding rule

A regular member may report up to 1.0 hour more than the scheduled shift. Set-up and clean-up often take extra time. The 1.0 hour is the default. Each council can change it in **Extra hours allowed past a scheduled shift** (section 16.3). The platform holds a shift report that is more than 1.0 hour over the scheduled length.

Scheduled shift	Largest report that counts at once	Report that goes to review
08:00 to 11:00 (3 hours)	4 hours	4.25 hours or more
18:00 to 20:00 (2 hours)	3 hours	3.25 hours or more

A shift report of more than 5.0 hours also goes to review under the 5.0-hour rule. A new report on the same shift replaces the member's report that waits for review.

15.4 Concept: who the rules do not apply to

The rules apply to regular members only. These members are exempt. The platform always logs their hours at once:

Exempt member	Why
Admins and Super Admins	They keep the council records.

Exempt member	Why
Elected officers: Grand Knight (GK), Deputy Grand Knight (DGK), Chancellor, Recorder, Treasurer, Warden, Advocate, Inside Guard and Outside Guard	The council elected them to lead.
Trustees 1, 2 and 3	The council elected them too.
The owner of the event	The owner runs the shift. The exemption covers only the shifts of the owner's own event.

Appointed officers, such as the Financial Secretary (FS), follow the rules.

A Super Admin can switch the flagged hours review off. The Super Admin turns off **Flagged hours review** in the Feature Flags Control Center (section 3). When the switch is off, every entry counts at once. The desk is hidden. Entries that wait for review stay flagged until the switch is on again.

15.5 Approve or reject held volunteer time

> **Prerequisite (who can do this):** The Grand Knight (GK), the Deputy Grand Knight (DGK) or an Admin of the council, or a Super Admin. Other members do not see the desk.
>
> **Warning:** each decision is final. You cannot change an approved or rejected entry on the desk.

Goal: Decide each held entry, so that true hours count and false hours never count.

Start point: Active Desks row → **Oversight Desk** → 🕮 **Flagged Hours Review Desk**. At the top of the **Oversight Desk**, the **[⚠ 2 Flagged Hours Entries]** badge scrolls to the same list.

Steps:

1. Read the count of pending entries in the desk header.
2. Read each entry: the member name, the shift or activity, the date and the hours.
3. Read the **Description** that the member wrote. Read the red reason under the description.
4. Ask the member or the event owner about the time when the entry is not clear.
5. Select **[▧ Approve & Add to Time Log]** for true hours. The hours count in every total at once.
6. Select **[● Reject & Remove]** for false hours. The hours never count. You cannot undo this.

Expected result: The entry leaves the desk. A message confirms the decision. An approved entry shows in the council's hours and on the member's shield.

Common problems:

Problem	Cause	Fix
The desk is not on the dashboard.	Your role is not GK, DGK or Admin, or the flagged hours review switch is off.	Ask a Super Admin to check your role and the **Flagged hours review** switch.
The desk says "has switched Flagged hours review off".	A Super Admin opened another council, and that council has the switch off.	Turn the switch on for that council, or choose another council.
An approved shift report replaced other hours.	A member has one report for each shift. Approval writes the held report over the old one.	Ask the member to report the correct hours again.
An approved activity entry is missing.	Someone deleted the activity after the member logged the time.	Restore the activity. Ask the member to log the time again.
A member says the hours are lost.	The entry waits on the desk.	Decide the entry. Tell the member that held hours count after a leader approves them.

16. Council Wide Settings and platform settings

16.1 Concept: council settings and platform settings

Some numbers belong to one council. Other numbers belong to every council at once.

Kind	Who changes it	Where	What it holds
Council Wide Settings	The council's Admins and officers, or a Super Admin	Sidebar → System Settings → **Council Wide Settings**	The volunteer time limits, the time windows and the reminder timing of one council. The **Roster Inactivity Sweep** card (council Admins and Super Admins run it).
Platform Settings	Super Admins only	Sidebar → System Settings → **Global System Parameters** → **Platform Settings**	The invitation lead time, the sign-in length, the record retention, the recording time limit and two character limits for every council
Base dues rate and tenant type	Super Admins only	Sidebar → System Settings → **Global System Parameters** → **Global Council Parameters Dashboard**	The dues rate and the organization type of one council

A new council starts with the default values. A change applies to the next entry that a member saves. A change never moves hours that are already logged or held.

The time windows and reminder days were fixed numbers in earlier versions. Each council now sets its own numbers.

The page address is `/system-settings/council-settings`. Every administration and setup page sits under the System Settings pillar. An old bookmark to `/setup/council-settings` opens the new address.

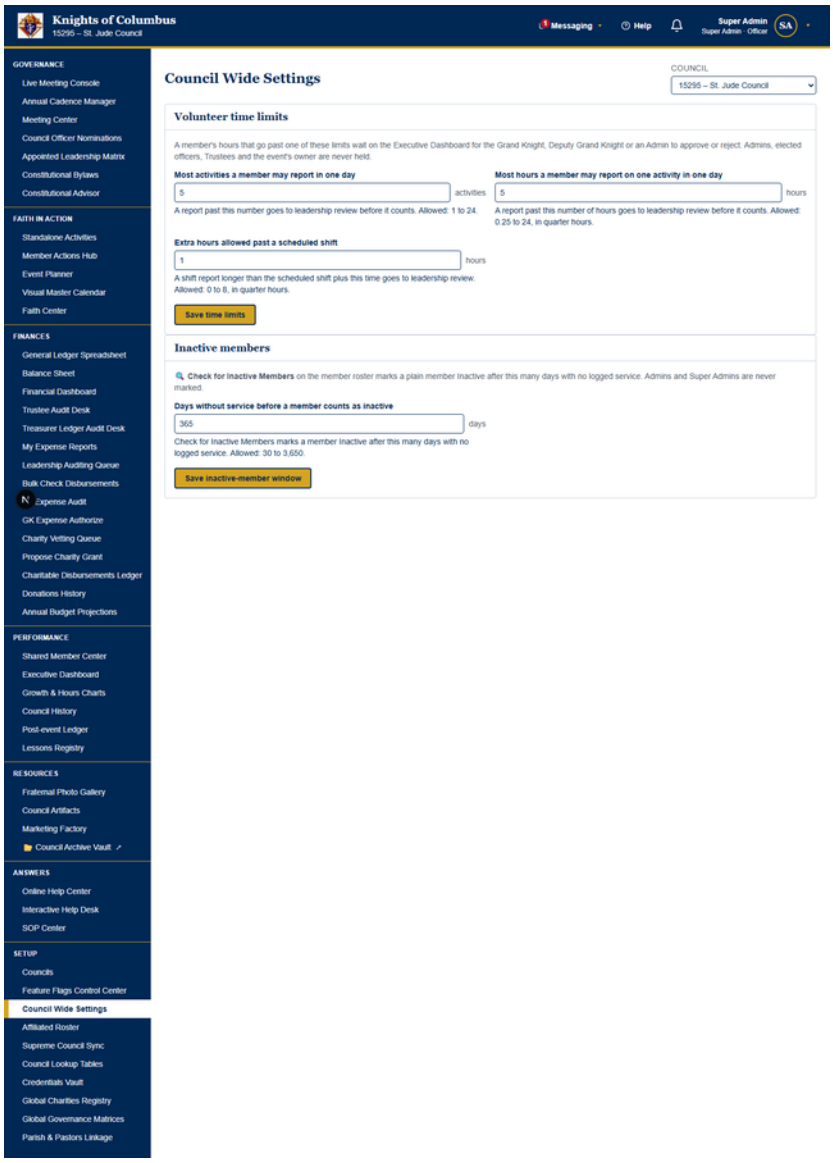

16.2 Concept: the setting cards and the (i) help

Both settings pages group the fields into cards. Each card has a navy title bar and its own save button.

Page	Cards, in order
Council Wide Settings	**Financial Submissions**, **Volunteer & Meeting Operations**, **Reminder Cadences**
Global System Parameters → Platform Settings	**Reminder Cadences**, **Sign-in & Records**, **Recording & Text Limits**

Each field has a round **(i)** button beside its label. Select **(i)** to open a help window. The help window tells where the number is used and what the number changes. The help window also shows the allowed values. Select **Close**, press **Esc** or select outside the window to close it.

Some fields show a red **Not used yet** tag. The portal saves the number for a future feature. The number changes nothing today. The help window of the field says the same.

Council Wide Settings (/setup/council-settings)

The screenshot above shows the page before the cards were added. The fields and their labels are the same.

16.3 Concept: the council settings

Financial Submissions card:

On-screen label	Default	Allowed values	What the setting controls
Days after an event or meeting to submit expenses	30 days	1 to 365	The expense filing window (section 6). A report that names an event or a meeting can be submitted from its first day through this many days after it ends.
Days before an unsubmitted expense draft expires	90 days	7 to 730	**Not used yet.** Drafts do not expire today.
Days a charity proposal stays open for a vote	14 days	1 to 90	**Not used yet.** The council votes at the next Monthly meeting at least 10 days away.

Volunteer & Meeting Operations card:

On-screen label	Default	Allowed values	What the setting controls
Most activities a member may report in one day	5	1 to 24	The 5-activity rule (section 15.2)
Most hours a member may report on one activity in one day	5.0 hours	0.25 to 24, in quarter hours	The 5.0-hour rule (section 15.2)
Extra hours allowed past a scheduled shift	1.0 hour	0 to 8, in quarter hours	The shift padding rule (section 15.3)
Days without service before a member counts as inactive	365 days	30 to 3,650	🔍 **Check for Inactive Members** (section 14.9)
Days back a member may log volunteer time	90 days	7 to 730	The logging window. A member may log shift time and activity time this many days back.
Hours before an event that gate donations open	2 hours	0 to 72, in quarter hours	How long before an event begins the phone's **Donate** screen offers it for gate donations. With 0, an event is offered only once it is under way. Members may still sign up until a shift ends.
Days after a meeting that the minutes are due	7 days	1 to 60	The **Recorder Desk** counts down to the due date: the meeting's last day plus this number. Minutes not published by then show as overdue.
Days of notice before a special election	60 days	1 to 365	**Not used yet.** A mid-year nomination stays open for 14 days.

Reminder Cadences card:

On-screen label	Default	Allowed values	What the setting controls
Days after a shift before the first hours reminder	5 days	1 to 60	The first text reminder to a volunteer with no logged hours (section 13)
Days between follow-up hours reminders	7 days	1 to 60	The follow-up text reminders (section 13)
Days before an officer is reminded to sign an expense report	3 days	1 to 60	**Not used yet.** No signature reminder is sent today.

A value of 0 for **Extra hours allowed past a scheduled shift** sends every report longer than the scheduled shift to review.

The logging window replaces two older limits: 3 months for shift time and 6 months for activity time. A council that wants the old activity limit can enter `183` days.

The logging window also ends the hours reminders. A shift older than the window shows **Closed** on the **Shifts awaiting hours** panel, and the reminders stop.

16.4 Change the Council Wide Settings

> **Prerequisite (who can do this):** You must be a council Admin or a council officer of the council, or a Super Admin. Other members do not see this page.

Goal: Set your council's volunteer time limits, time windows and reminder timing.

Start point: Sidebar → System Settings → **Council Wide Settings**.

Steps:

1. Super Admins only: choose the council in **Council** at the top of the page.
2. Find the card that holds the setting (section 16.3).
3. Optional: select **(i)** beside the field to read what the setting does. Select **Close**.

4. Enter the new number.
5. Select the save button of the card, for example **Save Financial Submissions**.

Expected result: A message says "Saved for council" with the council number. The new numbers apply from now on.

Common problems:

Problem	Cause	Fix
The page is not in the sidebar.	You are not an Admin or an officer of the council.	Ask a council Admin to make the change.
A number in another card went back to its old value.	Each card saves only its own fields.	Enter the number again and select the save button of that card.
The message says the value "must be a multiple of 0.25 hours".	Hours use 15-minute steps.	Enter a value such as `4.5` or `4.75`.
The message says the value must be "from" one number "to" another.	The value is outside the allowed range (section 16.3).	Enter a value inside the range.
The message says "Nothing changed."	Every number in the card is the same as the saved value.	Change a number, then save.
A field with **Not used yet** has no effect.	No feature reads the number yet.	No fix is needed. Keep the default.

16.5 Concept: the Global System Parameters page

The **Global System Parameters** page holds the numbers that sit above the settings of one council. Only Super Admins see the page.

Card	What the card holds	Applies to
Global Council Parameters Dashboard	The base dues rate and the tenant type (Knights of Columbus council or a white-labelled organization)	One council at a time
Platform Settings	Three cards of numbers (section 16.6)	Every council at once

The **Platform Settings** card had the name **Platform Limits** in earlier versions. The cards were on **Global Governance Matrices** before that. The **Feature Flags Control Center** holds only the on/off module switches.

16.6 Concept: the platform settings

Card	On-screen label	Default	Allowed values	What the setting controls
Reminder Cadences	**Days before a scheduled meeting that invitations appear**	5 days	1 to 60	When the invitations of a cadence meeting reach the members (section 4). Meetings that are already built keep their release dates.
Sign-in & Records	**Hours a portal sign-in lasts**	8 hours	1 to 168	When the portal server ends a web sign-in. The member then signs in again.
Sign-in & Records	**Days to keep audit records**	180 days	30 to 3,650	**Not used yet.** The portal keeps every record today.
Recording & Text Limits	**Oral history recording time limit**	900 seconds	60 to 3,600	The oral history recorder
Recording & Text Limits	**Diary entry character limit**	4,000 characters	100 to 4,000	The spiritual diary and the testimonial note
Recording & Text Limits	**Prayer intention character limit**	500 characters	50 to 500	The Council Prayer Intentions List

A sign-in that already started keeps its old end time. The new sign-in length applies from the next sign-in.

16.7 Change the platform settings

> **Prerequisite (who can do this):** You must be a Super Admin.
>
> **Warning:** the settings apply to every council at once.

Goal: Set the numbers that every council shares.

Start point: Sidebar → System Settings → **Global System Parameters** → **Platform Settings**.

Steps:

1. Find the card that holds the setting (section 16.6).
2. Optional: select **(i)** beside the field to read what the setting does. Select **Close**.
3. Enter the new number.
4. Select the save button of the card, for example **Save Sign-in & Records**. The new numbers apply to every council at once.

Expected result: A message says "Platform settings saved." When you change **Hours a portal sign-in lasts**, the message also says that the portal server uses the new sign-in length from the next sign-in.

Common problems:

Problem	Cause	Fix
A character limit does not go above its default.	The default is the largest size that the council records can store.	Keep the limit at the default or lower.
A recording stopped early.	The recording time limit is lower than the speaker needed.	Raise the limit. The largest value is 3,600 seconds (60 minutes).
The message says that the portal server did not take the new sign-in length.	Your web sign-in on the server ended.	Sign out. Sign in again. Save the number again.
Meeting invitations still appear 5 days before the meeting.	The meetings were built before the change.	No fix is needed. Meetings built after the change use the new number.

16.8 Set a council's base dues rate and tenant type

> **Prerequisite (who can do this):** You must be a Super Admin.
>
> **Warning:** a new tenant type changes the sidebar and the labels of every member of the council at once.

Goal: Set the base dues rate and the tenant type of one council.

Start point: Sidebar → System Settings → **Global System Parameters** → **Global Council Parameters Dashboard**.

Steps:

1. Choose the council in **Council**.
2. Choose the **Tenant type**: `KOFC` or `GENERIC`.
3. Enter the **Base dues rate** in dollars.
4. Select **Save council parameters**.

Expected result: A message shows the council number, the tenant type and the new base dues. The dues forecast uses the new rate.

Common problems:

Problem	Cause	Fix
The message says "Enter a base dues rate."	The rate box is empty.	Enter the rate, then save.
The Faith Center and the Supreme Council Sync left the sidebar.	The tenant type is a white-labelled organization.	Choose the Knights of Columbus tenant type again.

17. Access requests, check payments, asset photos, impersonation and remote help

17.1 Concept: council access requests

A council that is not on the platform can ask for access from the sign-in page. The sign-in page has a 🏢 **Register Your Council / Request Access** button on the web and on the phone.

The form asks for four items: the council name, a contact email, the city and the state. Anyone can send the form. The person does not need an account.

The platform saves each request as **Pending**. The platform also emails a notice to `council15295@stmarys.org`. Super Admins read the requests in the **Inbound Council Mail Center** card on the **Oversight Desk** of the dashboard.

Approving a request marks the request as reviewed. Approving does not create the council. A Super Admin adds the council on the **Councils** page.

Rule	Value
Requests from one contact email	3 in one hour
Requests from one network address	10 in one hour
Status values	Pending, Approved

> The web portal keeps requests on the portal server. A server restart clears them until the production database is connected. A request sent from the phone stays on that phone.

17.2 Approve a council access request

> **Who can do this:** Super Admins. Other members do not see the Inbound Council Mail Center.

Goal: Mark a council's access request as reviewed.

Start point: Active Desks row → **Oversight Desk** → **Inbound Council Mail Center**. At the top of the **Oversight Desk**, the 📨 **Access Requests** badge scrolls to the same card.

Steps:

1. Read the council name, the city, the state and the contact email of the request.
2. Select the contact email to write to the council, if you need more information.
3. Select **Approve**.
4. Open Sidebar → System Settings → **Councils** to add the council.

Expected result: The request shows a gold **Approved** label. The pending count in the card title goes down by 1.

Common problems:

Problem	Cause	Fix
The card says "No council has asked for access yet."	No request reached the portal server.	Ask the council to send the form again from the web sign-in page.
The card shows an error about the session.	Your server session ended.	Sign out, then sign in again.

17.3 Concept: payment methods in the ledger

The ledger records how money came in. The **Payment method** list on the revenue card uses the same payment methods as the donation screens.

Payment method	Kind	Check number
Cash	Paper money	No
Credit Card	Card payment	No
Venmo	Electronic payment by QR code	No
Zelle	Electronic payment by QR code	No
Zeffy	Electronic payment by QR code	No
Parishsoft	Electronic payment by QR code	No
Check	Paper check	Yes, required

- The list shows only the methods that the council turned on. An Admin turns methods on in Sidebar → System Settings → **Council Lookup Tables**.
- **Physical Items** is never a payment method, because items are not money.
- An older ledger line, or a line that is not a payment, has no payment method.

A donation by check counts in the cash column of the event, because the council deposits checks with the cash. The donation records the check number too (section 17.3.1).

17.3.1 Concept: check numbers on donations

A donation by check now records the number printed on the check. The number helps the Financial Secretary match each check to the bank deposit.

- On the phone, the **Donate** tab shows a **Check** tile when the council turned Check on. The Check form has a **CHECK NUMBER (REQUIRED)** field.
- On the web, the **Donations History** form shows a **Check number** field when **Check** is the method.
- A donation by check cannot be saved without a check number. A donation by any other method cannot have a check number.

17.3.2 Record a donation by check on the phone

> **Who can do this:** Every member who takes donations.

Goal: Record a check donation with its check number.

Start point: Phone → **Donate** tab.

Steps:

1. Tap the **Check** tile.
2. Enter the amount in **AMOUNT**.
3. Enter the number printed on the check in **CHECK NUMBER (REQUIRED)**.
4. Choose the **DONATION TYPE**.
5. Enter the donor name, if the donor gives it.
6. Tap **Record donation**.

Expected result: A message says "Recorded" with the amount and "by Check". The donation shows in the list.

Common problems:

Problem	Cause	Fix
The message says "Enter the check number printed on the check."	The **CHECK NUMBER (REQUIRED)** field is empty.	Enter the check number, then tap **Record donation** again.

Problem	Cause	Fix
There is no **Check** tile.	The council did not turn Check on.	Ask an Admin to turn Check on in **Council Lookup Tables**.

17.4 Log revenue and its payment method

> **Who can do this:** The council's Treasurer or a Super Admin.
>
> **Warning:** The revenue posts to the general ledger at once.

Goal: Record event or activity revenue and how the council received the money.

Start point: Sidebar → Finances → **Financial Dashboard** → 💰 **Log Concluded Event Revenues**.

Steps:

1. Select the event or activity in **Event or activity**.
2. Enter the amount in **Funds collected**.
3. Select the **Revenue account** and the **Deposited to** account.
4. Select the method in **Payment method**: Cash, Credit Card, Venmo, Zelle, Zeffy, Parishsoft or Check.
5. If you selected **Check**, enter the number in **Check number**.
6. Select **Save to the ledger**. The revenue posts to the ledger at once.

Expected result: A message shows the amount and the revenue account. Both ledger lines show the payment method. A check payment also shows the check number.

Common problems:

Problem	Cause	Fix
The message says "Enter the check number of a payment by check."	The **Check number** box is empty.	Enter the check number, then save.
A method, such as Zeffy, is not in the **Payment method** list.	The council did not turn that method on.	Ask an Admin to turn the method on in **Council Lookup Tables**.
The message says the method "is not one this council has enabled for payments."	An Admin turned the method off after the page opened.	Reload the page, then choose an enabled method.

17.5 Concept: asset photos in Google Drive

Each council asset can have one photo. The portal files every asset photo in the council's shared Google Drive. Each asset has its own folder:

```
Fraternal Enterprise Suite / Assets / <asset name>
```

The asset record keeps the Drive file. The photo stays with the asset for every member who opens the asset, on any computer and on the phone. An Admin does not need to upload the photo.

Who	Sees the inventory	Adds or removes a photo	Changes the name, status, serial number, location and notes
Grand Knight, Deputy Grand Knight (DGK), Admins, Financial Secretary, Treasurer, Super Admins	Yes	Yes	Yes
Trustees	Yes	Yes	No
Other members	No	No	No

The Deputy Grand Knight is a full asset manager because the DGK directs the council's programs and their equipment.

The portal accepts image files up to 25 MB. The council's Google Drive must be connected in **Credentials Vault**. When Drive is not connected, the portal saves no photo.

On the phone, the **Council assets** button on the **Home** tab opens a list of the assets with their photos. The phone list is for viewing only.

17.6 Add a photo to a council asset

> **Who can do this:** The council's Grand Knight, Deputy Grand Knight, Trustees, Admins, Financial Secretary and Treasurer, or a Super Admin.

Goal: File a photo of the item in the council Google Drive and attach the photo to its asset record.

Start point: Sidebar → Finances → **My Expense Reports** → **Council assets** → **Edit** (or **Add photo**) on the asset row.

Steps:

1. Select **Upload photo** in the **Asset photo** box.
2. Choose an image file. The portal files the photo in Drive at once.
3. To change the photo, select **Replace photo** and choose another image.
4. To remove the photo from the asset, select **Remove photo**. The file stays in Drive.

Expected result: The photo shows on the asset form. The message says "Saved the photo of" and the asset name. The photo is in Drive under **Assets / <asset name>**. The inventory and the phone list show the photo.

Common problems:

Problem	Cause	Fix
The message says "The Drive vault is not configured." or "DRIVE_VAULT_LIVE is not on."	The council's Google Drive is not connected or not switched on.	Ask an Admin to connect Google Drive in **Credentials Vault**. Ask the portal host to switch the Drive vault on.
The message says the file "is not a file type the Assets folder takes."	The file is not an image.	Choose a photo file.
The message says "Google Drive did not accept the photo. Try again later."	Google Drive did not answer.	Wait a few minutes, then upload the photo again.
The form shows the details but no **Save asset details** button.	You are a Trustee.	Ask an asset manager to change the details. You can still add the photo.

17.7 Concept: user impersonation (view as a member)

A Super Admin can see the portal exactly as one member sees the portal. Use this to check a member's sidebar, pages and permissions.

Rule	Value
Who can start the view	Active Super Admins only
Who can be viewed	Any member except yourself and other Super Admins
Saving in the view	Not possible. Every save is refused.
Longest view	60 minutes, or until your own sign-in ends
Record	The portal server logs each start and stop

The portal server holds both sign-ins in signed cookies. The browser cannot read or change them. A gold bar across the top of the portal shows whose view is open.

The view uses the member's own council. The member can belong to a council other than your council. The portal then switches to that council's settings before the first page opens:

- the council's modules (the feature flags)
- the council's organization type and its labels
- the council's timing settings, for example the expense filing window
- the council's ledgers, desks and rosters

The gold bar names the member's council. When you select **Return to my account**, the portal switches back to your own council.

Super Admins find members in two places. The **Affiliated Roster** shows one council at a time. The **View-As Member Lookup** page shows every council in one tree.

17.8 View the portal as another member

> **Who can do this:** Super Admins. Other members do not see the **Impersonate User** button.

Goal: See the portal with one member's sidebar, pages and permissions.

Start point: Sidebar → System Settings → **Affiliated Roster**.

Steps:

1. Find the member in the roster table.
2. Select **Impersonate User** in the **Actions** column.
3. Look at the pages. The portal opens on the member's hub.
4. Select **Return to my account** in the gold bar to end the view.

Expected result: The gold bar says "You are viewing the portal as" and the member's name. After **Return to my account**, your own sidebar comes back.

Common problems:

Problem	Cause	Fix
A save fails with "You are viewing the portal as another member, so nothing can be saved."	The view is read-only.	Select **Return to my account**, then make the change as yourself.
The row has no **Impersonate User** button.	The member is you or another Super Admin.	You cannot view as a Super Admin.
An error says "The server did not answer, so the view could not start."	The portal server cannot see the member or your session ended.	Sign out, sign in again, then try again.

17.8.1 Find a member in any council and view as that member

> **Who can do this:** Super Admins. Other members do not see this page.

Goal: Find one member among all councils without a long scroll, then view the portal as that member.

Start point: Sidebar → System Settings → **View-As Member Lookup**.

Steps:

1. Type part of a name, member number, email, role or council number in the search box.
2. Read the suggested names under the box. Names that start with your text come first.

3. Select **View as** beside the member. Go to step 7.
4. To browse without a search, select a council in the **Council directory**. The council opens.
5. Select a group in the council: **Executive Officers**, **Finance Officers**, **Recorder & Historian**, **Other Officers**, **Council Admins**, **Appointed Seats** or **Members**.
6. Select **View as** beside the member.
7. Look at the pages. The portal opens on the member's hub, with the member's council settings.
8. Select **Return to my account** in the gold bar to end the view.

Expected result: The gold bar names the member and the member's council. The sidebar, desks and settings are the member's own.

Common problems:

Problem	Cause	Fix
A member is not in the tree.	The member is you or another Super Admin.	You cannot view as a Super Admin.
"Nobody you may view as matches"	No member matches every word you typed.	Type fewer words.
A member shows in one group only.	Each member shows in the group of the highest seat. A Grand Knight who is also an Admin shows under **Executive Officers**.	Look in the group of the member's highest seat.

17.9 Concept: co-watching remote assistance

An officer or Admin who needs help can share a copy of the screen with the Super Admins. The officer starts and stops the sharing. Nothing is shared until the officer selects **Share my screen**.

- The copy refreshes every 5 seconds while the officer shares.
- The copy never contains what the officer types in form fields. Passwords are never sent.
- The copy cannot run on the Super Admin's computer. The desk shows the copy as a still picture of the page.
- Sharing stops when the officer selects **Stop sharing**, when a Super Admin closes the request, or after 30 minutes without an update.

17.10 Ask for remote help

> **Who can do this:** Officers and Admins. Members and Super Admins do not see the button.

Goal: Let a Super Admin see your screen while you get help.

Start point: The portal header → **? Request Remote Officer Assistance**.

Steps:

1. Select **? Request Remote Officer Assistance**.
2. Enter what you need in **What do you need help with? (optional)**.
3. Select **Share my screen**.
4. Go to the page you need help with. The Super Admin sees each page you open.
5. Select **Stop sharing** when you finish.

Expected result: The header button turns red and says **● Sharing screen · Stop sharing**. After **Stop sharing**, the button goes back to **? Request Remote Officer Assistance**.

Common problems:

Problem	Cause	Fix
The request fails with a session message.	Your server session ended.	Sign out, then sign in again.
The red button changed back by itself.	A Super Admin closed the request, or 30 minutes passed.	Send a new request if you still need help.

17.11 Watch an officer's screen

> **Who can do this:** Super Admins. Other members do not see the Remote Assistance Desk.

Goal: See the screen an officer shares and guide the officer.

Start point: Sidebar → System Settings → **Remote Assistance Desk**.

Steps:

1. Select a request in **Open requests**.
2. Read the officer's note and the page name.
3. Look at the screen copy in the right panel. The copy refreshes every 5 seconds.
4. Guide the officer by phone or by message.
5. Select **Close request** when the officer has the answer.

Expected result: The right panel shows the officer's page at the officer's window size. After **Close request**, the request leaves the list.

Common problems:

Problem	Cause	Fix
The panel says "That request is closed."	The officer stopped sharing.	Ask the officer to send a new request.
The form fields in the copy are empty.	The platform never sends what the officer types.	Ask the officer to read the values to you.

18. Annual roadmap, meeting check-in and meeting photos

18.1 Concept: the Annual Fraternal Roadmap

The **Annual Fraternal Roadmap** is a card on the **Executive Dashboard** page. The top of the page shows the same steps as one line, the roadmap ribbon. The card shows the three steps that hand the council over to its next fraternal year. A cycle carries the calendar year of its steps. The 2027 cycle elects and budgets the 2027-2028 fraternal year.

Step	Window	The portal marks the step done when
Nominations	May 1 - May 31	A nomination is recorded for the coming fraternal year, or the officers are seated.
Elections	June 1 - June 30	An officer is seated for the coming fraternal year. Concluding the fraternal year seats the officers.
Budget Lock	July 1 - July 10	The coming year's budget is approved.

Each step has one of four looks:

Look	Label	Meaning
Navy circle with ✓	**Done**	The database shows the step done.
Heavy gold border	**Up next**	The first step that is not done and not past its due date.
Red circle with !	**Overdue**	The due date passed and the step is not done.
Plain outline	**Later**	A step after the next one.

The card opens on the current cycle. The current cycle changes to the next year 30 days after the July 10 Budget Lock. Use the year arrows to see an earlier or later cycle.

Overdue alerts. When a step is overdue, the card sends a push alert to the council's leaders. The leaders are the Grand Knight, the Deputy Grand Knight, the Financial Secretary, the Treasurer and the council's Admins. Each leader gets one alert for each overdue step in each cycle. The alert title is **Overdue: Nominations 2027**, **Overdue: Elections 2027** or **Overdue: Budget Lock 2027**. The alert also shows in each leader's alert list on the phone.

18.2 Read the roadmap and send the overdue alerts

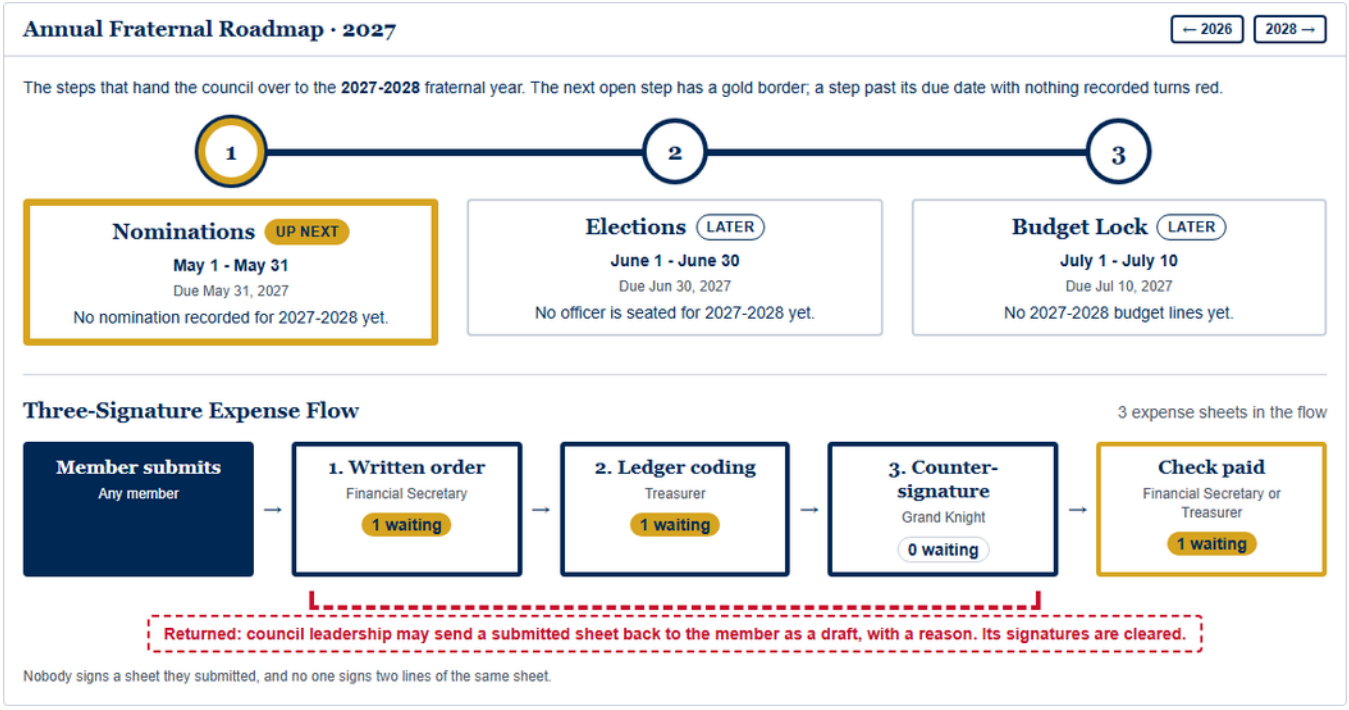

> **Who can do this:** the council's Admins and officers, and Super Admins. Other members do not see the **Executive Dashboard**.
>
> **Warning:** opening the card with an overdue step sends a push alert to the council's leaders. You cannot recall an alert.

Goal: See where the council stands on its yearly hand-over, and alert the leaders to a missed step.

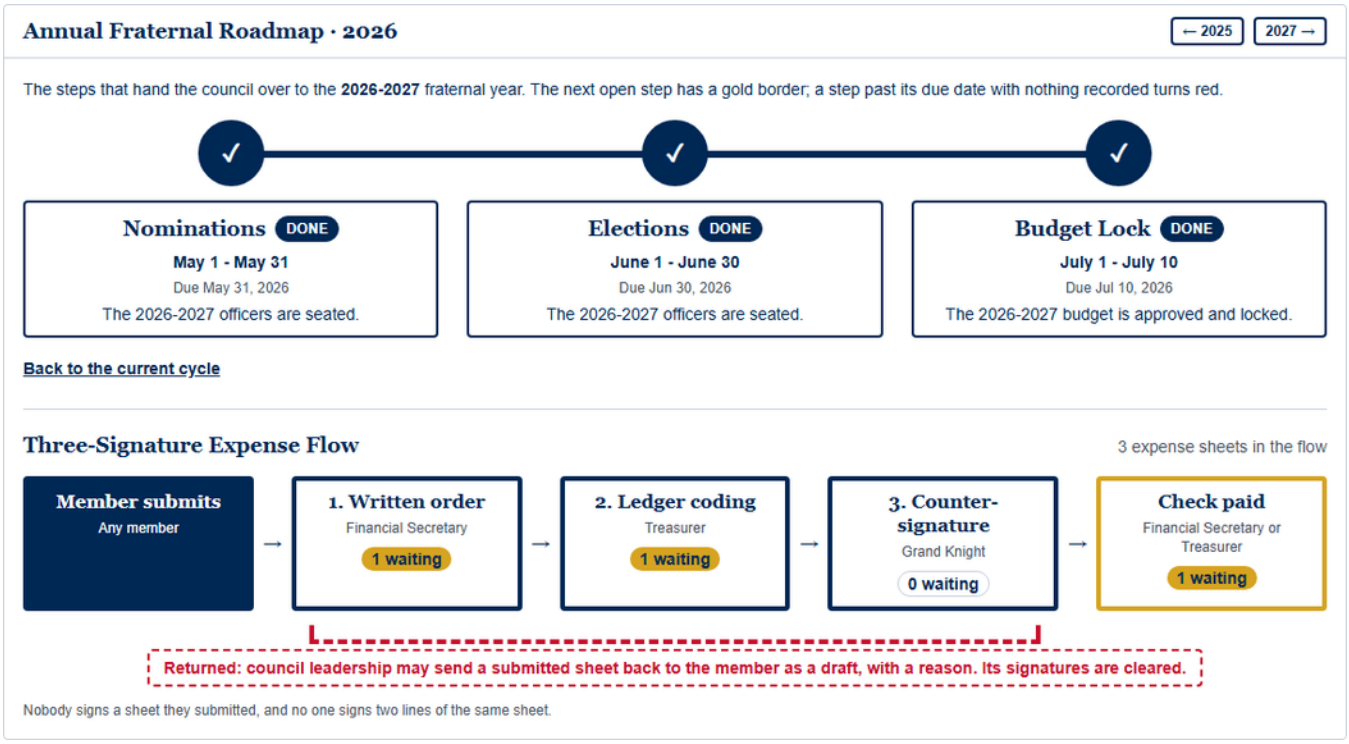

Start point: Sidebar → Performance → **Executive Dashboard**. Select **Full roadmap** ↓ in the roadmap ribbon. The page scrolls to the card.

Steps:

1. Scroll to the **Annual Fraternal Roadmap** card.
2. Find the step with the gold border. That step is next.
3. Read the line under each step. The line says what the database shows.
4. Check for a red step. When a red step shows, the card sends the overdue alert at once.
5. Read the note under the steps. The note says how many leaders got the alert.
6. Optional: select ← **2026** or **2028** → to see another cycle. Select **Back to the current cycle** to return.

Annual Fraternal Roadmap with Nominations up next (/dashboard)

Annual Fraternal Roadmap with all three steps done (/dashboard)

Expected result: The card shows the three steps of the cycle. After an alert, the note says *"Push alert sent to 4 council leaders for 1 overdue step."*

Common problems:

Problem	Cause	Fix
"Council leadership already has the alert for each overdue step."	The leaders got the alert on an earlier visit.	No action. The portal sends each alert one time.

Problem	Cause	Fix
Elections stays **Overdue** after the vote.	The fraternal year is not concluded, so no officer is seated for the new year.	Conclude the fraternal year on the elections page.
Budget Lock stays **Overdue**.	The coming year's budget is still Draft or Proposed.	Approve the budget on the budget page.
A leader got no push on the phone.	The leader's phone has no registered device.	The alert still shows in the leader's alert list.

18.3 Concept: the Three-Signature Expense Flow

Under the roadmap, the **Three-Signature Expense Flow** draws the path of an expense report. Each box shows how many of the council's reports wait at that step.

Box	Who acts	What the step does
Member submits	Any member	The member submits the expense report.
1. Payment request	Financial Secretary	The Financial Secretary audits the report and issues the payment request.
2. Ledger coding	Treasurer	The Treasurer picks the budget line and the ledger account.
3. Counter-signature	Grand Knight	The Grand Knight signs. The report becomes Approved.
Check paid	Financial Secretary or Treasurer	The check is recorded. The report becomes Reimbursed.

- Council leadership may return a submitted report to the member as a draft, with a reason. The return clears the report's signatures.
- Nobody signs a report that they submitted. One officer never signs two lines of the same report.

18.4 Concept: meeting check-in by GPS or PIN

Members check in to a live meeting from the phone with 📍 **Check In to Meeting**. The phone sends its location one time. The portal accepts the check-in when two things are true:

- The phone is inside the council's circle: no farther from the meeting point than the check-in radius (100 m by default).
- The phone's location is at least as precise as the check-in radius.

When the location check fails, the phone asks for the 4-digit **meeting PIN**. The Grand Knight reads out the PIN at the meeting. After 5 wrong PINs, the PIN box locks for that member and that meeting. An officer then checks the member in on the **Live Meeting Console**.

- The default meeting PIN is `0000`. Change the PIN before the first meeting.
- Only the Grand Knight, the council's Admins and Super Admins see or change the PIN. The PIN is not sent to members' phones.
- Without a meeting point, GPS check-in is off and every member uses the PIN.

18.5 Set the meeting location and the meeting PIN

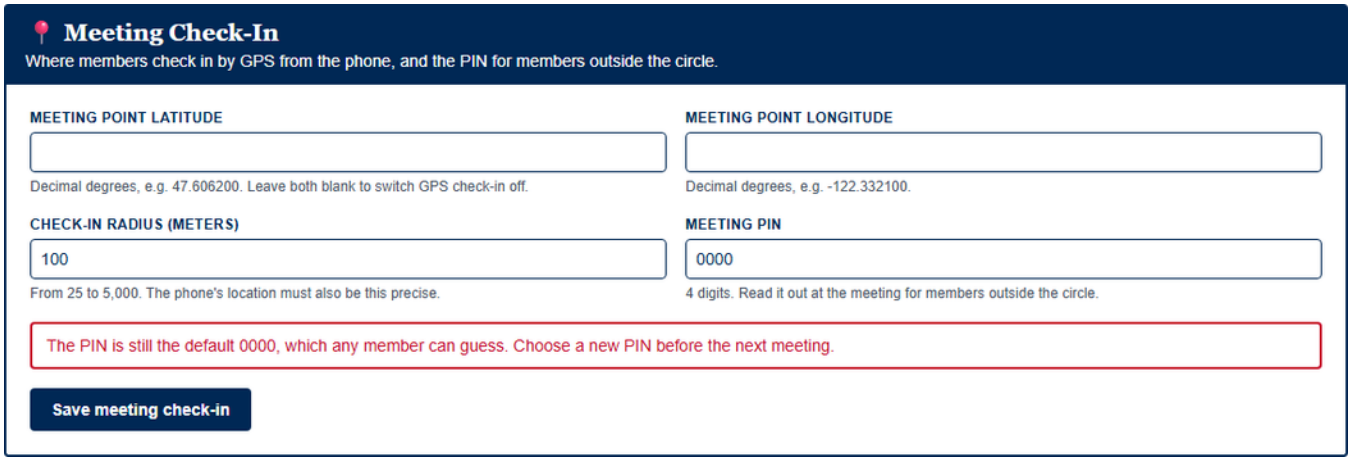

> **Who can do this:** the council's Grand Knight, Deputy Grand Knight and Admins, and Super Admins. Other officers do not see the 📍 **Meeting Check-In** card.
>
> **Warning:** a new PIN takes effect at once. Members who know only the old PIN cannot check in with the PIN.

Goal: Set where the council meets, how close a phone must be, and the meeting PIN.

Start point: Sidebar → System Settings → **Council Wide Settings** → 📍 **Meeting Check-In**.

Steps:

1. Find the meeting hall on a map. Copy its latitude and longitude in decimal degrees.
2. Enter the latitude in **Meeting point latitude**, for example `47.606200`.
3. Enter the longitude in **Meeting point longitude**, for example `-122.332100`.
4. Enter the circle size in **Check-in radius (meters)**, from 25 to 5,000.
5. Enter 4 digits in **Meeting PIN**.
6. Select **Save meeting check-in**.

Meeting Check-In card with the default PIN warning (/setup/council-settings)

Expected result: The card says *"Saved. Phones within 100 m of the meeting point can check in by GPS; others use the PIN."*

Common problems:

Problem	Cause	Fix
"The PIN is still the default 0000, which any member can guess. …"	The PIN is `0000`.	Enter a new 4-digit PIN. Select **Save meeting check-in**.
"The meeting PIN must be exactly 4 digits."	The PIN has letters, or too few or too many digits.	Enter 4 digits.
"Enter the latitude and the longitude together."	One coordinate is empty.	Fill in both coordinates, or clear both.
"The check-in radius must be a whole number of meters from 25 to 5,000; …"	The radius is out of range.	Enter a whole number from 25 to 5,000.
Members inside the hall get *"Your phone's location is only accurate to … m, …"*	Phones are less precise indoors.	Enter a larger radius, for example 150.
"Saved. No meeting point is set, so members check in with the PIN only."	Both coordinates are blank.	Enter both coordinates to turn GPS check-in on.

18.6 File a meeting photo with the minutes

> **Who can do this:** the meeting's chair: the meeting owner, the council's Admins and officers, and Super Admins.

Goal: Keep one photo of the meeting with its minutes, in the council's Google Drive.

Start point: Sidebar → Governance → **Live Meeting Console** → **Meeting photo**.

Steps:

1. Pick the meeting and start the console.
2. Scroll to the **Meeting photo** panel, under **Live attendance**.

3. Select **Upload photo**.
4. Choose the photo file.
5. To change the photo, select **Replace photo**. To remove the photo, select **Remove photo**.

Expected result: The photo shows in the panel. An Admin's upload is filed in Google Drive under **Fraternal Enterprise Suite / Media / Meeting_Photos**.

Common problems:

Problem	Cause	Fix
The photo is gone after you reload the page.	The upload was not filed in Drive: the uploader is not an Admin, or the council's Drive is off.	Ask an Admin to upload the photo. Turn on Drive in the **Credentials Vault**.
"Google Drive did not accept the file."	Drive refused the upload.	Try again later.
Members' own photos are not in the panel.	A member's check-in photo stays on the member's phone.	Ask the member to send the photo to an Admin.

---

19. The Active Desks dashboard

19.1 Concept: the Active Desks row

The dashboard is a set of desks. A row of folder tabs sits under the navy header on every page. The row has the title **Active Desks**.

- Each tab looks like the tab of a paper file folder. A navy outline frames each tab.
- The open desk is white and raised. A deep gold edge runs along its top.
- **Home** is the first tab. **Member Desk** is the last tab.
- Select a tab on any page. The dashboard opens on that desk.
- Select the **Home** tab to return to **Home** from any page.
- Select **Executive Dashboard** in the sidebar to open the **Executive Summary** page. That page is not a desk tab. See section 19.13.

Only readers who may open the dashboard see the row. These readers are the council's Admins and officers, the Council Historian, and Super Admins.

A Council Historian without an officer seat and without Admin rights gets two tabs only: **Historian Desk** and **Member Desk**. This Historian does not get **Home**. This Historian still gets the **Executive Dashboard** link in the sidebar (section 19.13).

After you sign in, the portal opens on the dashboard **Home** desk when you hold an officer seat or Admin rights. A member without an officer seat or Admin rights opens on **Member Actions**.

Every full desk page stays in the sidebar. The **Leadership Auditing Queue** page left the sidebar. Open the page from the **Financial Secretary Desk**.

19.2 Concept: the Home desk

The **Home** desk fits on one laptop or desktop screen. You do not scroll the page. **Home** holds six cards in two rows, and nothing else. Each card has a fixed height. A long list scrolls inside its own card.

Card on Home	What the card shows
Bible Verse of the Day	One verse for the day, from the NABRE.
Live Actionable Reminders	Your own unread alerts and the sheets that wait for your signature. A red edge is urgent. The card refreshes every minute.
Liturgical Feast Day Tracker	Today's feast day and the feasts of the coming days. A holy day of obligation is marked.
Today's Event Agenda	The council's events and meetings for today, with the time and the place.
Open Volunteer Shifts	Shifts in the next 30 days that still need volunteers, with the number still needed. Select **Sign up** to take a shift.
Top 5 Fraternal Volunteers	A navy card with a gold edge. The 5 active members of the council with the most hours logged at council events and activities in the current month, with their hours.

The **Top 5 Fraternal Volunteers** card counts only the current month. The card starts empty on the first day of each month. Members with equal hours share a place. The **Top 5 Volunteers Leaderboard** on the **Executive Dashboard** and the **Council Dashboard** counts all hours ever logged.

Home has no status badges, roadmap ribbon or **Executive Summary**. The status badges are at the top of the **Oversight Desk** (section 19.3). The roadmap ribbon and the **Executive Summary** are on the **Executive Dashboard** page (section 19.13).

The status badges at the top of the **Oversight Desk**:

Badge	Desk it opens	Who sees the badge
[3 Approved Expenses Awaiting Payment]	**Grand Knight Desk → Approved Expense Release queue**	The Grand Knight (GK), the Deputy Grand Knight (DGK), the council's Admins and Super Admins
[2 Payment Requests Waiting]	**Financial Secretary Desk → Payment-request queue**	The Financial Secretary (FS), the council's Admins and Super Admins
[1 Sheet to Code]	**Treasurer Desk → Ledger Line Coder queue**	The Treasurer, the council's Admins and Super Admins
[2 Minutes Due]	**Recorder Desk → Business calendar**	The Recorder, the council's Admins and Super Admins
[⚠ 2 Flagged Hours Entries]	**Oversight Desk → Flagged Hours Review Desk**	The GK, the DGK, the council's Admins and Super Admins, while **Flagged hours review** is on
[1 Access Request]	**Oversight Desk → Inbound Council Mail Center**	Super Admins only. A council Admin never sees the badge.
[4 Shifts Awaiting Hours]	**Oversight Desk → Shifts awaiting hours**	The council's officers and Admins, and Super Admins
[2 Open Sheets of Mine]	**Member Desk → My open expense sheets**	Every reader of the dashboard

A badge with work waiting is filled with gold. The flagged hours badge is red. A badge with a count of 0 is white.

Each badge is a link. Select a badge. The desk of the badge opens, and the matching list scrolls into view. A gold ring shows around the list for 2 seconds.

The **Bible Verse of the Day** and the **Liturgical Feast Day Tracker** show only while the council's **Faith Center** module is on. A white-label organization does not see the two faith cards. **Home** then shows the other four cards.

19.3 Concept: the desks

A desk summarizes the work of one seat. A desk links to its full desk page. You sign on the full desk page. The desks never sign, code or release a sheet.

The portal shows a desk tab only to a reader who may do the desk's work.

Tab	Who gets the tab	What the tab shows	Full desk page
Grand Knight Desk	The council's GK and DGK, the council's Admins and Super Admins	The **Approved Expense Release queue**: sheets that carry the FS order and the Treasurer's coding. A link to the disbursement vault. For the GK, the DGK and Super Admins, the **Cross-Council Loaner Library** controls (section 20.3).	Sidebar → Finances → **GK Expense Authorize**
Financial Secretary Desk	The council's FS, the council's Admins and Super Admins	The **Payment-request queue**, the count of all sheets in the leadership queue, and the **Excel roster imports** card.	Sidebar → Finances → **FS Expense Audit**
Treasurer Desk	The council's Treasurer, the council's Admins and Super Admins	The **Ledger Line Coder queue**: sheets that wait for a budget line and a ledger account. A link to the general ledger.	Sidebar → Finances → **Treasurer Ledger Audit Desk**
Recorder Desk	The council's Recorder, the council's Admins and Super Admins	The **Start Live Meeting Sequence** button with the meeting PIN, the **Business calendar** with the minutes countdown of each meeting, and the **Meeting Minutes Entry Desk**.	None. The desk is the full page.

Tab	Who gets the tab	What the tab shows	Full desk page
Historian Desk	The council's Council Historian, the council's Admins and Super Admins	The **Digital Fraternal Annals Scrapbook**: monthly newsletters, meeting photos and oral history recordings.	Sidebar → Performance → **Council History**
Oversight Desk	The council's officers and Admins, and Super Admins	The status badges of every queue you may work, then the **Shifts awaiting hours** audit. The GK, the DGK, the council's Admins and Super Admins also get the 🕳 **Flagged Hours Review Desk** (section 15). Only Super Admins get the **Inbound Council Mail Center** (section 17).	None. The desk is the full page.
Member Desk	Every reader of the dashboard	**[🚗 Open Shifts Needing Volunteers]**, **[📥 My Charity Requests]**, **My open expense sheets** and **My shifts: next 30 days**.	Sidebar → Finances → **My Expense Reports**; Sidebar → Performance → **Council Dashboard**

A seat clears a desk only on the officer's own council. A Super Admin who picks another council in the council drop-down sees every desk of that council.

Earlier sections of this guide name the **Executive Dashboard** as a start point. For those tasks, select **Executive Dashboard** in the sidebar. The **Executive Summary** page opens.

Each tab has its own web address. The address is the dashboard address with the tab name after a # sign:

Tab	Address
Home	`/dashboard#home`
Grand Knight Desk	`/dashboard#grand-knight`
Financial Secretary Desk	`/dashboard#financial-secretary`
Treasurer Desk	`/dashboard#treasurer`
Recorder Desk	`/dashboard#recorder`
Historian Desk	`/dashboard#historian`
Oversight Desk	`/dashboard#oversight`
Member Desk	`/dashboard#member`

Save a desk address as a browser bookmark to open the desk directly. The browser also remembers the last tab you opened. The dashboard opens on that tab the next time. A tab you cannot open falls back to your first tab. For most readers, the first tab is **Home**.

19.4 Read the Home desk

> **Who can do this:** the council's Admins and officers, and Super Admins. Other members do not see the **Dashboard**.

Goal: See your reminders, today's agenda, the open shifts and the month's top volunteers, on one screen.

Start point: Active Desks row → **Home**.

Steps:

1. Select the **Home** tab. The portal opens on **Home** after you sign in.
2. Read the **Live Actionable Reminders** card. Select a reminder link to open its full desk page.

3. Read **Today's Event Agenda**. Select an event name to open the council calendar.
4. Read the **Open Volunteer Shifts** card. Select **Sign up** beside a shift to take that shift.
5. Read the **Top 5 Fraternal Volunteers** card for the month's top volunteers and their hours.
6. To see the status badges, select the **Oversight Desk** tab.
7. To see the **Executive Summary**, select **Executive Dashboard** in the sidebar.

Expected result: Home shows the six cards without a page scroll. After **Sign up**, the card shows *"You are signed up for ..."* and the shift leaves the list.

Common problems:

Problem	Cause	Fix
The verse and the feast tracker do not show.	The council's **Faith Center** module is off, or the organization is white-label.	Ask a Super Admin to turn on **Faith Center** on the **Feature Flags** page.
The status badges are not on **Home**.	The badges moved to the top of the **Oversight Desk**.	Select the **Oversight Desk** tab.
A badge you expect does not show.	Your seat does not clear that desk, or the module is off.	Ask the officer who holds the seat.
"No member has logged hours this month yet."	No active member of the council logged hours in the current month.	No action. The card fills when members log hours.
"Every shift in the next 30 days has its volunteers."	No shift in the next 30 days is short of volunteers.	No action.
"You are all caught up. Nothing needs your action."	No sheet waits for your signature, and you have no unread alert.	No action.
The page scrolls on a small screen.	The screen is shorter than a laptop screen.	Use a laptop or desktop screen, or zoom the browser out.
"No event or meeting today."	The council calendar has nothing on today's date.	Open the council calendar to see coming events.

19.5 Release approved expenses from the Grand Knight Desk

> **Who can do this:** the council's Grand Knight, Deputy Grand Knight and Super Admins sign. The council's Admins read the desk.
>
> **Warning:** the final release sets the sheet to **Approved** and sends the sheet to payment. You cannot undo the release.

Goal: Find the sheets that wait for the final release, and release them.

Start point: Active Desks row → **Grand Knight Desk**.

Steps:

1. Select the **Grand Knight Desk** tab.
2. Read the **Approved expenses waiting for release** count.
3. Read the **Approved Expense Release queue** grid. The **Signed so far** column names the FS and the Treasurer.
4. Select **Release approved expenses on the full desk**. The **GK Expense Authorize** page opens.
5. Select ✍ **Final Release for Payment** on each sheet. You cannot undo the release.

Expected result: The released sheets leave the queue. The count on the **Grand Knight Desk** drops when you open the tab again.

Common problems:

Problem	Cause	Fix
The **Grand Knight Desk** tab does not show.	You do not hold the Grand Knight or Deputy Grand Knight seat on this council, and you are not an Admin.	Use the **Home** tab. Ask the Grand Knight to release the sheets.
A sheet shows no release button on the full desk.	You submitted, ordered or coded that sheet (the collusion guard).	Ask a Super Admin to release the sheet.

19.6 Work the Financial Secretary Desk and the roster imports

> **Who can do this:** the council's Financial Secretary and Super Admins sign orders. Only the council's Admins and Super Admins import the roster.
>
> **Warning:** the roster import sends a welcome email to each new member. You cannot recall an email.

Goal: Sign the waiting expense orders, and keep the roster current.

Start point: Active Desks row → **Financial Secretary Desk**.

Steps:

1. Select the **Financial Secretary Desk** tab.
2. Read the **Sheets waiting for your payment request** count.
3. Select **Verify & sign on the full desk**. The **FS Expense Audit** page opens.
4. Select **Verify & Sign Expense** on each sheet. Return to the dashboard.
5. In the **Excel roster imports** card, select **Download the Excel roster template**.
6. Fill in the template. Save the **Roster** sheet as CSV.
7. Select **Supreme roster sync**. Load the CSV file on that page. Each new member gets a welcome email.

Expected result: The signed sheets move to the Treasurer. The new members show in the roster.

Common problems:

Problem	Cause	Fix
The inactivity sweep is not on the desk.	The sweep moved to System Settings.	Open Sidebar → System Settings → **Council Wide Settings** (section 14.9).
The roster file does not load.	The file is not CSV.	Save the **Roster** sheet as CSV, then load the file again.

19.7 Code sheets from the Treasurer Desk

> **Who can do this:** the council's Treasurer and Super Admins code sheets. The council's Admins read the desk.

Goal: Find the sheets that wait for a budget line and a ledger account, and code them.

Start point: Active Desks row → **Treasurer Desk**.

Steps:

1. Select the **Treasurer Desk** tab.
2. Read the **Sheets waiting for ledger coding** count.
3. Read the **Ledger Line Coder queue** grid. The **Signed so far** column names the FS who ordered each sheet.
4. Select **Categorize & lock on the full desk**. The **Treasurer Ledger Audit Desk** opens.
5. Pick the budget line and the ledger account for each sheet.
6. Select **Categorize & Lock Expense**. The sheet goes to the Grand Knight.

Expected result: The coded sheets leave the queue. The sheets show on the **Grand Knight Desk**.

Common problems:

Problem	Cause	Fix
The **Treasurer Desk** tab does not show.	You do not hold the Treasurer seat on this council, and you are not an Admin.	Ask the Treasurer to code the sheets.
Log its concluded revenue does not show.	Only the Treasurer and Super Admins log concluded revenue.	Ask the Treasurer to log the revenue.

19.8 Check your own work on the Member Desk

> **Who can do this:** every reader of the dashboard.

Goal: See your own unpaid expense sheets, your shifts, the open shifts and your charity requests.

Start point: Active Desks row → **Member Desk**.

Steps:

1. Select the **Member Desk** tab.
2. Read **[🚗 Open Shifts Needing Volunteers]**. The card lists the shifts in the next 30 days that still need volunteers, such as the parish parking lot shifts.
3. Select **Sign up** on a shift to take a place. The shift leaves the card.
4. Read **[📥 My Charity Requests]**. The tracking steps show the stage of each request that you carry.
5. Read **My open expense sheets**. The status pill shows the stage of each sheet.
6. Select **Open my expenses** to edit a draft or submit a sheet.
7. Read **My shifts: next 30 days**.
8. Select **Open the Council Dashboard** for the council's service record and your own impact card.

Expected result: The desk lists the open shifts, your charity requests, each unpaid sheet and each coming shift.

Common problems:

Problem	Cause	Fix
A paid sheet does not show.	The desk lists only sheets that are not **Reimbursed**.	Open **My Expense Reports** to see paid sheets.
A shift after 30 days does not show.	The desk lists the next 30 days only.	Open the council calendar.
[📥 My Charity Requests] does not show.	The council's charity proposals module is off.	Ask a Super Admin to turn on the module on the **Feature Flags** page.
Sign up shows an error.	The shift is full, or the shift overlaps another of your shifts.	Pick another shift.

19.9 Concept: the minutes countdown

The **Recorder Desk** lists the council's meetings from 90 days ago to 30 days ahead. This list is the **Business calendar**. Each meeting has one countdown pill.

Pill	Meaning
Not held yet	The meeting is in the future.
Due in 3 days	The meeting is over. The minutes are due in 3 days.
Due today	The minutes are due today.
2 days overdue	The due date has passed. Nobody published the minutes.

Pill	Meaning
Published	The Recorder published the minutes. The countdown stops.

The due date is the meeting's last day plus the **Days after a meeting that the minutes are due** setting (section 16.3). The default is 7 days. Overdue meetings come first in the list.

19.10 Write and publish the meeting minutes

> **Who can do this:** the council's Recorder, the council's Admins and Super Admins. Other members do not see the **Recorder Desk**.
>
> **Warning: Publish minutes** shows the minutes as the council's official record.

Goal: Write the official minutes of a meeting and publish them before the due date.

Start point: Active Desks row → **Recorder Desk**.

Steps:

1. Select the **Recorder Desk** tab.
2. Select a meeting in the **Business calendar**. Overdue meetings are at the top.
3. In **Meeting Minutes Entry Desk**, type the minutes. Start a heading with `#`. Start a bullet with `-`.
4. Select **Preview** to read the minutes as members see them. Select **Write** to go back.
5. Select **Save draft** to keep the minutes without publishing them.
6. Select **Publish minutes**. The pill changes to **Published**.

Expected result: The message *"The minutes are published."* shows. The meeting moves to the end of the list.

Common problems:

Problem	Cause	Fix
Publish minutes is not available.	The minutes are blank.	Type the minutes first.
You must correct published minutes.	Published minutes stay open for changes.	Change the text, then select **Publish changes**. The first publication date stays.
You published the wrong meeting.	You selected another meeting in the list.	Select **Withdraw to draft**. The minutes go back to a draft.
The **Recorder Desk** tab does not show.	You do not hold the Recorder seat on this council, and you are not an Admin.	Ask the Grand Knight to check your seat.

19.11 Start the live meeting from the Recorder Desk

> **Who can do this:** the council's Recorder, the council's Admins and Super Admins.
>
> **Warning:** the start locks the quorum count to the council's Active members at that moment. You cannot change the locked count.

Goal: Open the live meeting and read the meeting PIN to the members in the hall.

Start point: Active Desks row → **Recorder Desk**.

Steps:

1. Select the meeting in the **Business calendar**.
2. Select **[🚀 Start Live Meeting Sequence]**. The quorum count locks. You cannot change the locked count.
3. Read the 4-digit **Meeting PIN bypass** in the navy box.
4. Read the PIN aloud. Members whose phones cannot check in by location type the PIN.

5. Select **Open the Live Meeting Console** → to run the agenda.

Expected result: The navy box shows the PIN and the locked quorum base. The meeting shows ● **Live now**.

Common problems:

Problem	Cause	Fix
The box says the PIN is still the factory PIN 0000.	Nobody changed the council's PIN.	Ask the Grand Knight to set a new PIN (section 18.5).
The meeting was already live.	Someone started the meeting before you.	No action. The first quorum count stays.

19.12 Keep the Digital Fraternal Annals Scrapbook

> **Who can do this:** the council's Council Historian, the council's Admins and Super Admins. Other members do not see the **Historian Desk**.

Goal: Write the monthly newsletter, file meeting photos and check the oral history recordings.

Start point: Active Desks row → **Historian Desk**.

Steps:

1. Select the **Historian Desk** tab.
2. In 📰 **Monthly newsletters**, select the **Month**.
3. Type the newsletter text. Select **Save newsletter**.
4. To open an earlier newsletter, select its month button under the text box.
5. In 📷 **Parish event and meeting photos**, select the **Meeting**.
6. Select **Upload photo**, then pick the image file.
7. In 🎙 **Oral history recordings**, select **Listen** beside a recording to play it.
8. To record your own testimonial, use the recorder under the list.

Expected result: The newsletter shows *"Newsletter saved."* The photo shows under the meeting name. The portal files the photo in the council's Google Drive under **Media / Meeting_Photos**.

Common problems:

Problem	Cause	Fix
"The Drive vault is off, so the photo is kept in this browser only."	The council's Google Drive is not connected.	Ask a Super Admin to connect Google Drive (section 10.8).
The recorder does not show.	You recorded your one testimonial before.	No action. Each member records one testimonial.
One month shows only one newsletter.	The council keeps one newsletter for each month.	Change the text and select **Save newsletter**. The new text replaces the old text.

19.13 Read the Executive Dashboard page

> **Who can do this:** the council's Admins and officers, the Council Historian, and Super Admins. A Council Historian without an officer seat reads the month, the roadmap and the engagement row. The budget, mission tracking and audit panels stay with the officers.
>
> **Warning:** when the roadmap ribbon shows an overdue step, the portal sends a push alert to the council's leaders. You cannot recall an alert.

Goal: Read one month of council activity: the roadmap, the stat tiles, the budget and the audits.

Start point: Sidebar → Performance → **Executive Dashboard**. The address is `/executive-dashboard`.

Steps:

1. Read the roadmap ribbon at the top. The gold step is next. A red step is overdue. Select **Full roadmap ↓** to scroll to the full **Annual Fraternal Roadmap** card.
2. Choose the **Month** and the **Year** of the **Executive Summary**.
3. Read the four stat tiles, the monthly activity overview and the **Top 5 Volunteers Leaderboard**.
4. Read the **Faith-in-Action Mission Tracking** card and the **Budget tracking** gauges.
5. Read the **Financial ledger** table and the **Monthly highlights**.
6. Read the no-show audit under **Executive audits**.
7. Read the **Annual Council Goals Progress Center** and the **Year-over-Year Trends** under the roadmap. See sections 19.14 to 19.16.

Expected result: The page shows the whole **Executive Summary** for the month. The page scrolls like any other page. The **Active Desks** row stays under the header.

Common problems:

Problem	Cause	Fix
The **Executive Dashboard** link does not show.	You do not hold an officer seat or the Council Historian role, and you are not an Admin.	Ask a council Admin.
The **Shifts awaiting hours** audit is not on the page.	The audit is on the **Oversight Desk**.	Select the **Oversight Desk** tab.
The budget gauges do not show.	Your seat does not review the budget.	Ask the Grand Knight or the Financial Secretary.

19.14 Concept: the Annual Council Goals Progress Center

The **Annual Council Goals Progress Center** is a card on the **Executive Dashboard** page. The card compares the council's targets for one fraternal year (July 1 to June 30) with the council's records.

Wheel	Target	What the portal counts
Funds raised	Dollars	The funds raised at the council's events in the fraternal year. The count matches the **Total raised** line of the **Financial ledger**.
New members	Members	The council's members whose join date falls in the fraternal year.
Service hours	Hours	The hours members logged at council events and activities in the fraternal year.
Rosaries	Rosaries	The rosaries that the council's members logged in the **Faith Center** tally.
Hours of adoration	Hours	The hours of adoration that the council's members logged in the tally.
Confessions	Confessions	The confessions that the council's members logged in the tally.

Each wheel fills with navy as the council moves toward the target. The percent shows in the middle. A wheel at 100% or more turns gold and shows **Goal reached**. A wheel with no target shows **No target set**.

The devotional tally has no dates. The three spiritual wheels count every devotion that members logged, not only the devotions of the fraternal year. A white-label organization does not see the three spiritual wheels.

The goals card and the **Year-over-Year Trends** card show money. Only the council's officers, the council's Admins and Super Admins see the two cards. A Council Historian without an officer seat does not see the two cards.

19.15 Set the council's annual goals

> **Who can do this:** the Grand Knight (GK), the Deputy Grand Knight (DGK), the council's Admins and Super Admins. Other readers see the wheels only.
>
> **Warning:** the goals of a fraternal year lock for good on its July 1. Nobody can change the goals after that date. See section 21.

Goal: Save the six targets of one fraternal year.

Start point: Sidebar → Performance → **Executive Dashboard** → **Annual Council Goals Progress Center**.

Steps:

1. Choose the year in **Fraternal year**.
2. Select **Set targets**. When the year already has targets, the button reads **Edit targets**.
3. Enter each target. Enter the hours in steps of 0.25.
4. Select **Save targets**.

Expected result: The form closes. Each wheel shows the new target and the new percent.

Common problems:

Problem	Cause	Fix
The **Set targets** button does not show.	You do not hold the GK or DGK seat, and you are not an Admin.	Ask the Grand Knight.
The card shows **Locked July 1** and no **Edit targets** button.	The fraternal year started. The goals are read-only.	Set the next year's goals before its July 1. See section 21.2.
The portal refuses the hours target.	The hours target is not a multiple of 0.25.	Enter the hours in quarter hours, for example `2500.25`.
The **Funds raised** wheel stays at 0%.	No event of the fraternal year has funds raised recorded.	Record the funds raised in the **Post-event Ledger**.

19.16 Read the Year-over-Year Trends

> **Who can do this:** the council's officers, the council's Admins and Super Admins.

Goal: Compare the funds raised and the volunteer hours of the current fraternal year with the 2 years before it.

Start point: Sidebar → Performance → **Executive Dashboard** → **Year-over-Year Trends**.

Steps:

1. Read the **Funds raised by month** chart. Each line is one fraternal year, from July to June. The current year is a solid navy line. The year before is a dashed gold line. The year before that is a dotted grey line.
2. Point to a month on a chart. A box shows the figure of each year for that month.
3. Read the **Volunteer hours by month** chart.
4. Read the table under the charts. The table splits the funds raised into **Cash** and **Electronic**. The table splits the hours into **Event hours** and **Activity hours**.
5. Select **Show the monthly figures as a table** to read every month as numbers.

Expected result: The card shows the two charts and the table. The line under the table gives the change of the current year against the year before, as a percent.

Common problems:

Problem	Cause	Fix
A line stays flat at 0.	The council recorded no funds or hours in that fraternal year.	Record the results in the **Post-event Ledger**.

Problem	Cause	Fix
The note says the figures were computed in this browser.	The portal server did not answer for your sign-in. The card shows the same figures from your browser.	No action is necessary. To use the server, sign out and sign in again.

20. The Cross-Council Loaner Library and the colour-coded calendar

20.1 Concept: the Cross-Council Loaner Library

The **Cross-Council Loaner Library** lets councils lend equipment to each other. Tents, sound systems and fryers are examples. Each item is an asset in the council's asset inventory.

Status	Meaning
Available	A brother council can borrow the item.
Checked out	A brother council has the item. The library shows the borrower, the borrowing council and the expected return date.
Overdue	The item is checked out, and the expected return date is past.
Paused	The council holds the item out of the library for now, for example for a repair.

Every active member reads the shared inventory directory. A member sees the items of the member's own council. A member also sees the items of each affiliated council when both councils have loaner library sharing on. See section 21.8. The directory never shows the cost, the serial number, the notes or the storage place of an item.

Only the council's GK, the council's DGK and Super Admins lend the council's items. Admins, the Financial Secretary and the Trustees do not lend items.

20.2 Find an item to borrow

> **Who can do this:** every active member.

Goal: Find an item that a brother council lends.

Start point: Sidebar → Resources → **Cross-Council Loaner Library**. The address is `/inventory/loaner-library`.

Steps:

1. Read the **Shared inventory directory**. Available items show first.
2. Read the **Owning council** of the item.
3. Call the Grand Knight of the owning council to ask for the item.

Expected result: You know which council has the item and when the item is free.

Common problems:

Problem	Cause	Fix
The directory is empty.	Your council and its affiliated councils have listed no item yet.	Ask your Grand Knight to list the council's equipment.
A brother council's items do not show.	The councils are not affiliated, or one council has sharing off.	Ask your Grand Knight. See section 21.8.

20.3 Lend, pause and check in the council's items

> **Who can do this:** the council's GK, the council's DGK and Super Admins.
>
> **Warning:** affiliated councils see an item as soon as you put the item in the library, while both councils have sharing on.

Goal: Put an item in the library, check the item out to a borrower and log its return.

Start point: Active Desks → **Grand Knight Desk** → **Cross-Council Loaner Library**. The same controls are on Sidebar → Resources → **Cross-Council Loaner Library**, under the directory.

Steps:

1. Find the item in **Loaner library: our items**.
2. Select the **In the loaner library** switch. The switch shows **On**. The item shows **Available**.
3. To lend the item, select **Check out**.
4. Enter the **Borrower**, the **Borrowing council** and the **Expected return** date. The date must be today or later.
5. Select **Check out** in the form. The item shows **Checked out**.
6. When the item comes back, select **Log return**. The item shows **Available** again.
7. To hold an available item out of the library, select **Pause (hold out of the pool)**. Select **Resume lending** to put the item back.
8. To take the item out of the library, select the **In the loaner library** switch again. The switch shows **Off**.

Expected result: The **Shared inventory directory** shows the item with its new status.

Common problems:

Problem	Cause	Fix
The **In the loaner library** switch is grey.	The item is checked out.	Select **Log return** first.
The item is not in the list.	The item is disposed or lost, or the council has no asset record for the item.	Approve the purchase as a long-term council asset. See section 17.
The check-out form refuses the date.	The expected return date is in the past.	Enter today or a later date.

20.4 Concept: the colour-coded calendar

The **Visual Master Calendar** colours each event by the Supreme mission area of the event's local category.

Mission area	Colour	Local categories
Faith	Gold	Faith Building, Evangelization
Community	Blue	Service, Parish Community, Fundraising
Family	Green	Fellowship
Life	Red	Life

Meetings stay solid navy. An event with a category outside the four areas keeps the white block.

On a coloured block, the shift warnings change form:

- A shift that starts within 48 hours puts a red outline around the block. The outline pulses.
- A shift that still needs volunteers puts the ⚑ flag before the event name.

The legend above the calendar lists every colour and mark.

21. Planning workflows and bilateral council affiliations

21.1 Concept: the Annual Budget Planner

The council plans each fraternal year in the two months before the year starts. The fraternal year runs from July 1 to June 30.

Step	When	What happens
Draft	May 1 - May 31	Leadership drafts the Annual Council Goals and the budget lines.
Review	June 1 - June 30	Leadership checks the goals and the budget. Leadership marks each one reviewed.
Lock	July 1	The year starts. The goals become read-only for good. The budget figures lock.
Final vote	By July 10	The council votes the budget. The vote locks every budget line.

The goals and the budget each show one status:

Status	Meaning
Draft	Nobody marked the goals or the budget reviewed yet.
Reviewed	Leadership marked the goals or the budget reviewed. Leadership can still change the goals until July 1.
Locked	The year started (goals), or the council voted (budget).

The July 1 goals lock has no exception. Nobody can change the goals of a started year, not even a Super Admin. Set the goals before July 1.

The budget vote must be recorded by July 10. After July 10, only a Super Admin can record the vote, with the override.

The **Annual Budget Planner** banner leads the **Council Wide Settings** page. The banner shows the four steps and marks the current step **(now)**. Under the steps, the banner shows the year's goals and the budget status.

21.2 Draft and review the year's goals

> **Who can do this:** the Grand Knight (GK), the Deputy Grand Knight (DGK), the council's Admins and Super Admins.

Goal: Save the targets of the next fraternal year and mark them reviewed before July 1.

Start point: Sidebar → System Settings → **Council Wide Settings** → **Annual Budget Planner**.

Steps:

1. Choose the year in **Fraternal year**. The next year shows first.
2. Select **Set targets**. When the year already has targets, the button reads **Edit targets**.
3. Enter each target. Enter the hours in steps of 0.25.
4. Select **Save targets**.
5. In June, check the targets with leadership.
6. Select **Mark goals reviewed**.

Expected result: The goals show the **Reviewed** status. The targets show as information blocks.

Common problems:

Problem	Cause	Fix
The **Set targets** button does not show.	The year started on July 1. The goals are locked.	No fix is possible. Set the next year's goals before its July 1.

Problem	Cause	Fix
The portal says the goals are locked.	Today is July 1 or later in that fraternal year.	Choose the next fraternal year.
Mark goals reviewed does not show.	The year has no saved goals, or the goals are already reviewed.	Save the targets first.

21.3 Mark the budget reviewed

> **Who can do this:** the council's Admins, the Financial Secretary, the Treasurer, the Designated Budget Director and Super Admins.

Goal: Record that leadership reviewed the drafted budget in June.

Start point: Sidebar → System Settings → **Council Wide Settings** → **Annual Budget Planner** → **Annual budget**.

Steps:

1. Choose the year in **Fraternal year**.
2. Select **Open the budget** to read the budget lines.
3. Go back to **Council Wide Settings**.
4. Select **Mark budget reviewed**.

Expected result: The budget shows the **Reviewed** status.

Common problems:

Problem	Cause	Fix
Mark budget reviewed does not show.	The drafting window is closed, the budget has no lines, or the budget is already reviewed.	Mark the budget reviewed between May 1 and June 30.

21.4 Record the council's budget vote by July 10

> **Who can do this:** the council's Admins, the Financial Secretary, the Treasurer and Super Admins.
>
> **Warning:** the vote locks every budget line. You cannot undo the vote.

Goal: Record the council's vote on the budget at the July meeting.

Start point: Sidebar → Finances → **Annual Budget Projections**.

Steps:

1. Choose the fraternal year.
2. Select **Approve & Finalize Entire Budget**.
3. Confirm the approval. You cannot undo this.

Expected result: The budget shows **Approved**. The planning banner shows the budget as **Locked**.

Common problems:

Problem	Cause	Fix
The portal says the vote deadline passed.	Today is after July 10.	Ask a Super Admin to record the vote with the override.

21.5 Concept: bilateral council affiliations

Two councils of the same state can affiliate. An affiliation is a handshake between the two councils:

1. An Admin, the GK or the DGK of one council sends an invite. The invite shows **Invite sent**.
2. The GK or the DGK of the other council selects **Accept** or **Decline**.
3. After **Accept**, the two councils are **Affiliated**. The portal records the date.

A council Admin can send an invite but cannot accept one. Only the GK or the DGK of the invited council accepts the invite.

The **Connected Councils** directory lists the other councils of your state. The nearest council shows first. The portal measures the distance between the meeting points of the councils. A council without a meeting point follows in district order. Councils of your own district show first.

The GK sets the meeting point on **Council Wide Settings** → **Meeting Check-In**. A Super Admin enters the district number on the **Councils** page.

21.6 Send an affiliation invite

> **Who can do this:** the council's Admins, the GK, the DGK and Super Admins.
>
> **Warning:** the other council sees the invite at once.

Goal: Invite a nearby council of your state to affiliate.

Start point: Sidebar → System Settings → **Connected Councils**. The address is `/system-settings/affiliations`.

Steps:

1. Find the council in the list of councils in your state. Use **Find a council** or **My district only** to shorten the list.
2. Select **Send invite**.

Expected result: The council shows **Invite sent** with today's date.

Common problems:

Problem	Cause	Fix
A council is not in the list.	The council is in another state.	Affiliations stay inside your state.
The portal says an invite is already pending.	One of the two councils already sent an invite.	Wait for the other council's answer.
The list is not in distance order.	Your council has no meeting point.	Ask the GK to set the meeting point on **Meeting Check-In**.

21.7 Accept or decline an affiliation invite

> **Who can do this:** the GK, the DGK and Super Admins.

Goal: Answer an invite that another council sent to your council.

Start point: Active Desks → **Grand Knight Desk** → **Affiliation Invites**. The same invites show at the top of **Connected Councils**.

Steps:

1. Read the council name, the distance and the invite date.
2. Select **Accept** to affiliate. Select **Decline** to refuse the invite.

Expected result: After **Accept**, the council shows **Affiliated** with today's date. After **Decline**, the council shows **Declined**. Either council can send a new invite later.

Common problems:

Problem	Cause	Fix
The **Accept** button does not show.	You are an Admin, not the GK or the DGK.	Ask the GK to accept the invite.

21.8 Concept: loaner library sharing

Each council has a **Cross-Council Loaner Library Sharing** switch on **Council Wide Settings**. The switch is off for a new council.

Your members always see your own council's items. A brother council's item shows in your library only when all three rules are true:

Rule	Where to set it
The two councils are **Affiliated**.	**Connected Councils**
Your council has sharing on.	**Council Wide Settings** → **Cross-Council Loaner Library Sharing**
The brother council has sharing on.	The brother council's **Council Wide Settings**

21.9 Switch loaner library sharing on

> **Who can do this:** the council's officers, the council's Admins and Super Admins.

Goal: Share your council's items with affiliated councils, and see their items.

Start point: Sidebar → System Settings → **Council Wide Settings** → **Cross-Council Loaner Library Sharing**.

Steps:

1. Select the switch. The switch shows **Sharing is on**.

Expected result: The **Shared inventory directory** shows the items of each affiliated council that also has sharing on.

Common problems:

Problem	Cause	Fix
An affiliated council's items do not show.	The other council has sharing off.	Ask the other council's GK to switch sharing on.

22. The Global Operations Knowledge Vault and its archive

22.1 Concept: the Global Operations Knowledge Vault

Officers change every year. The **Global Operations Knowledge Vault** keeps what each leader learned, so the next chairman does not start over.

Each entry is one note under one governance tag:

Tag	What to write
Recruiting	Membership drives, parish contacts and what worked.
Treasury	Bank signers, deadlines and money procedures.
Clergy	How the pastor and the chaplain like to work with the council.
Compliance	Supreme forms, due dates and audit steps.
Devotional	Prayer, rosary and spiritual programs.
Logistics	Equipment, storage places, keys and suppliers.

The portal signs each entry. The signature shows your name and your seat, for example **Tom McDougal, Grand Knight**. The portal also records the date. You cannot edit or delete an entry after you save it.

Who	Write entries	Read the archive
Grand Knight (GK) and Deputy Grand Knight (DGK)	Yes, for their council	Yes, every council
The council's Admins	Yes, for their council	Yes, every council
Other officers of the council	No	Yes, every council
Super Admins	Yes, for any council	Yes, every council
Other members	No	No

22.1.1 Concept: one archive for every council

The archive holds the entries of every council on the platform. An officer in one council can read what a brother council learned.

Each entry shows a council badge, for example **Council 2042 · St. Anthony Council**. The portal writes the badge when the entry is saved. The badge of your own council is navy. The badge of a brother council is white.

The **Filter by My Home Council Only** box hides the entries of other councils. Clear the box to see every council again.

22.1.2 Concept: the content guard and the Charter Advisory Warning

The archive is read by officers of every council. For this reason, the vault checks each entry two times: while you type, and again when you save.

The content guard refuses an entry that contains foul language, hateful language or partisan political words. The red message names the kind of language. It does not repeat the word.

The Charter compliance gate compares the entry with the non-partisan and non-profit rules of the Order. A matching rule opens the **Charter Advisory Warning** panel under the editor. The panel has two levels:

Level	Panel colour	What the rule covers	Can you save?
Advisory	Navy	Campaign signs at council events, the Order's name or emblem in politics, ballot measures and lobbying, cash without receipts.	Yes. Read the rule first.

Level	Panel colour	What the rule covers	Can you save?
Severe (**SAVING IS BLOCKED**)	Red	Endorsing or opposing a candidate for public office, council money to a campaign, party or political action committee, private use of council funds.	No. **Save signed entry** stays grey until you change the text.

Each rule in the panel shows the **Source Authority**. The endorsement and campaign-money rules also quote the U.S. tax law for charitable funds (Internal Revenue Code § 501(c)(3)).

The panel does not quote section numbers of the Charter, Constitution and Laws of the Knights of Columbus. The portal does not hold that text. Confirm the exact section with your State Deputy.

The gate looks for words and phrases. It does not understand meaning. A rule can match a note that only warns against the act, for example "Do not endorse a candidate for mayor". Reword the note, for example "The council stays out of election campaigns".

22.2 Write a vault entry

> **Who can do this:** the GK, the DGK, the council's Admins and Super Admins. Other members do not see this card.
>
> **Warning:** you cannot edit or delete an entry after you save it.

Goal: Save a signed note for the leaders who come after you.

Start point: Active Desks → **Oversight Desk** → **Global Operations Knowledge Vault**.

Steps:

1. Select a tag in **Governance tag**.
2. Write the note in **Entry**. Use `#` for a heading, `-` for a bullet and `**text**` for bold text.
3. Select **Preview** to check the note. Select **Write** to change the note.
4. Read the **Charter Advisory Warning** panel if it shows. Change the text when the panel is red.
5. Select **Save signed entry**. You cannot undo this.

Expected result: The card shows a message with the tag and your signature. The entry shows first under **Latest entries**.

Common problems:

Problem	Cause	Fix
Save signed entry is grey.	The entry is empty.	Write the note first.
Save signed entry is grey and the panel says **SAVING IS BLOCKED**.	The text matches a severe Charter rule.	Change the words the panel names.
A red message says the entry contains foul, hateful or partisan language.	The content guard found a blocked word.	Remove the word or reword the note.
The save fails with "crosses the Order's non-partisan or non-profit boundaries".	The portal checked the text again at save.	Change the text and save again.
The vault card does not show.	You are not the GK, the DGK or an Admin.	Ask the GK to write the entry.
The note is cut off.	An entry holds at most 8,000 characters.	Split the note into two entries.

22.3 Search the Operations Knowledge Archive

> **Who can do this:** the officers and Admins of every council, and Super Admins. Other members do not see this page.

Goal: Find the notes past leaders of your council, or of brother councils, saved about one subject or one year.

Start point: Sidebar → System Settings → **Operations Knowledge Archive**. The address is `/system-settings/knowledge-archive`. The **Open the archive** link on the vault card opens the same page.

Steps:

1. Select **Filter by My Home Council Only** to see only your council's entries. Clear the box to see every council.
2. Select a tag in **Governance tag**. Select **Every tag** to see all tags.
3. Select a year in **Fraternal year**. A fraternal year runs from July 1 to June 30.
4. Type words in **Search** to find a note, a signature or a council name.
5. Select a row to read the full note. Select the row again to close the note.

Expected result: The grid shows the matching entries, newest first. Each row shows the date, the fraternal year, the council badge, the tag and the signature.

Common problems:

Problem	Cause	Fix
The grid says **No entry matches these filters.**	No entry has all the selected filters.	Select **Every tag** or **Every year**, or clear **Search**.
Entries from other councils show.	The archive shows every council.	Select **Filter by My Home Council Only**.
Your council's entries do not show.	The search words or filters exclude them.	Clear **Search**, and select **Every tag** and **Every year**.
You cannot add an entry here.	The archive is read-only.	Write entries on the **Oversight Desk**.

Appendix: QR code files

The two onboarding codes are in `apps/web/public/assets/images/qr/`. Print or project the codes for new members. The phone **Donate** screen shows the collection codes. The phone shows the council's image link first. When the link is missing or broken, the phone shows the code that ships with the app.

To put a real code in place, replace the file. Keep the file name.

Code	File
	`apps/web/public/assets/images/qr/expo-go-sync.png`
	`apps/web/public/assets/images/qr/member-sign-up.png`
	`apps/mobile/assets/images/qr/parishsoft-collection.png`
	`apps/mobile/assets/images/qr/venmo-collection.png`
	`apps/mobile/assets/images/qr/zeffy-collection.png`
	`apps/mobile/assets/images/qr/zelle-collection.png`
